The Science of Ghosts Joe Nickell.2012-07-03 Are ghosts real? Are there truly haunted places, only haunted people, or both? And how can we know? Taking neither a credulous nor a dismissive approach, this first-of-its-kind book solves those perplexing mysteries and more--even answering the question of why we care so very much. Putting aside purely romantic tales, this book examines the actual evidence for ghosts--from eyewitness accounts to mediumistic productions (such as diaphanous forms materializing in dim light), spirit photographs, ghost-detection phenomena, and even CSI-type trace evidence. Offering numerous exciting case studies, this book engages in serious investigation rather than breathless mystifying. Pseudoscience, folk legends, and outright hoaxes are challenged and exposed, while the historical, cultural, and scientific aspects of ghost experiences and haunting reports are carefully explored. The author--the world's only professional paranormal investigator--brings his skills as a stage magician, private detective, folklorist, and forensic science writer to bear on a topic that demands serious study.

Innovations in Computerized Assessment Fritz Drasgow, Julie B. Olson-Buchanan. 1999-03-01

Computerized assessment offers many opportunities for innovations in measurement. In contrast to static paper-and-pencil instruments, computerized assessment can capitalize on the dynamic capabilities of the computer. For example, the difficulty of administered items can be adopted to the ability of the examinee, thus eliminating items that are too hard or too easy. Multimedia computers provide the opportunity to revolutionize assessment. Stereo sound, animation, and full-motion video can be incorporated into assessment tools and aid in the measurement of individual differences ranging from musical skills to interpersonal abilities. Innovations in Computerized Assessment presents the experiences of leading researchers in computerized assessment. The book places particular emphasis on the dilemmas that were faced by the researchers. Questions addressed include: * What problems did they confront? * What were the pros and cons of various options? * How were dilemmas resolved? * Were the solutions good ones?
