*Sabine Lippert's Beaded Fantasies* Sabine Lippert.2012 The best-selling Beadweaving Master Class series welcomes German beader Sabine Lippert, Europe's top beadwork designer, in a trend-setting book that showcases 30 beautiful and wearable project designs. Lippert combines seed beads, crystals, and glass pearls to create gorgeous, innovative beading projects. All feature her trademark tiers of beads that are layered into gorgeous jewelry. Every piece uses the most popular and beloved stitches in beading: right angle weave and peyote. Most of the bracelets, necklaces, earrings, pendants, and chokers here are new, but Sabine has also included a few of her favorite classics. An inspirational photo gallery of beadwork from leading designers, including Sabine, rounds out this must-have book.

**New York Magazine** .1997-09-15 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Science & Technology Studies Elsewhere Alexandra Hofmänner.2020-05-31 In April 2017, scientists took to the streets in a historically unprecedented Global March for Science. The event was seen as symbolic of a crisis in the relationship of science and society. This book considers the Global March for Science from a postcolonial perspective to inquire into the toolkit that the academic field of Science & Technology Studies (STS) has to offer. It argues that new concepts and analytical approaches are necessary to investigate current global dynamics in science, technology and society, so as to deliver insights that the recent expansion of STS scholars beyond Western Europe and North America alone is unlikely to provide. The book presents a Programme in Science Studies Elsewhere (SSE) to demonstrate the urgent need to carry postcolonial issues right into the centre of STS's intellectual programme.

**Microorganisms in Saline Environments: Strategies and Functions** Bhoopander Giri,Ajit Varma.2019-07-25 This book gathers the latest findings on the microbial ecology of saline habitats, plant-microbe interactions under saline conditions, and saline soil reclamation for agricultural use. The content is divided into four main parts: Part I outlines the definition of salinity, its genesis and impacts, and microbial diversity in saline habitats. Part II deals with impact of salinity on microbial and plant life/health. Part III highlights plant - microbe interactions in saline environments, and Part IV describes strategies for mitigation and reclamation of saline soils. The salinization of arable land is steadily increasing in many parts of the world. An excessive concentration of soluble salts (salinity) in soils or irrigation water adversely affects plant growth and survival. This problem is exacerbated in arid and semiarid areas due to their low precipitation and high evaporation rates. In turn, poor management practices and policies for using river water for the irrigation of agriculture crops often lead to the secondary salinization of soils. Considering the growing demands of a constantly expanding population, understanding the microbial ecology and interactions under saline conditions and their implications for sustainable agriculture is of utmost importance. Providing both an essential review of the status quo and a future outlook, this book represents a valuable asset for researchers, environmentalists and students working in microbiology and agriculture. .

Glucose Sensing Chris D. Geddes,Joseph R. Lakowicz.2007-12-29 An essential reference for any laboratory working in the analytical fluorescence glucose sensing field. The increasing importance of these techniques is typified in one emerging area by developing non-invasive and continuous approaches for physiological glucose monitoring. This volume incorporates analytical fluorescence-based glucose sensing reviews, specialized enough to be attractive to professional researchers, yet appealing to a wider audience of scientists in related disciplines of fluorescence.

Deep Time of the Media Siegfried Zielinski.2008-02-15 A quest to find something new by excavating the deep time of media's development—not by simply looking at new media's historic forerunners, but by connecting models, machines, technologies, and accidents that have until now remained separated. Deep Time of the Media takes us on an archaeological quest into the hidden layers of media development—dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery; in Deep Time of the Media, he illuminates turning points of media history—fractures in the predictable—that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of dreamers and modelers of media worlds, from the ancient Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. Media are spaces of action for constructed attempts to connect what is separated, Zielinski writes. He describes models and machines that make this connection: including a theater of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, and the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among others. Uncovering these moments in the media-archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the deep time media history shed light on today's media landscape and may help us map our expedition to the media future.

Beautiful Beadweaving Isabella Lam.2017-03-20 This book contains 25 gorgeous projects which focus on creating detailed, stitched jewelry. Isabella's original designs use common stitches such as peyote, herringbone, and right-angle weave and materials to make stunning wearable beadwoven jewelry. Her concise instructions incorporate step-by-step photographs that easily guide readers through the process of making necklaces, bracelets, and earrings. Additionally she uses materials that are easy to find: seed beads, pearls, gemstones, and crystals to make each piece unique.

**Bead-Weaving Stitches** Kalmbach Publishing Company.2004-08 Readers will learn to turn inexpensive seed beads into one-of-a-kind jewelry. Ten basic bead stitches are covered.

**Strengthening Post-Hurricane Supply Chain Resilience** National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Office of Special Projects,Committee on Building Adaptable and Resilient Supply Chains After Hurricanes Harvey, Irma, and Maria.2020-04-02 Resilient supply chains are crucial to maintaining the consistent delivery of goods and services to the American people. The modern

economy has made supply chains more interconnected than ever, while also expanding both their range and fragility. In the third quarter of 2017, Hurricanes Harvey, Irma and Maria revealed some significant vulnerabilities in the national and regional supply chains of Texas, Florida, the U.S. Virgin Islands, and Puerto Rico. The broad impacts and quick succession of these three hurricanes also shed light on the effectiveness of the nation's disaster logistics efforts during response through recovery. Drawing on lessons learned during the 2017 hurricanes, this report explores future strategies to improve supply chain management in disaster situations. This report makes recommendations to strengthen the roles of continuity planning, partnerships between civic leaders with small businesses, and infrastructure investment to ensure that essential supply chains will remain operational in the next major disaster. Focusing on the supply chains food, fuel, water, pharmaceutical, and medical supplies, the recommendations of this report will assist the Federal Emergency Management Agency as well as state and local officials, private sector decision makers, civic leaders, and others who can help ensure that supply chains remain robust and resilient in the face of natural disasters.

**The Original Portrayal of Mozart's Don Giovanni** Magnus Tessing Schneider.2021-11-16 The Original Portrayal of Mozart's Don Giovanni offers an original reading of Mozart's and Da Ponte's opera Don Giovanni, using as a lens the portrayal of the title role by its creator, the baritone Luigi Bassi (1766-1825). Although Bassi was coached in the role by the composer himself, his portrayal has never been studied in depth before, and this book presents a large number of new sources (first- and second-hand accounts), which allows us to reconstruct his performance scene by scene. The book confronts Bassi's portrayal with a study of the opera's early German reception and performance history, demonstrating how Don Giovanni as we know it today was not only created by Mozart, Da Ponte and Luigi Bassi but also by the early German adapters, translators, critics and performers who turned the title character into the arrogant and violent villain we still encounter in most of today's stage productions. Incorporating discussion of dramaturgical thinking of the late Enlightenment and the difficult moral problems that the opera raises, this is an important study for scholars and researchers from opera studies, theatre and performance studies, music history as well as conductors, directors and singers.

*Embracing Bell Beaker* Jos Kleijne.2019 This book investigates how local communities across Europe adopt the Bell Beaker phenomenon during the 3rd millennium BC.

**Parentheticals** Nicole Dehé,Yordanka Kavalova.2007 This volume offers a unique collection of articles investigating the often neglected phenomenon of parentheticals, which are commonly seen as expressions interrupting the linear structure of a host utterance, but lacking a structural relation to it. The book provides an up-to-date introduction to the subject, as well as a range of research articles addressing questions including the syntactic link between parenthetical and frame utterance, the relation between syntactic and prosodic form, the usage and interpretation of parentheticals, and many more. It embraces research findings from different European languages (English, German, Dutch, Romance) and covers an array of forms of syntactic interpolations (from one-word parentheticals to clausal) and a range of methodologies, including empirical research, corpus research, and theoretical analyses. The collection underlines the importance of an interdisciplinary approach to a multi-faceted phenomenon such as parentheticals.

*The Sun Recorded Through History* J.M. Vaquero,M. Vázquez.2009-04-21 The Sun is nowadays observed using different techniques that provide an almost instantaneous 3-D map of its structure. Of particular interest is the studyofthevariabilityinthesolaroutputproducedbythedissipationofm- netic energy on different spatial and temporal scales - the so-called magnetic activity. The 11-year cycle is the main feature describing this phenomenon. Apart from its intrinsic scienti?c interest, this topic is worth studying because of the interaction of such processes with the terrestrial environment. A ?eet of space and ground-based observatories are currently monitoring the behaviour of our star on a daily basis. However, solar activity varies not only on this decadal time-scale, as has been attested mainly through two methods: (a) records of the number of sunspots observed on the solar surface from 1610, and (b) the records of 14 10 cosmogenic isotopes, such as Cand Be, measured in tree-rings and i- cores, respectively. The study of the long-term behaviour of solar activity may be comp- mented by the study of historical accounts describing phenomena directly or indirectly related to solar activity. Numerous scienti?c and non-scienti?c d- uments have reported these events and we can make use of them as a proxy of solar activity in past times.

**Seed Bead Fusion** Rachel Nelson-Smith.2013-02-25 Featuring 18 exciting projects presented with detailed step-by-step photography, color variations, and practical illustrations, this fresh approach to seed bead jewelry teaches crafters how to combine materials, techniques, colors, inspiration, and design ideas for jewelry with a contemporary edge. Inspired by a wide range of sources--from Indian Punjabi folk costumes to Native American beading--the designs in this inventive resource fuse materials such as silver, copper wire, seed beads, Czech glass, and crystals into these traditional arts in order to achieve a unique outcome. All of the basic beadweaving stitches, wirework, and stringing techniques are explained and illustrated.

**The Cambridge History of Atheism** Michael Ruse.2021-09-16 The two-volume Cambridge History of Atheism offers an authoritative and up to date account of a subject of contemporary interest. Comprised of sixty essays by an international team of scholars, this History is comprehensive in scope. The essays are written from a variety of disciplinary perspectives, including religious studies, philosophy, sociology, and classics. Offering a global overview of the subject, from antiquity to the present, the volumes examine the phenomenon of unbelief in the context of Christian, Islamic, Buddhist, Hindu, and Jewish societies. They explore atheism and the early modern Scientific Revolution, as well as the development of Charles Darwin's theory of evolution and its continuing implications. The History also includes general survey essays on the impact of scepticism, agnosticism and atheism, as well as contemporary assessments of thinking. Providing essential information on the nature and history of atheism, The Cambridge History of Atheism will be indispensable for both scholarship and teaching, at all levels.

*Systematics, Evolution, and Biogeography of Compositae* Vicki Ann Funk.2009 This spectacular book does full justice to the Compositae (Asteraceae), the largest and most successful flowering plant family with some 1700 genera and 24,000 species. It is an indispensable reference, providing the most up-to-date hypotheses of phylogenetic relationships in the family based on molecular and morphological characters, along with the corresponding subfamilial and tribal classification. The 2009 work not only integrates the extensive molecular phylogenetic analyses conducted in the last 25 years, but also uses these to produce a metatree for about 900 taxa of Compositae. The book contains 44 chapters, contributed by 80 authors, covering the history, economic importance, character variation, and systematic and phylogenetic diversity of the family. The emphasis of this work is phylogenetic; its chapters provide a detailed, current, and thoroughly documented presentation of the major (and not so major) clades in the family, citing some 2632 references. Like the Compositae, the book is massive, diverse, and fascinating. It is beautifully illustrated, with 170 figures, and an additional 108 cladograms (all consistently color-coded, based on the geographic range of the included taxa); within these figures are displayed 443 color photographs, clearly demonstrating the amazing array of floral and vegetative form expressed by members of the clade. --NHBS Environment Bookstore.

*Recent Advances in Natural Language Processing* Ruslan Mitkov,Nicolas Nicolov.1997-01-01 This volume is based on contributions from the First International Conference on "Recent Advances in Natural Language Processing" (RANLP'95) held in Tzigrich, Bulgaria, 14-16 September 1995. This conference was one of the most important and competitively reviewed conferences in Natural Language Processing (NLP) for 1995 with submissions from more than 30 countries. Of the 48 papers presented at RANLP'95, the best (revised) papers have been selected for this book, in the hope that they reflect the most significant and promising trends (and latest successful results) in NLP. The book is organised thematically and the contributions are grouped according to the traditional topics found in NLP: morphology, syntax, grammars, parsing, semantics, discourse, grammars, generation, machine translation, corpus processing and multimedia. To help the reader find his/her way, the authors have prepared an extensive index which contains major terms used in NLP; an

index of authors which lists the names of the authors and the page numbers of their paper(s); a list of figures; and a list of tables. This book will be of interest to researchers, lecturers and graduate students interested in Natural Language Processing and more specifically to those who work in Computational Linguistics, Corpus Linguistics and Machine Translation.

**The Eastern Question** Daniel Sheldon Hamilton, Stefan Meister. 2016 The future of Europe's east is open. Can the societies of this vast region become more democratic and secure and integrate into the European mainstream? Or are they destined to become failed, fractured lands of grey mired in the stagnation and turbulence historically characteristic of Europe's borderlands? How and why is Russia seeking to influence these developments, and what is the future of Russia itself? How should the West engage?

**Sabine Lippert's Beadwork Evolution** Sabine Lippert. 2014 Sabine Lippert's unique, sophisticated jewelry designs have won her legions of fans worldwide. Now she has created a collection that not only includes 25 gorgeous projects, but also provides breathtaking variations on popular stitches to build beaders' skills. From a Peyote-stitched Crocodile Bracelet to right-angle-woven Marrakech Earrings to the embellished shapes of a Helena Ring, Lippert's savvy techniques take beading to a whole new level!

**Nine Letters on Landscape Painting** Carl Gustav Carus. 2002 Carl Gustav Carus (1789-1869)--court physician to the king of Saxony--was a naturalist, amateur painter, and theoretician of landscape painting whose *Nine Letters on Landscape Painting* is an important document of early German romanticism and an elegant appeal for the integration of art and science. Carus was inspired by and had contacts with the greatest German intellectuals of his day. Carus prefaced his work with a letter from his correspondence with Johann Wolfgang von Goethe, who was his primary mentor in both science and art. His writings also reflect, however, the influence of the German natural philosopher Friedrich Wilhelm Joseph Schelling, especially Schelling's notion of a world soul, and the writings of the naturalist and explorer Alexander von Humboldt. Carus played a role in the revolution in landscape painting taking place in Saxony around Caspar David Friedrich. The first edition appears here in English for the first time.

*Maggie Meister's Classical Elegance* Maggie Meister. 2011 By combining multiple beadweaving stitches, designer Maggie Meister captures patterns and motifs inspired by ancient jewelry, mosaics and architectural elements in 20 sophisticated jewelry designs. Her Oplonti bracelet, for example, references the floral motifs and columns painted in ancient Roman frescos. The Matriarch's Cuff builds on the design of a 17th century Jewish wedding ring; the Sappho Necklace incorporates designs from ancient mosaics; and the Santa Sofia Pendant borrows shapes from the onion-dome churches of Eastern Europe.--From publisher description.

**Twelve Years a Slave** Solomon Northup. 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

**Beadweaving Beyond the Basics** Kassie Shaw. 2015-09-08 Take your beadweaving designs to the next level! Explore an inspired approach to weaving beaded jewelry with *Beadweaving Beyond the Basics*. **Nonstoichiometric Oxides** O.T. Soerensen. 2012-12-02 *Nonstoichiometric Oxides* discusses the thermodynamic and structural studies of nonstoichiometric oxides. This eight-chapter text also covers the defect-defect interactions in these compounds. The introductory chapters describe the thermodynamic properties of nonstoichiometric oxides in terms of defect complexes using the classical thermodynamic principles and from a statistical thermodynamics point of view. These chapters also include statistical thermodynamic models that indicate the ordered nonstoichiometric phase range in these oxides. The subsequent chapters examine the transport properties, such as diffusion and electrical conductivity. Diffusion theories and experimental diffusion coefficients for several systems, as well as the electrical properties of the highly defective ionic and mixed oxide conductor, are specifically tackled in these chapters. The concluding chapters present the pertinent results obtained in nonstoichiometric oxide structural studies using high-resolution electron microscopy and X-ray and neutron diffraction. Inorganic chemists and inorganic chemistry teachers and students will greatly appreciate this book.

**Marcia DeCoster's Beads in Motion** Marcia DeCoster. 2013 Features twenty-four beadwoven jewelry projects that showcase movement from a simple drop that swings from chains to elaborate pieces with intricate components that spin around a core of beads or along a beaded base.

**Running and Clicking** Sabine Schenk. 2013 This series explores a hitherto unidentified type of narrative: Future Narratives. Future Narratives preserve essential aspects of future time, namely its openness and undecidedness. They do this by operating with 'nodes' as their basic unit - situations that allow for more than one continuation. Future Narratives can be found in print, in film, in video games, in scenarios of world climate change, and in other simulations of future trends. Cutting across all media and genre classifications, this burgeoning corpus still lacks a theory and a poetics. This series offers both - and detailed case studies.
