Defense.2012-08-24 AR 420-1 Published 1 June 2018 Army Facilities Engineering Regulation 420-1, Army Facilities Management (24 August 2012) describes the management of public works activities, housing, and other facilities operations and management, military construction program development and execution, master planning, utilities services and energy management, and fire and emergency services. Also, it identifies and synopsis other regulations that provide detailed facilities management policy. This regulation applies to the Active Army, the Army National Guard/Army National Guard of the United States, and the U.S. Army Reserve. This book is a terrific source for sound, cost-effective energy management and investment practices to enhance the DoD's energy security and environmental stewardship. Depending on the military installation location, well-planned energy and water use savings can represent thousands to hundreds-of thousands dollars each year, and many can be achieved with minimal cash outlays. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are

compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a SDVOSB. If you like the service we provide, please leave positive review on Amazon.com.
