Measurement Problems in Criminal Justice Research National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Committee on Law and Justice. 2002-12-18 Most major crime in this country emanates from two major data sources. The FBI's Uniform Crime Reports has collected information on crimes known to the police and arrests from local and state jurisdictions throughout the country. The National Crime Victimization Survey, a general population survey designed to cover the extent, nature, and consequences of criminal victimization, has been conducted annually since the early 1970s. This workshop was designed to consider similarities and differences in the methodological problems encountered by the survey and criminal justice research communities and what might be the best focus for the research community. In addition to comparing and contrasting the methodological issues associated with self-report surveys and official records, the workshop explored methods for obtaining accurate self-reports on sensitive questions about crime events, estimating crime and victimization in rural counties and townships and developing unbiased prevalence and incidence rates for rate events among population subgroups.

Surveying Victims National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on National Statistics, Panel to Review the Programs of the Bureau of Justice Statistics. 2008-05-19 It is easy to underestimate how little was known about crimes and victims before the findings of the National Crime Victimization Survey (NCVS) became common wisdom. In the late 1960s, knowledge of crimes and their victims came largely from reports filed by local police agencies as part of the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting (UCR) system, as well as from studies of the files held by individual police departments. Criminologists understood that there existed a dark figure of crime consisting of events not reported to the police. However, over the course of the last decade, the effectiveness of the NCVS has been undermined by the demands of conducting an increasingly expensive survey in an effectively flat-line budgetary environment. *Surveying Victims: Options for Conducting the National Crime Victimization Survey*, reviews the programs of the Bureau of Justice Statistics (BJS.) Specifically, it explores alternative options for conducting the NCVS, which is the largest BJS program. This book describes various design possibilities and their implications relative to three basic goals; flexibility, in terms of both content and analysis; utility for gathering information on crimes that are not well reported to police; and small-domain estimation, including providing information on states or localities. This book finds that, as currently configured and funded, the NCVS is not achieving and cannot achieve BJS's mandated goal to collect and analyze data that will serve as a continuous indication of the incidence and attributes of crime. Accordingly, *Surveying Victims* recommends that BJS be afforded the budgetary resources necessary to generate accurate measure of victimization.

Criminal Investigations of Sexual Offenses Nadine Deslauriers-Varin, Craig Bennell. 2021-11-22

It is startling to read how few sexual offenses are reported in a year; even more shocking to see how few reports lead to an arrest. Research on effective responses to sexual offenses is much needed and ongoing. This edited book presents the current state of research on investigative techniques used in sex crime investigations, and the operational challenges and issues that arise in these investigations. Including an international cohort of scholars from various academic backgrounds, it reviews current efforts in key areas, synthesizing the research to make recommendations for the improvement of investigative practices and the criminal justice system's response to sexual offenses. Each chapter includes a brief introduction to the topic, a review of the research, and a discussion of the key points relevant to investigators and researchers as they move forward. The book is broken down into four themes: suspect prioritization and identification techniques, investigative interviewing, operational challenges and issues, and the investigation of specific types of sex crimes. With its broad coverage and international scope, this volume fills the gap in knowledge for investigators working on sex crimes cases. With its easy-to-read style and clear analysis of the research, this is the perfect volume for investigators and law enforcement officers, policy makers and researchers, and students in criminology and criminal justice, forensic psychology, and victim services.

Challenges and Choices for Crime-Fighting Technology Federal Support of State and Local Law Enforcement William Schwabe, Lois M. Davis, Brian A. Jackson. 2001-10-23 Under the American federal system, most law is cast as state statutes and local ordinances; accordingly, most law enforcement is the responsibility of state and local agencies. Federal law and federal law enforcement come into play only where there is rationale for it, consistent with the Constitution. Within this framework, a clear role has been identified for federal support of state and local agencies. This report provides findings of a study of technology in use or needed by law enforcement agencies at the state and local level, for the purpose of informing federal policymakers as they consider technology-related support for these agencies. In addition, it seeks to characterize the obstacles that exist to technology adoption by law enforcement agencies and to characterize the perceived effects of federal assistance programs intended to facilitate the process. The study findings are based on a nationwide Law Enforcement Technology Survey and a similar Forensics Technology Survey (FTS) conducted in late spring and early summer 2000, interviews conducted throughout the year, focus groups conducted in autumn 2000, and review of an extensive, largely nonacademic literature. Companion reports: Schwabe, William, Needs and Prospects for Crime-Fighting Technology: The Federal Role in Assisting State and Local Law Enforcement, Santa Monica, Calif.: RAND, 1999. Modernizing Crime Statistics National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on National Statistics, Panel on Modernizing the Nation's Crime Statistics. 2016-06-30 To derive statistics about crime — to estimate its levels and trends, assess its costs to and impacts on society, and inform law enforcement approaches to prevent it — a conceptual framework for defining and thinking about crime is virtually a prerequisite. Developing and maintaining such a framework is no easy task, because the mechanics of crime are ever evolving and shifting: tied to shifts and development in technology, society, and legislation. Interest in understanding crime surged in the 1920s, which proved to be a pivotal decade for the collection of nationwide crime statistics. Now established as a permanent agency, the Census Bureau commissioned the drafting of a manual for preparing crime statistics — intended for use by the police, corrections departments, and courts alike. The new manual sought to solve a perennial problem by suggesting a standard taxonomy of crime. Shortly after the Census Bureau issued its manual, the International Association of Chiefs of Police in convention adopted a resolution to create a Committee on Uniform Crime Records — to begin the process of describing what a national system of data on crimes known to the police might look like.

The key distinction between the rigorous classification proposed in this report and the classifications that have come before in U.S. crime statistics is that it is intended to partition the entirety of behaviors that could be considered criminal offenses into mutually exclusive categories.

Modernizing Crime Statistics: Report 1: Defining and Classifying Crime assesses and makes recommendations for the development of a modern set of crime measures in the United States and the best means for obtaining them. This first report develops a new classification of crime by weighing various perspectives on how crime should be defined and organized with the needs and demands of the full array of crime data users and stakeholders.

Juvenile Crime, Juvenile Justice Institute of Medicine, National Research Council, Commission on Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Law and Justice, Panel on Juvenile Crime: Prevention, Treatment, and Control.2001-06-05 Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and get tough pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. *Juvenile Crime, Juvenile Justice* presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents—trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance—the probability that delinquency or criminal activities decrease with age—and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? *Juvenile Crime, Juvenile Justice* presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

Managing Criminal Investigations Ilene Greenberg, Robert Wasserman, National Institute of Law Enforcement and Criminal Justice. Office of Development, Testing, and Dissemination. 1979 Drawing upon the MCI (Managing Criminal Investigations) field test experience and available literature, this report outlines a range of options for better management of the investigative function. The five MCI model components are the initial investigation, case screening, management of the continuing investigation, police-prosecutor relations, and an investigative monitoring system. Although preliminary findings indicate that the field test achievements appear to be modest along each of three valued dimensions--resources saved, investigative efficiency, and investigative effectiveness--the program did successfully construct a framework for goal achievement in the investigative process. Thus, MCI should be viewed as ongoing and extending to the development of the kinds of investigative functions and strategies that have direct implications for efficiency. Conditions for successful implementation of MCI include commitment from top management, training, a call-screening system, a management information system, the services of a policy analyst, and assessment of the cost implications of MCI. Due to the field test experience, the program design has been revised. Elements added to improve allocation efficiency include an expanded role for the patrol officer, a special reporting form, a call-screening system intended to increase uncommitted patrol time, and new procedures for patrol supervisors. For case screening, the elements are a system for screening out predictable 'unsolvable' cases, flexible screening criteria, a screening model that reflects local investigative priorities, and more. Investigation efficiency also is dependent on changes in police department policy outside the investigative function, such as personnel and promotion policies. Suggested policy revisions and guidelines and procedures for evaluating an MCI program are given.

current systems of crime reporting contain some misconceptions about simple rates such as a crude crime rate. Proposals made for more specific measures of crime, on the need to identify the exposed population for which crime rates are calculated, the desirability of obtaining specific rates for both victims and offenders, and the need for developing statistical programs that provide information for the calculation of such rates are discussed. Statistics are given by way of illustration. --

Evaluating Gun Policy Jens Ludwig, Philip J. Cook. 2004-05-13 Compared with other developed nations, the United States is unique in its high rates of both gun ownership and murder. Although widespread gun ownership does not have much effect on the overall crime rate, gun use does make criminal violence more lethal and has a unique capacity to terrorize the public. Gun crime accounts for most of the costs of gun violence in the United States, which are on the order of \$100 billion per year. But that is not the whole story. Guns also provide recreational benefits and sometimes are used virtuously in fending off or forestalling criminal attacks. Given that guns may be used for both good and ill, the goal of gun policy in the United States has been to reduce the flow of guns to the highest-risk groups while preserving access for most people. There is no lack of opinions on policies to regulate gun commerce, possession, and use, and most policy proposals spark intense controversy. Whether the current system achieves the proper balance between preserving access and preventing misuse remains the subject of considerable debate. *Evaluating Gun Policy* provides guidance for a pragmatic approach to gun policy using good empirical research to help resolve conflicting assertions about the effects of guns, gun control, and law enforcement. The chapters in this volume do not conform neatly to the claims of any one political position. The book is divided into five parts. In the first section, contributors analyze the connections between rates of gun ownership and two outcomes of particular interest to society—suicide and burglary. Regulating ownership is the focus of the second section, where contributors investigate the consequences a large-scale combined gun ban and buy-back program in Australia, as well as the impact of state laws that prohibit gun ownership to those with histories of domestic violence. The third section focuses on efforts to restrict gun carrying and includes a critical examination of efforts in Pittsburgh to patrol illegal gun traffic and a re-examination of the effects of permissive state gun-carrying laws. This section also features the first rigorous—and critical—analysis of Richmond's Project Exile, which serves as one model for the national Project Safe Neighborhoods program. The fourth section focuses on efforts to facilitate research on gun violence, including a database on state gun laws and the ongoing development of a nationwide violent-death reporting system. The book concludes with an examination of the policy process. Differences in opinion about gun policy flourish partly because of the lack of sound evidence in this area. The contributors to this volume demonstrate that skilled and dispassionate analysis of the evidence is attainable, even in an area as contentious as firearm policy. For pragmatists who wish to reduce the social burden of gun violence, there is no acceptable alternative.
