Homeless Children Panos Vostanis, Stuart Cumella. 1999-01-01 An increasing number of families are becoming homeless, often as a result of domestic violence, which leaves women and their school age children without homes. This multidisciplinary volume is the first to look at the variety of problems encountered by this group and to propose strategies for managing those problems. The

contributors to this book provide evidence that homeless children often have more acute problems and needs than other children; as a result of the insecurity of their situation, they may experience physical health problems and developmental delay. They are also at high risk of emotional and behavioural difficulties such as sleep disturbance, eating problems, aggression, over-activity, anxiety, depression and self-harm. At the same time, due to their unstable situation, they are less able to access support from the health, education and social services. Homeless Children defines the specific problems and needs of homeless children, and draws up practical guidelines for staff and agencies on recognising and dealing with those problems. It then looks at policy and service development for homeless families in education, health and social care, and concludes that conventional methods of provision have to be adapted to meet the specific needs of this vulnerable group.

Territorial Cohesion in Rural Europe Andrew K. Copus, Philomena de Lima. 2014-08-13 This book reflects on how the economies, social characteristics, ways of life and global relationships of rural areas of Europe have changed in recent years. This reveals a need to refresh the concepts we use to understand, measure and describe rural communities and their development potential. This book argues that Europe has 'outgrown' many of the stereotypes usually associated with it, with substantial implications for European Rural Policy. Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy. Demographic change, migration, business networks and agricultural restructuring are each explored in greater detail. Implications for equality and social exclusion, and recent developments in the field of governance are also considered. Despite being a subject of active debate, interventions in the fields of rural and regional development have failed to adapt to changing realities and have become

increasingly polarized. This book argues that rural/regional policy needs to evolve in order to address the current complex reality, partially reformulating territorial or place-based approaches, and the New Rural Paradigm, following a set of principles termed 'Rural Cohesion Policy'.

Education and Climate Change Fumiyo Kagawa, David Selby. 2010-04-15 There is widespread consensus in the international scientific community that climate change is happening and that abrupt and irreversible impacts are already set in motion. What part does education have to play in helping alleviate rampant climate change and in mitigating its worst effects? In this volume, contributors review and reflect upon social learning from and within their fields of educational expertise in response to the concerns over climate change. They address the contributions the field is currently making to help preempt and mitigate the environmental and social impacts of climate change, as well as how it will continue to respond to the ever changing climate situation. With a special foreword by Desmond Tutu, Archbishop Emeritus of Cape Town.

New World Soundings Richard M. Morse. 2020-02-03 Originally published in 1989. In *New World Soundings*, cultural historian Richard Morse takes a series of sharply focused looks at the Americas. He inquires into the ways in which speech and poetry evoke the common historical experience of North and South America and examines the transatlantic sea changes of European languages. He uses political ideology to contrast the traditions of Anglo and Latin America, while surveying

contemporary pressures for ideological change. In the book's final sections, he addresses the North-South transaction from yet three more angles, ruminating on the problems involved in conveying the Latin American experience to U.S. students, considering the impediments to U.S.-Puerto Rican understanding, and recounting the mythic adventures of McLuhanaima, the world's first Brazilianist, as he travels through the exotic land he has chosen for definitive research.

João Freitas. 2009-10-28 The papers included in the volume *Phonetics and Phonology: Interactions and interrelations* are concerned with some of the multiple possible forms of interactions and interrelations in phonetics and phonology: the phonetic and/or phonological nature of speech patterns, segmental and prosodic interactions, and interactions between segments and features, both in child and in adult language, combining perception and production data, and doing so from theoretically as well as experimentally oriented perspectives. Sustainability Frontiers David Selby, Fumiyo Kagawa. 2014-12-15 Education for sustainable development, the educational offshoot of the concept of 'sustainable development', has rapidly become the predominant educational response to the global environmental crisis. The authors apply a critical lens to the field and find it wanting in many regards. *Sustainability Frontiers* is an international, academic non-governmental organization based in Canada and the United Kingdom. It engages in research and innovation in the broad fields of sustainability and global education

challenging dominant assumptions and current orthodoxies as it seeks to foster learner empowerment and action. It places particular emphasis on climate change, disaster risk reduction and peacebuilding and their implications for the nature and directions of sustainability education. *The profile of a man of God* Edir Macedo.2018-07-17 God needs people who are filled with the Holy Spirit, who are worried about their own will or future, and who have adopted the character of the Lord Jesus. These people need to think like He thinks, speak like He speaks, behave like He behaves, and feel like He feels. These people must embrace their faith in the Lord Jesus in order to be tools in God's hands and reveal His character to the world. The Lord Jesus said that many are called but few are chosen. But who is chosen. But who is chosen? How are they identified? Why were anointed men of the past different from men today? In *The Profile of a Man of God*, Bishop Macedo tries to answer these and many other questions based on what he has seen in the Work of God and, above all, in His Word.

Smart Development for Rural Areas André Torre,Stefano Corsi,Michael Steiner,Frédéric Wallet,Hans Westlund.2020-10-11 This thought-provoking book questions the framework of the

Horizon 2020 strategy and the policies of smart development. It aims to answer the following question: Is there any possibility for a policy of smart development and smart specialization in rural and peri-urban areas? Based on detailed analytical studies, empirical and econometric methods, as well as various European case studies, several conclusions are drawn. Smart development policies are well adapted to the developed or intermediate regions containing at the same time rural and urban areas, but do not really function for the more rural or more peripheral regions. The development policies of rural areas must be adapted to their particular characteristics, to the structure of their economies (agriculture, small firms), as well as in their diversity (distant regions, intermediate regions, rural areas near the urban areas). It appears interesting to exploit natural and cultural amenities, to develop the multifunctional character of the agriculture, to promote territorial innovation under all its forms, to favor the synergies between the various uses of land and space, and to develop the knowledge on the ecological, socioeconomic processes, as well as on the mechanisms of territorial governance. These results are very important because they question the validity of the H2020 policy and the smart development and smart specialization policies and their applicability to the whole European area, and not only for the most urban and rich areas. It will be valuable reading for students, researchers and policy-makers in regional development, rural studies, spatial planning and economic geography.

Campos de Concentração Revista Conhecer Fantástico, Conhecer

Fantástico, Curiosidades, História, On Line Editora. Ao contrário do que a maioria pensa, os campos de concentração e de trabalho forçado não foram invenção da mente doentia de Adolf Hitler. Muito antes do advento do Terceiro Reich, pessoas ficavam confinadas em campo na Rússia, ainda no século 18, sob o comando do czar Nicolau II. E a “fórmula” foi copiada por diversas nações, sempre com o intuito de controlar ou eliminar os oponentes do regime governamental. A mesma Rússia, então sob o comando de Lênin e depois Stalin, manteve campos (os chamados Gulag) para aprisionar quem era contrário à Revolução. Além dos soviéticos, governos do Reino Unido, dos EUA, do Japão, das Coreias do Sul e do Norte, da China, do Chile e até do Brasil lançaram mão deste “recurso”. No Brasil, estes campos funcionaram durante a Segunda Guerra Mundial e serviam para aprisionar os chamados “súditos do Eixo”. Surpreendentemente, houve mais de uma dezena de instalações desse

tipo em território nacional. O assunto ainda é pouco divulgado, mas, graças aos trabalhos de estudiosos como Priscila Perazzo e Camões Filho, ele está sendo esmiuçado, analisado e apresentado ao público em obras literárias primorosas. Agora, se você pensa que campos de concentração e de trabalhos forçados são coisas do passado, saiba que, atualmente, na China, conforme relato de Harry Wu, diretor da Laogai Research Foundation e ex-detento do Laogai, muitos presos são mantidos em campos dentro do sistema de repressão chinês. Então, nada mais pertinente do que informar-se sobre este assunto tão importante. Nesta edição de Conhecer Fantástico, você vai conferir diversos detalhes do tema, que, sem dúvida, é extremamente vasto e interessante.

The Brazilian Sound Chris McGowan, Ricardo Pessanha. 1998 At the second International Song Festival in 1967, Milton Nascimento had three songs accepted for competition. He had no intention of performing them--he hated the idea of intense competition. In fact, Nascimento might never have appeared at all if Eumir Deodato hadn't threatened not to write the arrangements for his songs if he didn't perform at least two of them. Nascimento went on to win the festival's best performer award, all three of his songs were included soon afterward on his first album, and the rest is history. This is only one anecdote from *The Brazilian Sound*, an encyclopedic survey of Brazilian popular music that ranges over samba, bossa nova, MPB, jazz and instrumental music and tropical rock, as well as the music of the Northeast. The authors have interviewed a wide variety of performers like Nascimento, Gilberto Gil, Carlinhos Brown, and Airto Moreira, U.S. fans, like Lyle Mays, George Duke, and Paul Winter, executive André Midani; and music historian Zuza Homem de Mello, just to name a few. First published in 1991, *The Brazilian Sound* received enthusiastic attention both in the United States and abroad. For this new edition, the authors have expanded their examination of the historical roots of Brazilian music, added new photographs, amplified their discussion of social issues like racism, updated the maps, and added a new final chapter highlighting the most recent trends in Brazilian music. The authors have expanded their coverage of the axé music movement and included profiles of significant emerging artists like Marisa Monte, Chico Cesar, and Daniela Mercury. Clearly written and lavishly illustrated with 167 photographs, *The Brazilian Sound* is packed with facts, explanations, and fascinating stories. For the Latin music aficionado or the novice who wants to learn more, the book also provides a glossary, a bibliography, and an extensive discography containing 1,000 entries. Author note: Chris McGowan was a contributing writer and

columnist for Billboard from 1984 to 1996 and pioneered that publication's coverage of Brazilian and world music in the mid-1980s. He has written about the arts and other subjects for Musician, The Beat, the Hollywood Reporter, the Los Angeles Times, L. A Weekly, and the Los Angeles Reader. He is the author of Entertainment in the Cyber Zone: Exploring the Interactive Universe of Multimedia (1995) and was a contributor to The Encyclopedia of Latin American History and Culture (1996). Ricardo Pessanha has worked as a teacher, writer, editor, and management executive for CCAA, one of Brazil's leading institutes of English-language education. He has served as a consultant to foreign journalists and scholars on numerous cultural projects relating to Brazil. He has contributed articles about Brazilian music to The Beat and other publications.

Blyde, Danielle Trachtenberg, Jorge Cornick, Jeffry Frieden, Marisol Rodríguez Chatruc, Rzavan Vlaicu, Víctor Zuluaga, Tomás Bril-Mascarenhas, Sergio Ardila, Piero Ghezzi, Thomas Reardon. 2019-09-23 Thirty years after the region embarked on large-scale liberalization, trade policy could have been expected to become all but irrelevant. Instead, a mismatch between expectations and what could realistically be delivered set the stage for much of the disappointment, skepticism, and fatigue regarding trade policy in the region, particularly in the early 2000s. By setting the bar unrealistically high, governments and analysts made trade policies an easy target for special interests that were hurt by liberalization and for those ideologically opposed to free trade. The most immediate victims were the more tangible growth and welfare gains, whose relevance was lost amid the noise of grandiose visions.

Ideas to Postpone the End of the World Ailton Krenak.2020-10-06 “Ailton Krenak’s ideas inspire, washing over you with every truth-telling sentence. Read this book.” — Tanya Talaga, bestselling author of *Seven Fallen Feathers* Indigenous peoples have faced the end of the world before. Now, humankind is on a collective march towards the abyss. Global pandemics, extreme weather, and massive wildfires define this era many now call the Anthropocene. From Brazil comes Ailton Krenak, renowned Indigenous activist and leader, who demonstrates that our current environmental crisis is rooted in society’s flawed concept of “humanity” — that human beings are superior to other forms of nature and are justified in exploiting it as we please. To stop environmental disaster, Krenak argues that we must reject the homogenizing effect of this perspective and embrace a new form of “dreaming” that allows us to regain our place within nature. In *Ideas to Postpone the End of the World*, he shows us the way.

Projetos Escolares - Ensino Fundamental Projetos Escolares, Ensino Fundamental, Educação, On Line Editora. 2018-05-20 Mesmo sem querer, o ser humano tem uma tendência quase que instintiva de classificar as situações de acordo com o senso-comum. Não pretendo, aqui, generalizar, mas você há de concordar comigo que, às vezes, é mais fácil atribuir algum problema ao acaso, a uma falha coletiva ou, então, à conspiração do Cosmos, do que tentar solucioná-lo. Um exemplo disso? É só pensar quantas vezes você já presenciou, na escola em que leciona ou até mesmo no seu círculo pessoal, alguém falando que as crianças de hoje não querem aprender ou, então, que não se interessam pelos estudos. Particularmente, acredito que as pessoas que repetem este discurso esquecem de verificar a maneira como os alunos a que se referem são ensinados, estimulados ou cativados, seja no ambiente escolar ou em casa. Afinal, convenhamos: é rara a criança que adora decorar fórmulas matemáticas sem ao menos saber como elas surgiram ou, então, conhecer o nome científico de árvores e animais que nunca viram pessoalmente ou por fotos. Pela percepção deste problema, o que muitos educadores já sabem é que as disciplinas precisam ser cada vez mais paupáveis e devem estar relacionadas à vida de seus alunos. Nesse processo, o ensino através do lúdico tem papel garantido. Para se assegurar disso, faça uma pesquisa com a sua classe: pergunte se os alunos preferem utilizar um jogo de tabuleiro para aprender, por exemplo, a lidar com valores monetários ou se desejam fazer exercícios em que precisem empregar as contas matemáticas por si

só. Com certeza, a escolha será pela primeira opção. Isso porque as crianças precisam ser estimuladas a gostar de aprender, e não ter essa tarefa como algo obrigatório e imposto pelos pais e professores. Para isso, atualmente, existem recursos, bibliografias e iniciativas que servem de exemplo aos educadores que desejam inovar as práticas pedagógicas. Uma delas, com certeza, é o projeto “Dr. Escargot”, que pode ser visto nesta edição e mostra como animais pouco presentes no nosso cotidiano trabalham a socialização, a expressão oral, a cidadania e a eliminação de preconceitos, por exemplo. Idéias como esta são marcos para que a educação torne-se cada vez mais participativa e inclusiva. Que tal você dar a sua contribuição também?
