English Learners in STEM Subjects National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Board on Science Education, Committee on Supporting English Learners in STEM Subjects.2019-01-28 The imperative that all students, including English learners (ELs), achieve high academic standards and have opportunities to participate in science, technology, engineering, and mathematics (STEM) learning has become even more urgent and complex given shifts in science and mathematics standards. As a group, these students are underrepresented in STEM fields in college and in the workforce at a time when the demand for workers and professionals in STEM fields is unmet and increasing. However, English learners bring a wealth of resources to STEM learning, including knowledge and interest in STEM-related content that is born out of their experiences in their homes and communities, home languages, variation in discourse practices, and, in some cases, experiences with schooling in other countries. English Learners in STEM Subjects: Transforming Classrooms, Schools, and Lives examines the research on ELs' learning, teaching, and assessment in STEM subjects and provides guidance on how to improve learning outcomes in STEM for these students. This report considers the complex social and academic use of language delineated in the new mathematics and science standards, the diversity of the population of ELs, and the integration of English as a second language

instruction with core instructional programs in STEM.

Offense and Offensiveness Andrew Sneddon. 2020-11-02 This book offers a comprehensive study of the nature and significance of offense and offensiveness. It incorporates insights from moral philosophy and moral psychology to rationally reconstruct our ordinary ideas and assumptions about these notions. When someone claims that something is offensive, others are supposed to listen. Why? What is it for something to be offensive? Likewise, it's supposed to matter if someone claims to have been offended. Is this correct? In this book, Andrew Sneddon argues that we should think of offense as a moralized bad feeling. He explains offensiveness in terms of symbolic value. We tend to give claims of both offense and offensiveness more credence than they deserve. While it is in principle possible for there to be genuine moral problems of offense and offensiveness, we should expect such problems to be rare. *Offense and Offensiveness: A Philosophical Account* will be of interest to scholars and students working in moral philosophy and moral psychology.

Enlightenment Travel and British Identities Mary-Ann Constantine, Nigel Leask. 2017-04-15 'Weaving together science, history, antiquarianism and art, this stimulating collection of essays amply demonstrates Thomas Pennant's centrality to a broad range of British Enlightenment debates and discourses, especially those relating to Britain's so-called "Celtic Fringe". At the same time, it underscores the epistemological importance of travel and travel writing in the late eighteenth century.' —Carl Thompson, Senior Lecturer in English, St Mary's University, UK

Courtyard Housing for Health and Happiness Donia Zhang. 2016-03-09 Health and happiness are fundamental to human quality of life. The United Nations World Happiness Report 2012 reflects a new worldwide call for governments to include happiness as a criterion to their policies. The Healthy Cities or Happy Cities movement has been endorsed by the WHO since 1986, and a Healthy House or Happy Home is a critical constituent of a healthy city or a happy city. Nevertheless, the concept has not been fully explored. Existing literature on the healthy house has often focused on the technical, economic, environmental, or biochemical aspects, while current scholarship on the happy home commonly centers on interior decoration. Few studies have addressed the importance of social and cultural factors that affect the health and happiness of the occupants. Identifying four key themes in Chinese philosophy to promote health and happiness at home, this book links architecture with Chinese philosophy, social sciences, and the humanities, and in doing so, argues that Architectural Multiculturalism is a vital ideology to guide housing design in North America. Using both qualitative and quantitative evidence gathered from ethnic Chinese and non-Chinese living in the USA and Canada, the study proposes that the Courtyard is a central component to promote social and cultural health and happiness of residents. It further details courtyard garden house design strategies that combine a sense of privacy with a feeling of community as represented in courtyard housing. The schemes may have universal implications.

Urban Multilingualism in Europe Giuditta Caliendo, Rudi Janssens, Stef Slembrouck, Piet Van Avermaet. 2019-12-02 Today's growing mobility in European urban regions results in a more widespread language diversity, which is increasingly challenging current language policies. Against this background, this volume deals with the interface between language policy, language planning and actual practices. The impact that prevailing language policies have on language practices is observed in a series of urban settings, leading to a reflection on the changes that need to be brought

about to promote social inclusion and valorise linguistic diversity in a context of globalisation-affected and migration-related multilingualism. The topics of discussion draw on different theoretical perspectives and span the research fields of linguistics, education, (family) language policy and planning, language acquisition and sociology.

Education and Migration Prue Holmes,Richard Fay,Jane Andrews.2020-06-04 From an international, research-led perspective, this book explores how languages are foregrounded in education in different countries and educational sectors, and among different groups of people in contexts of migration. It is concerned with the movement of people and their languages as they migrate across borders, and as languages—and their speakers—are under threat, pressure and pain, even to the point of being silenced. The contributors explore the multilingual possibilities and opportunities that these situations present. For example: where children's education is neglected because of displacement or exclusion; or in classrooms where teachers and educational leaders seek to meet the needs of all learners, including those who are new citizens, refugees, or asylum seekers. Together, the findings and conclusions emerging from these studies open up a timely space for interdisciplinary, inter-practitioner, and comparative researcher dialogue concerning languages and intercultural education in times of migration. Originating from an Arts and Humanities Research Council funded project *Researching multilingually at the borders of language, the body, law and the state*, this book provides readers with a natural impetus for exploring how languages and their speakers create new imaginaries and new possibilities in educational contexts and communities, as people engage with one another in and through these languages. This book was originally published as a special issue of *Language and Intercultural Communication*.

Researching Early Childhood Literacy in the Classroom Lucy Henning.2019-11-05 This volume demonstrates how the ethnographic approach to research demanded by a 'Literacy as Social Practice' perspective can generate fresh insights into what happens when young children engage with schooled literacy tasks. *Researching Early Childhood Literacy in the Classroom* argues that the lived experience of young children encountering

formal schooled literacy curricula should be the foremost consideration in educational reforms intended to improve rates of literacy acquisition in schools. To make this argument, the author suspends traditional concerns with 'learning' and 'progress' to concentrate on 'practice' and 'meaning' in a careful analysis of key classroom incidents. The author concludes that such insights suggest a need for re-considering the assumptions upon which educational policy rests. This book will be of great interest to graduate and postgraduate students, researchers, academics, and libraries in the fields of Literacy Studies, Teacher Education, Education Policy and Applied Linguistics.

English Medium Instruction in Higher Education in Asia-Pacific Ben Fenton-Smith, Pamela Humphreys, Ian Walkinshaw. 2017-03-19 This volume draws together the viewpoints and research findings of leading scholars and informed local practitioner-researchers throughout Asia-Pacific about the issues and challenges of English as a medium of instruction (EMI) at higher education institutions in that region. Specifically, it addresses four key themes: Macro-level EMI policy and practice; institutional implications for pedagogy; stakeholder perceptions of EMI; and challenges of interpersonal interaction in EMI contexts. The book is among the first to critically examine the emerging global phenomenon of English as a medium of instruction, and the first title to exclusively explore Asia-Pacific tertiary contexts. It will be of particular interest to policy-makers in international education and tertiary educators seeking blueprints for practice, as well as scholars and postgraduate students of English as a lingua franca, English for academic purposes, academic language and learning, and language education in Asia-Pacific.

Languages other than English in Australian Higher Education Jennifer Joan Baldwin. 2019-01-29 This book researches the study of languages other than English, and their place in the Australian tertiary sector. Languages are discussed in the context of the histories of Australian universities, and the series of reports and surveys about languages across the second half of the twentieth century. It demonstrates how changes in the ethnic mix of society are reflected in language offerings, and how policies on languages have changed as a result of societal influences. Also discussed is the extent to which influencing factors changed over time depending on social, cultural, political and economic contexts, and the extent to which governments prioritised the promotion and funding of languages because of their perceived contribution to the national interest. The book will give readers an understanding as to whether languages have mattered to Australia in a national and international sense and how Australia's attention to languages has been reflected in its identity and its sense of place in the world.

Modern Conspiracy Emma A. Jane, Chris Fleming. 2014-08-28 While conspiracy theory is often characterized in terms of the collapse of objectivity and Enlightenment reason, *Modern Conspiracy* traces the important role of conspiracy in the formation of the modern world: the scientific revolution, social contract theory, political sovereignty, religious paranoia and mass communication media. Rather than seeing the imminent death of Enlightenment reason and a regression to a new Dark Age in conspiratorial thinking, *Modern Conspiracy* suggests that many characteristic features of conspiracies tap very deeply into the history of the Enlightenment: its vociferous critique of established authorities and a conception of political sovereignty fuelled by fear of counter-plots, for example. Perhaps, ultimately, conspiracy theory affords us a renewed opportunity to reflect on our very relationship to the truth itself.

Co-Enrollment in Deaf Education Marc Marschark, Shirin Antia, Harry Knoors. 2019-03-01 Co-enrollment programming in deaf education refers to classrooms in which a critical mass of deaf and hard-of-hearing (DHH) students is included in a classroom containing mainly hearing students and which is taught by both a mainstream teacher and a teacher of the deaf. It thus offers full access to both DHH and hearing students in the classroom through co-teaching and avoids academic segregation of DHH students, as well as their integration into classes with hearing students without appropriate support services or modification of instructional methods and materials. Co-enrollment thus seeks to give DHH learners the best of both (mainstream and separate) educational worlds. Described as a bright light on the educational horizon, co-enrollment programming provides unique educational opportunities and educational access for DHH learners comparable to that of their hearing peers. Co-enrollment programming shows great promise. However, research concerning co-enrollment programming for DHH learners is still in its infancy. This volume sheds light on this potentially groundbreaking method of education, providing descriptions of 14 co-enrollment programs from around the world, explaining their origins, functioning, and available outcomes. Set in the larger context of what we know and what we don't know about educating DHH learners, the volume offers readers a vision of a brighter future in deaf education for DHH children, their parents, and their communities.

Spinglish Henry Beard, Christopher Cerf. 2015-06-02 Spinglish—the devious dialect of English used by professional spin doctors—is all around us. And the fact is, until you've mastered it, politicians and corporations (not to mention your colleagues and friends) will continue putting things over on you, and generally getting the better of you, every minute of every day—without your even knowing it. The Globalization of Internationalization Hans de Wit, Jocelyne Gacel-Ávila, Elspeth Jones, Nico Jooste. 2017-01-20 The Globalization of Internationalization is a timely text which gives voice to emerging perspectives as an increasing range of countries engage in the process of internationalization. The pressure to internationalize cannot be ignored by institutions anywhere in today's world, yet the dominant paradigms in the conception of internationalization traditionally come from the English-speaking world and Western Europe. This book sets out to offer alternative

viewpoints. Different dimensions and interpretations of internationalization in countries and regions whose perspectives have received little attention to date provide food for thought, and help to broaden understanding of its application in alternative contexts. Combining diverse perspectives from around the world, this new volume in the Internationalization in Higher Education series seeks answers to key questions such as: What are the main characteristics of internationalization viewed from different cultural and regional backgrounds and how do they differ from traditional models such as in Western Europe, North America and Australasia? What issues in different global contexts have an impact on internationalization processes? What are the key challenges and obstacles encountered in developing innovative and non-traditional models of internationalization? With contributions from world-renowned international authors, and perspectives from countries and contexts seen only rarely in the literature, The Globalization of Internationalization offers distinctive overviews and insights while exploring a range of thematic and regional issues arising from these considerations. This will be essential reading both as an academic resource and a practical manual for university leaders, academics, higher education policy advisers and non-governmental organizations which fund higher education.

Antisemitism and Anti-Zionism Rusi Jaspal. 2016-04-15 Antisemitism and anti-Zionism are complex, delineable, yet inter-related social-psychological phenomena. While antisemitism has been described as an irrational, age-old prejudice, anti-Zionism is often represented as a legitimate response to a 'rogue state'. Drawing upon media and visual sources and rich interview data from Iran, Britain and Israel, Antisemitism and Anti-Zionism: Representation, Cognition and Everyday Talk examines the concepts of antisemitism and anti-Zionism, tracing their evolution and inter-relations, and considering the distinct ways in which they are manifested, and responded to, by Muslim and Jewish communities in Iran, Britain and Israel. Providing insights from social psychology, sociology and history, this interdisciplinary analysis sheds light on the pivotal role of the media, social representations and identity processes in shaping antisemitism and anti-Zionism. As such, this provocative book will be of interest to social scientists

working on antisemitism, race and ethnicity, political sociology and political science, media studies and Middle Eastern politics.

Transformative Pedagogical Perspectives on Home Language Use in Classrooms Jules, Janice E.,Belgrave, Korah L..2020-09-25 Linguists, researchers, and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners' self-identities and national identities is ongoing. In fact, even with decades of research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the opportunity of building their self-esteem, confidence, and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms. Transformative Pedagogical Perspectives on Home Language Use in Classrooms is a cutting-edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness, and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers, and students.

Pronunciation and Phonetics Adam Brown.2014-03-26 This engaging, succinct text is an introduction to both phonetics and phonology as applied to the teaching of pronunciation to English language learners. Section 1 selectively covers the main areas of phonetics and phonology, without going into any area in more depth than the average English language teacher requires or that the average English language teacher trainee can handle. Section 2 focuses on practical issues related to learners and how they learn languages, and what represents good practice in terms of classroom activities for pronunciation—including aspects such as targets, motivation and priorities. The chapters end with activities to help the reader understand concepts. Section 3 provides innovative sample activities which put into practice the theoretical points covered in the first two sections, answers to the various exercises, recommended further reading (both print and non-print), a glossary of technical phonetic terms, and a bibliography of works on pronunciation teaching. The text is accompanied by a Companion Website with audio recordings of model pronunciations and audio material relating to the activities.
