Creativity in Product Innovation Jacob Goldenberg,David Mazursky.2002-01-03 Creativity in Product Innovation describes a remarkable new technique for improving the creativity process in product design. Certain regularities in product development are identifiable, objectively verifiable and consistent for almost any kind of product. These regularities are described by the authors as Creativity Templates. This book describes the theory and implementation of these templates, showing how they can be used to enhance the creative process and thus enable people to be more productive and focused. Representing the culmination of years of research on the topic of creativity in marketing, the Creativity Templates approach has been recognized as a breakthrough in such journals as Science, Journal of Marketing Research, Management Science, and Technological Forecasting and Social Change.

Hope, Make, Heal Maya Pagan Donenfeld.2015-12-29 A welcome companion to anyone suffering a great loss—20 inspiring craft projects to help work through grief, from the author of Reinvention. For anyone seeking renewal and restoration during life's transitions and after deep loss, Hope, Make, Heal offers a unique approach to healing: using one's hands to mend the heart. The twenty craft projects provide ways to make tangible objects that signify the qualities one seeks on a healing path: strength, calm, release, and hope. Full of gentle encouragement, each project is easy to make and suitable for those times when our minds are preoccupied and our spirits are low. Grief and pain are universal experiences that touch everyone at one time or another. When we grieve, most of us reach for the steady hand of loved ones. But even if we're blessed with an understanding community, a deep sense of isolation comes with tragedy. No one else stands in our shoes. Rarely is there another person who can understand just what it means to be you. For maker and artist Maya Donenfeld, when faced with the trauma of a sudden and unexpected ending to her marriage of sixteen years, she yearned to find something that would allow her to focus and channel her powerful flood of emotions into something she could see and touch. Knowing that busy hands can profoundly nurture the heart and quiet the mind, she began making things to wear, carry, touch, and gaze upon—beautiful and expressive objects that were simple, intentional, and most of all, meaningful. The result is the collection of projects here. This book offers a unique approach to mending wounds with inspiring projects that integrate hand, heart, and mind with thread, ink, and more. The projects encourage renewal and restoration during life's transitions and after deep loss. Each one offers comfort and support and is designed to have a personal impact on the maker and those around them. It's a resource for personal healing and a gift for your friend in need.

The Roman Rite in the Algonquian and Iroquoian Missions Claudio R. Salvucci.2008 Representing the first general treatment of the Indian Mass of the North American Catholic missions, this volume draws on historical descriptions as well as rare missionary manuscripts and publications to trace the development of the distinctive American Indian liturgies from the early hymn singing of the mid-1600s to the adaptation of vernacular plainchant and polyphony. Weaving together extensive primary source quotations, Salvucci overturns popular misconceptions of missionaries as cultural imperialists, showing instead how native congregations and scholarly priests worked together in adapting the rich traditions of Counter-Reformation Roman Catholicism to the linguistic and cultural needs of the New World.

Flatness B. W. Higman.2017-06-15 There are few truths about the modern world that are more self-evident than this: it is flat. We write on flat paper laid atop flat desks. We look at flat images on flat screens mounted on flat walls, or we press flat icons on flat phones while we navigate flat streets. Everywhere we go it seems the structures around us at one time or another had a level placed upon them to ensure they were perfectly flat. Yet such engineered planar surfaces have become so pervasive and fundamental to our lives that we barely notice their existence. In this highly original study, B. W. Higman employs a wide variety of approaches to better understand flatness, that level platform upon which the dramas of modern life have played out. Higman looks at the ways that humans have perceived the natural world around them, moving from Flat Earth theories to abstract geometric concepts to the flatness problem of modern cosmology. Along the way he shows that we have simultaneously sought flatness in our everyday lives and also disparaged it as a featureless, empty, and monotonous quality. He discusses the ways flatness figures as a metaphor for those things or people who are boring, dull, or lacking energy or inspiration, and he shows how the construction of flat surfaces has contributed to a degradation of visual diversity. At the same time, he also shows how we have pursued flatness as an engineering ideal and how we have used it conceptually in art, music, and literature. Written with wit and wisdom, and splendidly illustrated throughout, this book will appeal to all those who are interested in the topography of the modern world, to anyone who has ever marveled at the feel of its smooth surfaces or felt oppressed by the tyranny of its featurelessness.

DIY Programming and Book Displays Amanda Catherine Struckmeyer, Svetha Hetzler. 2010-09-13 This manual guides librarians in creating simple, affordable, ready-to-use activities for children, tweens, teens, and families, with enough material for a full year of programs. Do-it-yourself programming is an emerging model in which the librarian does the preparation, then lets patrons take over. *DIY Programming and Book Displays: How to Stretch Your Programming without Stretching Your Budget and Staff* makes it easy for librarians to institute such programs in their own facilities. Organized around 12 thematic chapters, the book explains how to set up and maintain a do-it-yourself station and offers instructions for a variety of year activities. Reproducible materials and booklists are included as well. Librarians may use the activities as starting points for generating their own ideas or they may simply photocopy materials in the book for ready-to-use, monthly DIY programming. Once set up, the DIY station is available to patrons anytime they are in the library. Best of all, because DIY programs do not rely on staff, space, or special materials, they allow libraries to make the most of their resources without sacrificing patron service.
