Pedagogical Norms for Second and Foreign Language Learning and Teaching Susan M. Gass, Kathleen Bardovi-Harlig, Sally Sioffo Magnan, Joel Walz. 2002-09-03 The concept of Pedagogical Norm is grounded in both sociolinguistic and psycholinguistic principles. Pedagogical norms guide the selection and sequencing of target language features for language teaching and learning. This book both situates and expands on this concept highlighting the interaction of research and pedagogy. The papers collectively illustrate how the concept of pedagogical norm applies to all components of language, including phonology, morphology, syntax, and discourse. The book begins with a discussion of definitions including papers that trace the history of the concept and define what is meant by norms. Also included are papers that apply the concept of pedagogical norms in specific contexts (e.g., intonation, morphology) and to specific languages. Finally, pedagogical norms are extended beyond the more traditional areas of grammatical competence to such disparate areas as listening, discourse, and circumlocution.

Evaluating Second Language Education J. Charles Alderson, Alan Beretta. 1992-02-27 Counter Responsibility for planning language teaching programs now carries with it a strong element of accountability. Evaluation of the whole process of course design, development, and implementation is therefore a necessary area of activity for course designers, language planners, and researchers. This book brings together accounts of recent work in this increasingly important field and will be a valuable resource both for those already engaged in evaluation and for those in training. Part One presents a review of the literature, covering past developments in the wider field of educational evaluation, as well as specifically in second language education. Part Two contains a series of eight original case-studies, written by scholars involved in evaluations in widely divergent settings. The focus in each case is on how the evaluator addresses the difficulties central to each study, and the findings are also included. The final Part Three provides practical guidance for evaluators, offering suggestions about how to set up and carry out evaluations in any given setting.--Publisher's website.

Frida Kahlo: The Paintings Hayden Herrera. 1993-09-03 In small, stunningly rendered self-portraits, Mexican artist Frida Kahlo painted herself cracked open, hemorrhaging during a miscarriage, anesthetized on a hospital gurney, and weeping beside her own extracted heart. Her works are so incendiary in emotion and subject matter that one art critic suggested the walls of an exhibition be covered with asbestos. In this beautiful book, art historian Hayden Herrera brings together numerous paintings and sketches by the amazing Mexican artist, documenting each with explanatory text that probes the influences in Kahlo's life and their meaning for her work. Included among the illustrations are more than eighty full-color paintings, as well as dozens of black-and-white pictures and line illustrations. Among the famous and little-known works included in Frida Kahlo: The Paintings are The Two Fridas, Self-Portrait as a Tehuana, Without Hope, The Dream, The Little Deer, Diego and I, Henry Ford Hospital, My Birth, and My Nurse and I. Here, too, are documentary photographs of Frida Kahlo and her world that help to illuminate the various stages of her life.

Accents of English: Volume 2 John C. Wells.1982-04-08 Accents of English is about the way English is pronounced by different people in different places. Volume 1 provides a synthesizing introduction, which shows how accents vary not only geographically, but also with social class, formality, sex and age; and in volumes 2 and 3 the author examines in greater depth the various accents used by people who speak English as their mother tongue: the accents of the regions of England, Wales, Scotland and Ireland (volume 2), and of the USA, Canada, the West Indies, Australia, New Zealand, South Africa, India, Black Africa and the Far East (volume 3). Each volume can be read independently, and together they form a major scholarly survey, of considerable originality, which not only includes descriptions of hitherto neglected accents, but also examines the implications for phonological theory. Readers will find the answers to many questions: Who makes 'good' rhyme with 'mood'? Which accents have no voiced sibilants? How is a Canadian accent different from an American one, a New Zealand one from an Australian one, a Jamaican one from a Barbadian one? What are the historical reasons for British-American pronunciation differences? What sound changes are currently in progress in New York, in London, in Edinburgh? Dr Wells has written principally for students of linguistics, phonetics and English language, but the motivated general reader will also find the study both fascinating and rewarding.

European Models of Bilingual Education Hugo Baetens Beardsmore.1993 Describes well established, non-experimental forms of bilingual education in publicly funded, non-elitist schools throughout Europe: Welsh in Britain, Catalan and Basque in Spain, heritage language maintenance in Belgium, trilingual education in the entire Luxembourg school system, and others. Focuses on the perspective of the administrator and the teacher. Annotation copyright by Book News, Inc., Portland, OR

Trends in Bilingual Acquisition Jasone Cenoz,Fred Genesee.2001-01-01 The chapters in this volume provide the first comprehensive overview of trends in research on early phonological, lexical, syntactic and pragmatic development in children acquiring two (or more) languages simultaneously. Ongoing as well as emerging issues are examined and discussed by leading researchers in the field. Collectively, these studies extend our knowledge of bilingual acquisition and broaden our understanding of the child's ability to acquire and use language. This volume is of interest to researchers working on language acquisition by monolingual and bilingual children, graduate students of psychology, linguistics and communication sciences, and researchers and professionals concerned with the diagnosis and treatment of bilingual children with language impairment.
