Latin American Constitutions M. C. Mirow.2015-09-15 Latin American Constitutions provides a comprehensive historical study of constitutionalism in Latin America from the independence period to the present, focusing on the Constitution of Cádiz, a foundational document in Latin American constitutionalism. Although drafted in Spain, it was applied in many regions of Latin America, and deputies from America formed a significant part of the drafting body. The politicization of constitutionalism reflected in Latin America's first moments proved to be a lasting legacy evident in the legal and constitutional world of the region today: many of Latin America's present challenges to establishing effective constitutionalism can be traced to the debates, ideas, structures, and assumptions of this text. This book explores the region's attempts to create effective constitutional texts and regimes in light of an established practice of linking constitutions to political goals and places important constitutional thinkers and regional constitutions, such as the Mexican Constitution of 1917, into their legal and historical context.

promulgación de la Constitución española de 1978 implicó la culminación de la llamada Transición Española, que tuvo lugar como consecuencia de la muerte, el 20 de noviembre de 1975, del anterior jefe del Estado, el general Francisco Franco, precipitando una serie de acontecimientos políticos e históricos que transformaron el anterior régimen franquista en un Estado Social y Democrático de Derecho, bajo la forma política de Monarquía Parlamentaria. La Constitución española de 1978 permanece vigente. En ella se establece el sufragio universal, la libertad religiosa y de expresión.
