Acosta.2020-06-08 Pharmacology for Health Professionals, Second Edition is specifically written for students who may not directly administer drugs in their chosen health profession, but who will be involved in patient care and therefore need to understand basic pharmacological principles and practices

Introducing Pharmacology Roger McFadden.2014-04-16 This new edition of Introducing Pharmacology remains an accessible and relevant introduction for nursing and healthcare students who are new to pharmacology, as well anyone looking to refresh their knowledge of the subject. Focused and engaging, the text balances accessibility with depth. Coverage of anatomy and physiology as well as pathophysiology helps to relate the subject to practical realities and makes this text stand out. It includes: Concise explanations of how drugs work in the human body.

Explains the underlying physiology and pathophysiology necessary for an understanding of the action of drugs. All of the common drug groups that practitioners are likely to encounter in clinical practice. New to this edition: Additional chapter on cancer and anti-cancer drugs. New sections, including general anaesthetics, hay-fever and prescribing for special groups such as children, pregnant women and the elderly. Updated to include the latest UK prescribing guidelines. New case-studies, relating pharmacological theory to clinical practice. Inclusion of a new glossary of key terms and definitions.

Bad Pharma Ben Goldacre.2014-04 Argues that doctors are deliberately misinformed by profit-seeking pharmaceutical companies that casually withhold information about drug efficacy and side effects, explaining the process of pharmaceutical data manipulation and its global consequences. By the best-selling author of *Bad Science*.

Focus on Pharmacology Jahangir Moini.2017-03-22 For pharmacology courses in any allied health program, including programs for medical assistants, pharmacy technicians, respiratory care technicians, surgical technicians, and physical therapy assistants. This text can also be used in LPN and associate degree-nursing programs. A focused, teach-and-test approach to learning pharmacology *Focus on Pharmacology: Essentials for Health Professionals* helps students learn pharmacology by presenting small amounts of information and then offering opportunities for readers to apply what they've learned through a variety of exercises. Designed specifically for allied health students, early chapters lay the groundwork for learning pharmacology by introducing its history, legal and ethical principles, drug administration techniques, essential math, calculations, and medication errors. Subsequent chapters offer a structured presentation of the drugs intended to treat specific body systems and associated disorders. Each drug chapter starts with a concise review of anatomy and physiology, providing a

foundation for understanding drug actions and uses.

Pharmacologic principles are then presented in a consistent and easy-to-follow format, using clearly identifiable question-headings that help students focus on need-to-know drug information.

Pediatric and geriatric pharmacotherapies are covered in detail, as are substance abuse, antibiotics, and other drug categories.

Updated with the latest drug information and featuring seven new chapters, the Third Edition's focused, teach-and-test approach blends concise content with an engaging learning process to help students better retain essential information.

Clinical Pharmacology in Athletic Training

Michelle Cleary,Tom Abdenour,Mike Pavlovich.2021-10-12 Athletic trainers have a responsibility to provide high-quality pharmaceutical care while meeting both legal and ethical requirements. Clinical Pharmacology in Athletic Training empowers athletic trainers with a functional understanding of pharmacology that enables them to formulate a treatment plan

intended to mitigate disease and improve the overall health of their patients. This text incorporates the most up-to-date content from the 2020 Commission on Accreditation of Athletic Training Education (CAATE) standards, and it emphasizes interprofessional practice to enable future and current athletic trainers to collaborate with other health professionals in a manner that optimizes the quality of care. Clinical Pharmacology in Athletic Training begins by addressing drug legislation and the legal aspects of the athletic trainer's role in sport medication. The text provides an overview of pharmacokinetics and pharmacodynamics with an emphasis on concepts relevant to clinical practice. Students are introduced to the generic and brand names, general classifications, and appropriate administration of drugs and are guided toward appropriate online reference materials. Part II of this text describes common medications for pain, inflammation, and infections. Part III includes medications for specific conditions, including respiratory, cardiovascular, gastrointestinal, neurological, gynecological, and mental health conditions. The text also includes current information on opioid analgesics, cannabis, and cannabinoid-based medications. Clinical Pharmacology in Athletic Training teaches students to administer appropriate pharmacological agents for the management of the patient's condition. The information includes indications, contraindications, dosing, interactions, and adverse reactions. The following features are included to aid in the learning process: Chapter objectives set the stage for the main topics covered in the chapter. Key terms are boldfaced to indicate terms of special importance, and a glossary of definitions is included at the back of the book. Red Flag sidebars highlight warnings and precautions for certain medications or medicolegal issues. Evidence in Pharmacology sidebars highlight recent research regarding medications. Clinical Application sidebars present real-life stories from the field of athletic training. Case studies

highlight specific therapeutic medication applications and are accompanied by questions that prompt readers to think critically about the issues presented. Quick reference drug tables describe medication types, generic and brand names, pronunciations, common indications, and other special considerations for the athletic trainer. Over the past decade, there has been an increased emphasis on pharmacology in athletic training. Clinical Pharmacology in Athletic Training will equip students with appropriate skills and competencies, prepare them to meet patient needs, and enable them to work in interprofessional teams.
