**Managerial Accounting** Ramji Balakrishnan, Konduru Sivaramakrishnan, Geoff Sprinkle. 2008-11-10 Most managerial accounting texts emphasize the mechanics of managerial accounting. While important, mechanics are not enough. To solve business problems, students need to understand how managerial accounting can improve decision-making, and when and where a particular tool or technique is appropriate. Balakrishnan's Managerial Accounting 1st edition presents accounting information in the context of business decision making. It combines the traditional topics of managerial accounting with a strategic framework that shows students how to construct decision models and measure information. By linking business decisions with accounting information students will be motivated to learn and make more informed decisions. Balakrishnan will appeal to courses where there is a true focus on decision making and accounting is placed within a business context.

**Budgeting and Governing** Aaron B. Wildavsky. Aaron Wildavsky's greatest concern, as expressed in his writings, is how people manage to live together. This concern may at first appear to have little to do with the study of budgeting, but for Wildavsky budgeting made living together possible. Indeed, as he argues here, if you cannot budget, you cannot govern. Budgeting and Governing gathers in one place a mass of material that otherwise would be lost in a wilderness of journals and edited volumes. With few exceptions, Wildavsky chose the articles in this collection. They are organized largely chronologically so that the reader can trace the progression of his thought which moved from studies of the American federal government, through comparative work, and on to placing budgeting within a broader theory of political culture. Wildavsky wrote about budgeting because in his words, when a process involves power, authority, culture, consensus, and conflict, it captures a great deal of national political life. Wildavsky was interested in budgeting because of what it could tell us about the classic questions of politics: who gets what, how, and why? His earlier analyses focus narrowly on budgeting personnel and agency actors in answering these questions, while in his later work the contending actors become sub-cultural types. To Wildavsky politics was about finding terms for living together in spite of ideological differences. Budgetary incrementalism helped to manage this otherwise unmanageable task. He thought synoptic budgeting and all related reforms would increase disagreement and raise the stakes, and so were unwise. Analysis had to serve politics, not try to displace it. Aaron Wildavsky is considered one of the most innovative and prolific scholars in the field of political research in our time. He was the author most recently of *Culture and Social Theory* and *Federalism and Political Culture*, as well as *Dilemmas of Presidential Leadership* (with Richard Ellis), *The Beleaguered Presidency*, and *Craftways: On the Organization of Scholarly Work*, all available from Transaction. Brendon Swedlow is a visiting professor in the political science department at the University of California, Los Angeles. Joseph White is an associate professor in the Department of Health Systems Management at Tulane University Medical Center. ...this collection of essays is to show the development of the late Wildavsky's ideas on budgeting from the beginning of his career to the end....Recommended for research libraries and graduate students in public administration.-Choice Brendon Swedlow and Transaction Press have rendered policy scholars, budget specialists, and public managers a tremendous service by pulling together this posthumous collection of Aaron Wildavsky's writings on the vital, it often politically tense, relationship between budgeting and governing.--*Journal of Policy Analysis and Management*

**Effective Budgeting for Businesses Today** Dominic Shum.2019-02-11 Having been in industry for more than twenty-eight years and being involved in business planning and budgeting during that period, I have been conducting training and facilitating EMBA classes on similar topics. In such sessions, I often encourage participants and students to ask questions as I have considerable experiences in budgeting for them to pick my brains on. However, in most cases, the time allocated for such seminars or lectures are limited, and participants and students have asked questions regarding my experiences in the topic beyond the contact hours stipulated while others have requested for more literature on the subject. It is with this background that I find motivation to write this book to fulfil the participants' demand for more information and to reach out to a wider audience on the topic of budgeting. This book is thus drawn upon my own experiences as a professional in the field and feedback given by my many participants and students who attended by seminars or classes. It is my hope that this book can provide clarity on the topic and is easily assimilated by all who does budgeting or is studying how to do it. Happy reading and profiting from it.
