The Oxford Handbook of Ancient Iran D. T. Potts.2017-02 Iran's heritage is as varied as it is complex, and the archaeological, philological, and linguistic scholarship of the region has not been the focus of a comprehensive study for many decades. The Oxford Handbook of Ancient Iran provides up-to-date, authoritative essays on a wide range of topics extending from the earliest Paleolithic settlements in the Pleistocene era to the Arab conquest in the 7th century AD. The volume, authored by specialists based both inside and outside of Iran, is divided into sections covering prehistory, the Chalcolithic, the Bronze Age, the Iron Age, the Achaemenid period, the Seleucid and Arsacid periods, the Sasanian period, and the Arab conquest. In addition, more specialized chapters are included which treat numismatics, religion, languages, political ideology, calendrics, the use of color, textiles, Sasanian silver and reliefs, and political relations with Rome and Byzantium. No other single volume covers as much of Iran's archaeology and history with the same degree of authority. Drawing on the results of the latest fieldwork in Iran and studies by scholars from around the world, this volume addresses a longstanding gap in the literature of the ancient Near East.

From Mine to Microscope Ian Freestone,Thilo Rehren.2009-04-09 These twenty papers dedicated to Mike Tite focus upon the interpretation of ancient artefacts and technologies, particularly through the application of materials analysis. Instruments from the human eye to mass spectrometry provide insights into a range of technologies ranging from classical alum extraction to Bronze Age wall painting, and cover materials as diverse as niello, flint, bronze, glass and ceramic. Ranging chronologically from the Neolithic through to the medieval period, and geographically from Britain to China, these case studies provide a rare overview which will be of value to students, teachers and researchers with an interest in early material culture.

The Roman Army Chris McNab.2012-05-22 The image of the Roman legionary is as familiar today as it was to the citizens - and enemies - of the vast Roman Empire two thousand years ago. This book goes beyond the stereotypes found in popular culture to examine the Roman Army from the first armed citizens of the early Republic through the glorious heights of the Imperial legions to the shameful defeats inflicted upon the late Roman Army by the Goths and Huns. Tracing the development of tactics, equipment and training, this work provides a detailed insight into the military force that enable Rome to become the greatest empire the world has ever seen. As well as describing the changes in the army over the centuries, The Roman Army also sheds light on the talented men who led these soldiers in battle and the momentous battles fought, including Cannae, Pharsalus, and Adrianople. Illustrated with detailed maps, artwork and photographs, this volume provides a complete reference to the Roman Army from the 8th century BC to the period after the fall of the Western Roman Empire in the 5th century AD. The Pied Piper of Tucson Don Moser,Jerry Cohen.1967 It was Life and Time magazines that turned a local story from Tucson, Arizona, into a national abomination. Reporters came from all over, to be sure, but on March 4, 1966, Life printed an ominous photo of the desert landscape where three girls had disappeared and the story of Charles Howard Schmid, Jr., or Smitty, became international news. He had been arrested four months earlier on November 11, just after marrying a fifteen-year-old girl whom he'd met on a blind date. The article was published even before the juries in two separate trials had decided his fate. Dubbed The Pied Piper of Tucson, for his ability to get girls to fall for him, he stood five feet, four inches tall, but added three more inches by padding his stack-heeled cowboy boots with rags and tin cans. He also dyed his reddish-brown hair black, used pancake make-up, whitened his lips, and applied a fake mole to his left cheek-a beauty mark. Arrogant and narcissistic, he came from a wealthy family, so he used the niceties he could buy to impress young high school girls. He adopted the droopy-eyed look associated with Elvis, his idol, and acquired a rock musician's mystique. His tiny house on his parents' property was the scene of many parties. Tucson society was not merely shaken by the murders of three of their young women but by what the details of those murders revealed about its adolescent population-sex clubs, drinking parties, blackmail, cover-ups for murder, and even connections with the crime underworld. Parents suddenly became more strict, more aware now that their kids weren't safe and maybe weren't even behaving properly. When kids looked to someone like Charles Schmid for answers, there was something terribly wrong.
