Terra 2008 Leslie Rainer, Angelyn Bass Rivera, David Gandreau.2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

Trophy Hunting Geoffrey Beattie.2019-10-08 This book explores the psychology of trophy hunting from a critical perspective and considers the reasons why some people engage in the controversial activity of killing often endangered animals for sport. Recent highly charged debate, reaching a peak with the killing of Cecil the lion in 2015, has brought trophy hunting under unprecedented public scrutiny, and yet the psychology of trophy hunting crucially remains under-explored. Considering all related issues from the evolutionary perspective and 'inclusive fitness', to personality and individual factors like narcissism, empathy, and the Duchenne smiles of hunters posing with their prey, Professor Beattie makes connections between a variety of indicators of prestige and dominance, showing how trophy hunting is inherently linked to a desire for status. He argues that we need to identify, analyse and deconstruct the factors that hold the behaviour of trophy hunting in place if we are to understand why it continues, and indeed why it flourishes, in an age of collapsing ecosystems and dwindling species populations. The first book of its kind to examine current research critically to determine whether there really is an evolutionary argument for trophy hunting, and what range of motivations and personality traits may be linked to this activity. This is essential reading for students and academics in psychology, geography, business, environmental studies, animal welfare as well as policy makers and charities in these and related areas. It is of major relevance for anyone who cares about the future of our planet and the species that inhabit it.

Social Control and Justice Maria João Guia,Joanne van der Leun.2013 This book offers a fresh, multi-disciplinary, and international examination of a phenomenon that has altered the landscape of migration in the United States and is now taking root in Canada and throughout Europe: 'crimmigration law.' Crimmigration law consists of the letter and practice of laws and policies at the intersection of criminal law and immigration law. Crimmigration scholars study the creation of laws and policies, their enforcement, as well as the institutional dynamics that create crimmigration law and are created by it. Many have written about the use of crimmigration law to exert social control over groups marginalized by ethnic bias, class, or citizenship status. This book's contents include: Crimmigration, Securitization, and the Criminal Law of the Crimmigrant * A Reflection on Crimmigration in the Netherlands * Entering the Risk Society: A Contested Terrain for Immigration Enforcement * The Changing Landscape of the Criminalization of Migration in Europe * Disappearing Rights: How States Are Eroding Membership in American Society * The Impact of Immigration Enforcement Outsourcing on Ice Priorities * The Spirit of Crimmigration * Crime and Immigration: The Discourses of Fear as a Theoretical Approach of Critical Evaluation * Recorded Crime Committed by Migrant Groups and Native Dutch in the Netherlands * The Foreign-Born in the Canadian Federal Correctional Population * The Impact of Safety on Levels of Ethnocentrism * The Control of Irregular Migrants and the Criminal Law of the Enemy * Crime among Irregular Immigrants and the Influence of Crimmigration Processes * The Wide Scope of Immigration in the Azores and Its Relationship with Crime * Irregular Immigrants and Their Irish Citizen Children: The Limits of National Citizenship * The Treaty of Prum * Unauthorized Migration

Frontiers in Colorado Paleoindian Archaeology Robert H. Brunswig,Bonnie L. Pitblado.2007-11-30 As the Ice Age waned, Clovis hunter-gatherers began to explore and colonize the area now known as Colorado. Their descendents and later Paleoindian migrants spread throughout Colorado's plains and mountains, adapting to diverse landforms and the changing climate. In this new volume, Robert H. Brunswig and Bonnie L. Pitblado assemble experts in archaeology, paleoecology-climatology, and paleofaunal analysis to share new discoveries about these ancient people of Colorado. The editors introduce the research with scientific context. A review of seventy-five years of Paleoindian archaeology in Colorado highlights the foundation on which new work builds, and a survey of Colorado's ancient climates and ecologies helps readers understand Paleoindian settlement patterns. Eight essays discuss archaeological evidence from Plains to high Rocky Mountain sites. The book offers the most thorough analysis to date of Dent--the first Clovis site discovered. Essays on mountain sites show how advances in methodology and technology have allowed scholars to reconstruct settlement patterns and changing lifeways in this challenging environment. Colorado has been home to key moments in human settlement and in the scientific study of our ancient past. Readers interested in the peopling of the New World as well as those passionate about the methods and history of archaeology will find new material and satisfying overviews in this book. Contributors include Rosa Maria Albert, Robert H. Brunswig, Reid A. Bryson, Linda Scott Cummings, James Doerner, Daniel C. Fisher, David L. Fox, Bonnie L. Pitblado, Jeffrey L. Saunders, Todd A. Surovell, R. A. Varney, and Nicole M. Waguespack.

Business to Business Marketing Management Alan Zimmerman,Jim Blythe.2017-09-25 Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships - except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.
