The Making of Feudal Agricultures? Miquel Barceló,François Sigaut.2004-02-01 The Register of Laws of the Arabian Gulf offers a single, comprehensive source of key information in the field. No similar work exists in the English language. Drawing on original Arabic sources - invariably very difficult to find either individually or in series - this major loose-leaf work provides a complete database of all laws and regulations originating in each country of the Arabian Gulf.

Starting Strong Early Childhood Education and Care OECD.2001-05-28 Taking a broader and more holistic approach to early childhood than previous studies, this book provides a comparative analysis of major policy developments and issues in 12 OECD countries, highlights innovative approaches, and proposes policy options that can be adapted to varied country contexts.

Megaprojects and Risk Bent Flyvbjerg,Nils Bruzelius,Werner Rothengatter.2003-02-13 Megaprojects and Risk provides the first detailed examination of the phenomenon of megaprojects. It is a fascinating account of how the promoters of multi-billion dollar megaprojects systematically and self-servingly misinform parliaments, the public and the media in order to get projects approved and built. It shows, in unusual depth, how the formula for approval is an unhealthy cocktail of underestimated costs, overestimated revenues, undervalued environmental impacts and overvalued economic development effects. This results in projects that are extremely risky, but where the risk is concealed from MPs, taxpayers and investors. The authors not only explore the problems but also suggest practical solutions drawing on theory, experience and hard, scientific evidence from the several hundred projects in twenty nations and five continents that illustrate the book. Accessibly written, it will be the standard reference for students, scholars, planners, economists, auditors, politicians and interested citizens for many years to come.

The Pariahs of Yesterday Leslie Page Moch.2012-03-30 This work looks at the surge of Bretons who left their homes in Western France in the latter half of the 19th century to live and work in Paris. Portrayed as backward, ignorant peasants they found no welcome until after WWII. Moch positions her work within immigration theory, connecting migration studies to theories about state projects of assimilation and about cultures of inclusion and exclusion.

Fair Shares for All Jean-Pierre Gross.2003-11-13 This study explores the egalitarian policies pursued in the provinces during the radical phase of the French Revolution, but moves away from the habit of looking at such issues in terms of the Terror alone. It challenges revisionist readings of Jacobinism that dwell on its totalitarian potential or portray it as dangerously utopian. The mainstream Jacobin agenda emphasised 'fair shares' and equal opportunities for all in a private ownership market economy. It sought to achieve social justice without jeopardising human rights and tended thus to complement, rather than undermine, the liberal, individualist programme of the Revolution. The book stresses the relevance of the 'Enlightenment legacy', the close affinity between Girondins and Montagnards, the key role played by many lesser-known figures and the moral ascendancy of Robespierre. It reassesses the basic social and economic issues at stake in the Revolution, which cannot be understood solely in terms of political discourse.

Economic Analysis of High Speed Rail in Europe .2012-07-02 Este informe pretende contribuir al análisis económico de los proyectos de inversión en alta velocidad ferroviaria. La evaluación económica de proyectos puede ayudar a los gobiernos a formarse una idea más precisa sobre los beneficios esperados de distintas líneas de actuación que absorben dinero público para resolver un mismo problema de transporte. En este informe se trata de determinar las circunstancias en las que la inversión en alta velocidad es socialmente deseable y en que otras la sociedad gana posponiendo la inversión. La red de alta velocidad puede construirse gradualmente, añadiendo nuevas líneas una vez que la evaluación económica muestra una rentabilidad social positiva.

Women and Power at the French Court, 1483-1563 Susan Broomhall.2018 Women and Power at the French Court, 1483--1563 explores the ways in which a range of women as consorts, regents, mistresses, factional power players, attendants at court, or as objects of courtly patronage wielded power in order to advance individual, familial, and factional agendas at the early sixteenth-century French court. Spring-boarding from the burgeoning scholarship of gender, the political, and power in early modern Europe, the collection provides a perspective from the French court, from the reigns of Charles VIII to Henri II, a time when the French court was a renowned center of culture and at which women played important roles. Crossdisciplinary in its perspectives, these essays by historians, art and literary scholars investigate the dynamic operations of gendered power in political acts, recognized status as queens and regents, ritualized behaviors such as gift-giving, educational coteries, and through social networking, literary and artistic patronage, female authorship, and epistolary strategies.

The Intangible Elements of Culture in Ethnoarchaeological Research Stefano Biagetti,Francesca Lugli.2016-06-02 This volume focuses on the intangible elements of human cultures, whose relevance in the study of archaeology has often been claimed but rarely practiced. In this book, the authors successfully show how the adoption of ethnoarchaeological perspectives on non-material aspects of cultures can support the development of methodologies aimed at refining the archaeological interpretation of ancient items, technologies, rituals, settlements and even landscape. The volume includes a series of new approaches that can foster the dialogue between archaeology and anthropology in the domain of the intangible knowledge of rural and urban communities. The role of ethnoarchaeology in the study of the intangible heritage is so far largely underexplored, and there is a considerable lack of ethnoarchaeological studies explicitly focused on the less tangible evidence of present and past societies. Fresh case studies will revitalize the theoretical debate around ethnoarchaeology and its applicability in the archaeological and heritage research in the new millennium. Over the past decade, 'intangible' has become a key word in anthropological research and in heritage management. Archaeological theories and methods regarding the explorations of the meaning and the significance of artifacts, resources, and settlement patterns are increasingly focusing on non-material evidence. Due to its peculiar characteristics, ethnoarchaeology can effectively foster the development of the study of the intangible cultural heritage of living societies, and highlight its relevance to the study of those of the past.

Community Quality-of-Life Indicators M. Joseph Sirgy, Don Rahtz, Dong-Jin Lee. 2004-05-31 This book is a compilation of cases of best work in community indicators research. The cases describe communities that have launched their own community indicators programs. Elements that are included in the descriptions are the history of the community indicators work within the target region, the planning of community indicators, the actual indicators that were selected, the data collection process, the reporting of the results, and the use of the indicators to guide community development decisions and public policy. Community planners, community indicators researchers and urban planning specialists will find this book very helpful in learning from communities that have done community indicators work and have done it well.

Politics, Culture, and Class in the French Revolution Lynn Hunt. 2004-05-28 Publisher Description

Louis XIV and Absolution Ragnhild Marie Hatton. 1976-01-01

The Coming of the French Revolution Georges Lefebvre. 2019-12-31 The Coming of the French Revolution remains essential reading for anyone interested in the origins of this great turning point in the formation of the modern world. First published in 1939, on the eve of the Second World War, and suppressed by the Vichy government, this classic work explains what happened in France in 1789, the first year of the French Revolution. Georges Lefebvre wrote history from below—a Marxist approach. Here, he places the peasantry at the center of his analysis, emphasizing the class struggles in France and the significant role they played in the coming of the revolution. Eloquent translated by the historian R. R. Palmer and featuring an introduction by Timothy Tackett that provides a concise intellectual biography of Lefebvre and a critical appraisal of the book, this Princeton Classics edition continues to offer fresh insights into democracy, dictatorship, and insurrection.

The Palgrave Handbook of Wine Industry Economics Adeline Alonso Ugaglia, Jean-Marie Cardebat, Alessandro Corsi. 2019-03-15 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

Qui est qui en France . 2010

The French Revolution and the Birth of Modernity Ferenc Fehér. 2023-11-10 Written from widely different perspectives, these essays characterize the Great Revolution as the dawn of the modern age, the grand narrative of modernity. The scope of issues under scrutiny is extremely broad, ranging from the analyses of the hotly debated class character of 1789 and the problem of the nation state to the “Cult of the Supreme Being,” the emancipation of the Jews, and the cultural heritage of the Revolution. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1990.

Queens in Stone and Silver K. Nolan. 2009-08-11 The first study to juxtapose medieval effigy tombs and personal seals, the two forms of cultural patronage through which royal women crafted a visual imagery for queenship in twelfth- and early thirteenth-century France.

Les salaires dans l'industrie, le commerce et les services en 1998 Institut national de la statistique et des études économiques (France).. 2000

A History of the French in London Debra Kelly, Martyn Cornick. 2013 This book examines, for the first time, the history of the social, cultural, political and economic presence of the French in London, and explores the multiple ways in which this presence has contributed to the life of the city. The capital has often provided a place of refuge, from the Huguenots in the 17th century, through the period of the French Revolution, to various exile communities during the 19th century, and on to the Free French in the Second World War. It also considers the generation of French citizens who settled in post-war London, and goes on to provide insights into the contemporary French presence by assessing the motives and lives of French people seeking new opportunities in the late 20th and early 21st centuries. It analyses the impact that the French have had historically, and continue to have, on London life in the arts, gastronomy, business, industry and education, manifest in diverse places and institutions from the religious to the political via the educational, to the commercial and creative industries.

Lithic Technological Organization and Paleoenvironmental Change Erick Robinson, Frédéric Sellet. 2017-11-06 The objective of this edited volume is to bring together a diverse set of analyses to document how small-scale societies responded to paleoenvironmental change based on the evidence of their lithic technologies. The contributions bring together an international forum for interpreting changes in technological organization - embracing a wide range of time periods, geographic regions and methodological approaches. As technology brings more refined information on ancient climates, the research on spatial and temporal variability of paleoenvironmental changes. In turn, this has also broadened considerations of the many ways that prehistoric hunter-gatherers may have responded to fluctuations in resource bases. From an archaeological perspective, stone tools and their associated debitage provide clues to understanding these past choices and decisions, and help to further the investigation into how variable human responses may have been. Despite significant advances in the theory and methodology of lithic technological analysis, there have been few attempts to link these developments to paleoenvironmental research on a global scale.

Guide to Microforms in Print . 1982

The Path Not Taken Jeff Horn.2008-08-29 In The Path Not Taken, Jeff Horn argues that—contrary to standard, Anglocentric accounts—French industrialization was not a failed imitation of the laissez-faire British model but the product of a distinctive industrial policy that led, over the long term, to prosperity comparable to Britain's. Despite the upheavals of the Revolution and the Napoleonic Wars, France developed and maintained its own industrial strengths. France was then able to take full advantage of the new technologies and industries that emerged in the second industrial revolution, and by the end of the nineteenth century some of France's industries were outperforming Britain's handily. The Path Not Taken shows that the foundations of this success were laid during the first industrial revolution. Horn posits that the French state's early attempt to emulate Britain's style of industrial development foundered because of revolutionary politics. The threat from below made it impossible for the state or entrepreneurs to control and exploit laborers in the British manner. The French used different means to manage labor unruliness and encourage innovation and entrepreneurialism. Technology is at the heart of Horn's analysis, and he shows that France, unlike England, often preferred still-profitable older methods of production in order to maintain employment and forestall revolution. Horn examines the institutional framework established by Napoleon's most important Minister of the Interior, Jean-Antoine Chaptal. He focuses on textiles, chemicals, and steel, looks at how these new institutions created a new industrial environment. Horn's illuminating comparison of French and British industrialization should stir debate among historians, economists, and political scientists.

If you ally dependence such a referred **Le Guide A C Conomique Nord Pas De Calais Picardi** books that will have the funds for you worth, get the agreed best seller from us currently from several preferred authors.
