Trench Art Nicholas Saunders.2020-06-15 Trench art is the evocative name given to a dazzling array of objects made from the waste of industrialized war. Each object, whether an engraved shell case, cigarette lighter or a pen made from shrapnel, tells a unique and moving story about its maker. For the first time, this book explores in-depth the history and cultural importance behind these ambiguous art forms. Not only do they symbolize human responses to the atrocities of war, but they also act as mediators between soldiers and civilians, individuals and industrial society, and, most importantly, between the living and the dead. Trench art resonates most obviously with the terror of endless bombardment, night raids, gas attacks and the bestial nature of trench life. It grew in popularity between 1919 and 1939 when the bereaved embarked on battlefield pilgrimages and returned with objects intended to keep alive the memory of loved ones. The term trench art is, however, misleading, as it does not simply refer to materials found in the trenches. It describes a diverse range of objects that have in some way emerged from the experience of war all over the world. Many distinctive objects, for example, were made during conflicts in Bosnia, Vietnam, Northern Ireland and Korea. Surprisingly, trench art predates World War I and it can be made in a number of earlier wars such as the Crimean War, the American Civil War, and the Boer War. Saunders looks at the broader issues of what is meant by trench art, what it was before the trenches and how it fits in with other art movements, as well as the specific materials used in making it. He suggests that it can be seen as a bridge between the nineteenth century certainties and the fragmented industrialized values and ideals of the modern world. This long overdue study offers an original and informative look at one of the most arresting forms of art. Spanning from 1800 to the present day, its analysis of art, human experience, and warfare will pave the way for new research.

Communities and Connections Chris Gosden, Helena Hamerow, Philip de Jersey, Gary Lock.2007-11-08 For almost forty years the study of the Iron Age in Britain has been dominated by Professor Sir Barry Cunliffe. Between the 1960s and 1980s he led a series of large-scale excavations at famous sites including the Roman baths at Bath, Fishbourne Roman palace, and Danebury hillfort which revolutionized our understanding of Iron Age society, and the interaction between this world of 'barbarians' and the classical civilizations of the Mediterranean. His standard text on Iron Age Communities in Britain is in its fourth edition, and he has published groundbreaking volumes of synthesis on *The Ancient Celts* (OUP, 1997) and on the peoples of the Atlantic coast, *Facing the Ocean* (OUP, 2001). This volume brings together papers from more than thirty of Professor Cunliffe's colleagues and students to mark his retirement from the Chair of European Archaeology at the University of Oxford, a post which he has held since 1972. The breadth of the contributions, extending over 800 years and ranging from the Atlantic fringes to the eastern Mediterranean, is testimony to Barry Cunliffe's own extraordinarily wide interests.

A Decade of Social Development in Latin America, 1990-1999 José Antonio Ocampo.2004 The final decade of twentieth century was momentous for Latin America, as it witnessed sweeping changes with regard to previous trends in the region. Most important were the revival of economic growth and the reduction of poverty. Another significant phenomenon was impact of international crises on Latin American countries. This book analyzes what happened between 1990 and 1999 and revisits issues of interest to ECLAC, using the same approach that has characterized the *Social Panorama of Latin America*. Analysis begins with a look at poverty, income distribution, employment, occupational stratification, the role of education, the intergenerational transmission of opportunities for achieving well-being and the contribution of social spending to the improvement of the population's standard of living and at interrelationships between these dimensions and economic

growth. It also uses opinion polls carried out in many of the countries to describe the Latin American population's subjective reactions changes in the 1990s--Publisher's description.

Raymond Queneau's Chêne Et Chien Raymond Queneau,Madeleine Velguth.1995 The French writer Raymond Queneau (1903-1976) is coming to be recognized as one of the major voices in 20th-century literature. Although twelve of his novels have been translated, *Chêne et Chien*, considered by specialists to be the keystone of his oeuvre, has not until now been available in English. Labeled a «novel in verse» by Queneau, this autobiographical poem recounts the poet's childhood, portions of that childhood revisited through psychoanalysis, and finally his joy at finding himself whole. The translator's introduction situates the work in Queneau's life and oeuvre, addresses the problem of poetry as autobiography, examines the structure of the poem itself and discusses the difficulties of translating Queneau's many moods and rich wordplay into English verse. Explanatory notes complete the volume.

The Cambridge Companion to Stravinsky Jonathan Cross.2003-07-24 Stravinsky's work spanned the major part of the twentieth century and engaged with nearly all its principal compositional developments. This Companion reflects the breadth of Stravinsky's achievement and influence in essays by leading international scholars on a wide range of topics. It is divided into three parts dealing with the contexts within which Stravinsky worked (Russian, modernist and compositional), with his key compositions (Russian, neoclassical and serial), and with the reception of his ideas (through performance, analysis and criticism). The volume concludes with an interview with the leading Dutch composer Louis Andriessen and a major re-evaluation of 'Stravinsky and Us' by Richard Taruskin.

Roman Imperial Titulature and Chronology, A.D. 235-284 Michael Peachin.1990 Peachin, M. Roman Imperial Titulature and Chronology, A.D. 235-284. 1989 This study is a basic work of reference for the history of the Roman Empire during the midthird century A.D. The book consists of two principal parts. Part two, upon which the first is based, is a catalogue that lists all known variants of the titulature of each emperor from this period. In turn, each variant is accompanied by a list of all attestations (including coins, inscriptions, papyri) of that formula. An introduction traces briefly the historical development of the official titular formula, and then discusses the method of granting this formula at the beginning of the period in question. The introduction is followed by a chapter that evaluates the source material. Given a secure basic understanding of how the ancient testimonia are to be employed, the book then progresses to a chapter that sets out a complete chronology for the period.SA 29 (1989), 543 p. Equally earthy and prayerful, perennially and universally relevant in their ecological and sacramental vision, the Odes deserve to be celebrated alongside T. S. Eliot's Four Quartets and Rainer Maria Rilke's Duino Elegies.

The Making of the English Working Class E. P. Thompson.2016-03-15 A history of the common people and the Industrial Revolution: "A true masterpiece" and one of the Modern Library's 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England's greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the

nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson's magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain's greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains incredibly relevant to the social and economic issues of current times, with the *Guardian* saying upon the book's fiftieth anniversary that it "continues to delight and inspire new readers."

Museum Culture Daniel J. Sherman.1994 Museums display much more than artifacts; Museum Culture makes us on a tour through the complex of ideas, values and symbols that pervade and shape the practice of exhibiting today. Bringing together a broad range of perspectives from history, art history, critical theory and sociology, the contributors to this new collection argue that museums have become a central institution and metaphor in contemporary society. Discussing exhibition histories and practice in Western Europe, the former Soviet Union, Israel and the United States, the authors explore the ways in which museums assign meaning to art through various kinds of exhibitions and display strategies, examining the political implications of these strategies and the forms of knowledge they invoke and construct. The collection also discusses alternative exhibition forms, the involvement of some museums with the more spectacular practices of mass media culture, and looks at how museums construct their public.
