Governance for Harmony in Asia and Beyond Julia Tao,Anthony B. L. Cheung,Martin Painter,Chenyang Li.2009-12-18 Harmony has become a major challenge for modern governance in the twenty-first century because of the multi-religious, multi-racial and multi-ethnic character of our increasingly globalized societies. Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies. This book examines the idea of harmony, and its place in politics and governance, both in theory and practice, in Asia, the West and elsewhere. It explores and analyses the meanings, mechanisms, dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions. The book argues that in Western political thought - which sees politics as primarily concerned with resolving social conflicts and protecting individual rights - the concept of harmony has often been neglected. In contrast, since earliest times harmony or 'he' has been a profound theme in Confucian thought, and current leaders of many East Asian governments, and the Chinese government, have explicitly declared that the realisation of a harmonious society is their aim. The book also assesses how harmony is pursued, jeopardized or deformed in the real world of politics, based upon empirical analysis of a variety of different cultural, social and political contexts, including: China, Hong Kong, Singapore, Malaysia, Singapore, Vietnam, Denmark, Latin America and the Scandinavian countries. It shows how harmony as an organizing concept can help to promote new thinking in governance, and overcome problems of modern-day governance like distrust, adversarial conflicts, hyper-individualism, coercive state intervention, and free-market alienation. It also discusses the potential problems posed by the pursuit of harmony, in particular in the grave threat of totalitarianism, and considers how these risks could best be mitigated.

The Best Writing on Mathematics 2021 Mircea Pitici.2022-07-19 The year's finest mathematical writing from around the world This annual anthology brings together the year's finest mathematics writing from around the world—and you don't need to be a mathematician to enjoy the pieces collected here. These essays—from leading names and fresh new voices—delve into the history, philosophy, teaching, and everyday aspects of math, offering surprising insights into its nature, meaning, and practice, and taking readers behind the scenes of today's hottest mathematical debates. Here, Viktor Blåsjö gives a brief history of "lockdown mathematics"; Yelda Nasifoglu decodes the politics of a seventeenth-century play in which the characters are geometric shapes; and Andrew Lewis-Pye explains the basic algorithmic rules and computational procedures behind cryptocurrencies. In other essays, Terence Tao candidly recalls the adventures and misadventures of growing up to become a leading mathematician; Natalie Wolchover shows how old math gives new clues about whether time really flows; and David Hand discusses the problem of "dark data"—information that is missing or ignored. And there is much, much more.

Assessment and Learning in the Primary School E. C. Wragg.2003-08-27 This is an innovative yet practical resource book for teachers, focusing on the classroom and covering vital skills for primary and secondary teachers. The book is strongly influenced by the findings of numerous research projects during which hundreds of teachers were observed at work. This book addresses both formal and informal ways of assessing children's work and progress. Pupils' learning is often neglected in the debate, so this book puts what children actually learn right at its centre. Divided into six units, Ted Wragg addresses important topics such as: * principles and purposes of assessment * written, oral and practical evaluation * self-assessment the 'whole school' approach * staff development and appraisal. The inclusion of practical activities, discussion topics, photographs, cartoons and case examples makes this a very user-friendly book for both trainee and experienced teachers in primary schools.

School Choice in China Wu Xiaoxin.2013-10-15 School Choice in China explores the major characteristics of schooling options in China, highlighting how largely middle-class parents exploit their cultural, economic and social capital for their children's admission into choice schools. It highlights how payments such as choice fees, donations, prize-winning certificates and awards, as well as the use of guanxi, result in Chinese school choice as a parent-driven, bottom-up movement. The author also explores how schools and local governments cash in on the school choice fever in order to obtain significant economic returns, leading to policies that accommodate the needs of mostly middle-class families. He argues that although this system seems to create winners among the parties involved, it exacerbates the educational inequality that already exists in Chinese society. Chapters include: Positional competition for cultural capital Exploitation of social capital Economics of school choice Class reproduction through parental choice This book is not simply a detailed analysis of Chinese school choice practices, but also a study of the competitive middle class search for advantage for their children. As such it will be beneficial to undergraduates, postgraduates, education professionals, policy makers, and anyone with an interest in education, sociology, social policy, and the rise and future of China.

Learning Beyond the Objective in Primary Education Ruth Wills.2019-06-18 Learning Beyond the Objective in Primary Education explores an existential perspective for pedagogy proposed in response to the current technocratic paradigm of education prevalent in many countries worldwide. This new perspective is termed 'Bildung's Repetition.' The book seeks to encourage policy makers and educational practitioners to consider the impact of education on children, over and above the meeting of set targets and objectives. Located in a philosophical framework, this book considers how children might learn authentically in the light of their own personal contingency. A series of case studies reflecting the effectiveness of this perspective through the curriculum is provided, each illustrating how 'Bildung's Repetition' allows for personalized meaningful learning within current structures. Recommendations for practice are provided, encouraging all stakeholders in education to consider the value of this perspective, and effect a 'ten-degree shift' within educational thought. This unique book fuses theory with practice, and will be of great interest to academics, researchers and students in the fields of primary education and teacher training. It will also be of interest to school leaders and practicing teachers.
