Mapping the Country of Regions Nancy P. Appelbaum.2016-05-18 The nineteenth century was an era of breathtakingly ambitious geographic expeditions across the Americas. The seminal Chorographic Commission of Colombia, which began in 1850 and lasted about a decade, was one of Latin America's most extensive. The commission's mandate was to define and map the young republic and its resources with an eye toward modernization. In this history of the commission, Nancy P. Appelbaum focuses on the geographers' fieldwork practices and visual production as the men traversed the mountains, savannahs, and forests of more than thirty provinces in order to delineate the country's territorial and racial composition. Their assumptions and methods, Appelbaum argues, contributed to a long-lasting national imaginary. What jumps out of the commission's array of reports, maps, sketches, and paintings is a portentous tension between the marked differences that appeared before the eyes of the geographers in the field and the visions of sameness to which they aspired. The commissioners and their patrons believed that a prosperous republic required a unified and racially homogeneous population, but the commission's maps and images paradoxically emphasized diversity and helped create a country of regions. By privileging the whiter inhabitants of the cool Andean highlands over those of the boiling tropical lowlands, the commission left a lasting but problematic legacy for today's Colombians.

El paraíso del diablo: Roger Casement y el informe del Putumayo, un siglo después Claudia Steiner,Carlos Páramo,Roberto Pineda,Beatriz Alzate Ángel,Séamas Ó Síocháin,Luisa Elvira Belaunde,Jean Pierre Chaumeil,Margarita Serje,Paola Vargas Arana,Juan Álvaro Echeverri,Ramiro Rojas Brown,Fernando Urbina Rangel,Anastasia Candre Yamakuri,Freddy Orlando Espinoza Cárdenas,Carlos Andrés Barragán.2014-10-01 Hace cien años se desarrolló en Londres un pequeño gran drama. A no mucha distancia de donde se erigió el Globe Theater, donde Shakespeare estrenó gran parte de sus obras, y también enfrentando el río Támesis, pero en la orilla contraria, encarando asimismo a un público expectante, otro Julio César, Julio César Arana, barón peruano del caucho, se hacía presente ante la comisión mixta de investigación del Parlamento británico, que los sindicaba a él y a su vasta empresa —la Peruvian Amazon Company, más conocida como la Casa Arana— del holocausto de más de cuarenta mil indígenas en el distrito colombiano del Putumayo. El porqué este patricio de Loreto se había tomado la molestia de cruzar el Atlántico para responder a las inquisiciones de un tribunal que, en cualquier caso, no tenía jurisdicción sobre él, no sólo hallaba respuesta en la dimensión de las acusaciones, sino en su repercusión planetaria. El escándalo tenía igualmente por escenario el teatro global. Desde 1909 —cuando Walter Hardenburg, ingeniero neoyorkino que se desplazaba desde Buenaventura hasta el río Madeira brasileño, siguiendo el curso del Putumayo, sostuvo en las páginas de la revista londinense Truth haber sido rehén de los secuaces de Arana y testigo de sus crímenes—, los lectores de prensa del mundo entero, por no decir que un número considerable de cancillerías, habían concentrado su atención en lo que vino a conocerse, conforme el título de tales artículos, como The Devil's Paradise, El Paraíso del Diablo. Sin embargo, el alboroto propiamente dicho se hallaba en el subtítulo: Un Congo de propiedad británica, que entonces evocaba las espeluznantes develaciones que en 1903 la misma Gran Bretaña había hecho con respecto a los desafueros, muy parecidos, perpetrados por la agencia personal del rey Leopoldo II de Bélgica contra la población nativa del Estado Libre del Congo.

Globalization and the Rise of Mass Education David Mitch,Gabriele Cappelli.2019-10-24 This edited collection explores the historical determinants of the rise of mass schooling and human capital accumulation based on a global, long-run perspective, focusing on a variety of countries in Europe, the Middle East, Asia, Africa and the Americas. The authors analyze the increasing importance attached to globalization as a factor in how social, institutional and economic change shapes national and regional educational trends. Although recent research in economic history has increasingly devoted more attention to global forces in shaping the institutions and fortunes of different world regions, the link and contrast between national education policies and the forces of globalization remains largely under-researched within the field. The globalization of the world economy, starting in the nineteenth century, brought about important changes that affected school policy itself, as well as the process of long-term human capital accumulation. Large migrations prompted brain drain and gain across countries, alongside rapid transformations in the sectoral composition of the economy and demand for skills. Ideas on education and schooling circulated more easily, bringing about relevant changes in public policy, while the changing political voice of winners and losers from globalization determined the path followed by public choice. Similarly, religion and the spread of missions came to play a crucial role for the rise of schooling globally.

Proceedings of the Second Meeting of the International Network of Salt-Affected Soils (INSAS) Food and Agriculture Organization of the United Nations.2023-10-24 The proceedings of the second meeting of the International Network of Salt-Affected Soils (INSAS) contain the abstracts of the papers presented during the workshop in Tashkent (22-26 May, 2023). The papers provide the up-to-date scientific knowledge and practical solutions for four topics: (1) mapping, assessing and monitoring of salt-affected soils; (2) sustainable management of salt-affected soils: practices and policy; (3) halophyte and saline agriculture and its effect on soil health; (4) integrated soil and water management under saline/sodic conditions. Under the first topic, modern techniques (geophysics, remote sensing, NIR spectroscopy) for mapping and monitoring of salt-affected soils as well as mapping of environmental susceptibility to soil salinization in dry regions were presented. Under the second topic, different approaches to reclaim saline and sodic soils and improve seed germination including the use of different organic and inorganic amendments, organic biostimulants, biochar and phytoremediation were discussed. Moreover, biodiversity of salt-affected soils and its change along salinity gradient as well as the impact of soil enzymes on the structure and function of soil microbial communities and how soil degradation is associated with specific soil microbiota were reported. Policy gaps on addressing soil salinity were analyzed and further steps how to integrate agenda on SAS into existing agricultural policies were proposed. The results of Participatory Rural Appraisal approach to survey among farmers were provided. Under the third topic, the results on testing different conventional and non-conventional crops in field trials on salt-affected soils irrigated by fresh and saline water were reported. The influence of soil properties on growing halophytes was considered. Under the fourth topic, the ways to optimize the use of poor-quality irrigation

water in agriculture were discussed. Some studies reported about the results of modeling of salt and water transport in soils for estimation of leaching requirement or root zone soil salinity. Several studies reported about the negative aspects of using brackish water leading to secondary soil salinization and sodification. For salt-affected areas with groundwater use for irrigation, the approach combining the Food Systems Approach and integrated water resources management was proposed to address the interdependent challenges of food and water security.

Functional Nanoporous Materials Christian Weinberger, Michael Tiemann.2020-06-23 With pore sizes up to 100 nm, the term nanoporous covers a wide range of material classes. A broad field of applications has arisen from the diversity of unique structures and properties of nanoporous materials. Recent research spans the range from fundamental studies of the behavior of atoms and molecules in confined space, creative synthetic pathways for novel materials, to applications in high-performance technologies. This Special Issue collects current studies about the progress in the development, characterization, and application of nanoporous materials, including (but not restricted to) mesoporous silica, carbon and metal oxides,

porous coordination polymers, metal organic frameworks (MOFs), and covalent organic frameworks (COFs), as well as materials exhibiting hierarchical porosity. Their functionalities show promise for fields such as energy storage/conversion (e.g., photocatalysis and battery electrodes), sensing, catalysis, and their sorption properties for N₂, CO₂, NO_x, or H₂O, to name just a few.

Social Sciences Lawrence Boudon, Katherine D. McCann. 2003-09-01 The one source that sets reference collections on Latin American studies apart from all other geographic areas of the world.... The Handbook has provided scholars interested in Latin America with a bibliographical source of a quality unavailable to scholars in most other branches of area studies. —Latin American Research Review Beginning with volume 41 (1979), the University of Texas Press became the publisher of the Handbook of Latin American Studies, the most comprehensive annual bibliography in the field. Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines, the Handbook alternates from year to year between social sciences and humanities. The Handbook annotates works on Mexico, Central America, the Caribbean and the Guianas, Spanish South America, and Brazil, as well as materials covering Latin America as a whole. Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research under way in specialized areas. The Handbook of Latin American Studies is the oldest continuing reference work in the field. Lawrence Boudon, of the Library of Congress Hispanic Division, has been the editor since 2001, and Katherine D. McCann has been assistant editor since 2000. The subject categories for Volume 59 are as follows:

Knowledge, Culture and Society Peter Burke. 2020-09-28 How is knowledge measured? How long does it take us to reflect on something and how long to express our thoughts? Such is the dilemma that the human, social and economic sciences go through, since they face the challenge of understanding complex processes when confronting the urgency of standards, measurements and forms of qualitative and quantitative evaluation that respond to notions of utility, productivity and viability, defined within social, cultural and political realities discordant with those models. Peter Burke. Knowledge, Culture, and Society, compiles a series of conferences given by Peter Burke during his visit to Medellín, but also includes some unpublished works. It constitutes the first publication in English by the Editorial Center of the Faculty, aimed at the internationalization of our programs and to support the acquisition of a second language. It is also one of three publications commemorating the FCHE's 40th Anniversary: the historical review 40 Años Creciendo, Escribiendo y Publicando, the Historia de la Facultad de Ciencias Humanas y Económicas (1975-2015), and now, this academic jewel that encourages the reflection upon our disciplines and the sources that support us as academics and researchers. I hope that Peter Burke. Knowledge, Culture, and Society provides the tools for an interdisciplinary discussion about knowledge in the social and human sciences today, as well as important considerations about the research and methodological challenges posed to us every day. Global Change and River Ecosystems - Implications for Structure, Function and Ecosystem Services R. Jan Stevenson,Sergi Sabater.2015-03-21 Rivers around the world are threatened by changes in land use, climate, hydrologic cycles, and biodiversity. Global changes in rivers include, but are not restricted to water flow interruptions, temperature increases, loss of hydrological connectivity, altered water residence times, changes in nutrient loads, increasing arrival of new chemicals, simplification of the physical structure of the systems, occurrence of invasive species, and biodiversity losses. All of them affect the structure and functioning of the river ecosystem, and thereby, their ecosystem services. Understanding the responses of

river ecosystems and their services to global change is essential for protecting human well being in all corners of the planet. Rivers provide critical benefits by providing food from fisheries and irrigation, regulating biogeochemical balances, and enriching our aesthetic and cultural experience. Predicting responses of rivers to global change is challenged by the complexity of interactions among these man-made drivers across a mosaic of natural hydrogeomorphic and climatic settings. This book explores the broad range of determinants defining global change and their effects on river ecosystems. Authors have provided thoughtful and insightful treatments of specific topics that relate to the broader theme of global change regulation of river ecosystems.

Archivo y cartografía de la educación en Colombia, década del sesenta. Edwin García Salazar, Daniel Ernesto Osorio Tamayo, Daniel Humberto Virviescas Granados, Yerson Y. Carrillo Ardila, Alejandro Álvarez Barreto, Juan Diego Galindo Olaya, Andrés Esteban Bejarano Infante, María Fernanda Buitrago Orjuela, Angie Lorena Liberato Sánchez, Ilusión Rita María Duarte López. 2022-06-09 Este libro construye un punto de vista sobre la educación, pero, especialmente, está pensado para aquel lector que no sabe sobre ella. ¡Cuán difícil es hablar sobre educación hoy! La dificultad radica en que todos hablan de educación en código binario, tocan la espuma de la pedagogía y se ponen una pompa en el rostro cuando hablan de aprendizaje, y esta espuma se forma de la historia de las ideas, la historia de los modelos y la historia de las escuelas pedagógicas. Como todo, esto tiene consecuencias, una de ellas: la pedagogía como el asidero de discursos vacuos y raquíticos. Este libro está hecho para el lector, para aquel el lector que quiera aprender. Y pasa como cuando aprendemos filosofía, literatura, historia, sociología; tenemos dos caminos: el fácil, que resulta ser un canto a la universalidad o el difícil, que es el abordaje del concepto por medio de nuestro cuerpo, de nuestra vida, del cerebro, de nuestra forma de vivir. Los autores de este libro no toman caminos, en todo camino existen atajos, esta fue la lección de la gran hermenéutica del siglo XX. Por el contrario, ellos se van por los trayectos, hacen recorridos por los más peligrosos paisajes. Y es que aprender es peligroso, no porque cambiemos de cualidad, según la ley dialéctica hegeliana, sino porque, al aprender, nos pasan cosas, cortamos líneas, dejamos deseos con toda la ansiedad que esto produce, nos cargamos, nos aliviamos, matamos parte de la identidad con las que nos formó la sonrisa del profesor y su café caliente sobre el escritorio, o la seriedad con la que se formó en nosotros la casuística cristalizada en el pensamiento con litros de cerveza. También, se perfilan por la vía política, la más difícil y riesgosa. Son estudiantes, profesores e investigadores que, armados de conceptos, saltan a la calle y dicen cosas, provocan problemas, hacen archivo, leen bibliotecas escondidas, marcan espacios para jugar a variaciones con el tiempo y sin él, analizan instituciones, facultades; estudian la tradición sin la tentación de inscribirse en la historia de las ideas, se preguntan por la desaparición y la constitución de facultades de educación en función de lo que se hace cuando se investiga.
