Memories and Commentaries Igor Stravinsky,Robert Craft.1981-01-01 For the first time in one volume--the celebrated Stravinsky and Craft Conversations Few would dispute that Igor Stravinsky was the greatest composer of the twentieth century. Conductor and writer Robert Craft was his closest colleague and friend, and for over twenty-one years he lived with the Stravinskys in their Hollywood home. In the early 1950s he accompanied the composer on his concert tours, and from the mid-1950s to Stravinsky's death in 1971 he co-conducted his concerts. Together Stravinsky and Craft published five acclaimed collections known as the Conversations series, which sprung from informal talks between the two men. In this newly edited and re-structured one-volume version, Craft brings Stravinsky's reflections on his childhood, his family life, professional associates, and personal relationships into sharper focus and places the major compositions in their cultural milieu. The Conversations books are the only published writing attributed to Stravinsky that are actually by him in terms of fidelity to his thoughts and opinions, making this volume required reading for all fans and students of Stravinsky's music.

Noise Pollution in Urban and Industrial Environments Paulo Henrique Trombetta Zannin.2016 Urban and industrial noise pollution is present in virtually every country in the world. Noise pollution studies are therefore needed to find solutions to improve the quality of life in cities. This book contains eighteen chapters that address the problem of noise in urban and industrial environments. One of the chapters evaluates how noise is perceived by the residents of three cities with different population densities, and a methodology is presented for the assessment of road traffic noise in one of these cities, using noise maps. Noise pollution is also evaluated on a university campus and at leisure locations such as public parks. Industrial noise is discussed in two chapters, and solutions are proposed to reduce the noise levels that reach communities located in the proximities of a metal working plant and a paper mill. One of the chapters focuses on technical standards and noise assessment regulations. Another proposes a methodology aided by three-dimensional acoustic mapping to design the sound insulation of building facades. The problems caused by rail traffic noise and aircraft noise levels are discussed in two other chapters, based on measured sound pressure levels, interviews and noise maps. A prediction matrix for the assessment of traffic-related noise pollution is presented in another chapter. This matrix, which is based on noise prediction maps, allows for the qualification and quantification of the global impact of environmental noise resulting from the implementation of a road construction project and its operation. The last chapter in this book focuses on a unique problem that most people are rarely aware of; this problem is the effects of traffic noise on the acoustic signals emitted by birds in an urban environment. The analyses discussed in this book are based on field measurements of sound pressure levels and computer calculations of noise maps. Noise mapping is a highly effective technique to visualise the problem of noise in large urban centers and noise generated by manufacturing plants. This technique facilitates the search for answers to the problem of noise pollution and is helpful for comparing solutions, enabling one to select the most effective and economically feasible solution. Several case studies are described throughout the book. These are examples of real cases, which were used to assess the quality of urban and industrial environments. Based on measurements, noise maps are calculated to show the current status of noise pollution. Subsequent analyses based on noise mapping simulations indicate the urban and industrial noise abatement measures recommended for the cases in question. The target audience of this book includes undergraduate and graduate students, as well as professionals working in the areas of environmental management of cities, of factories, in architecture, urban design, in environmental, mechanical and civil engineering, urban planning, and health care professional planning.

Art and Gentrification in the Changing Neoliberal Landscape Tijen Tunali.2021-05-30 Art and Gentrification in the Changing Neoliberal Landscape brings together various disciplinary perspectives and diverse theories on art's dialectical and evolving relationship with urban regeneration processes. It engages in the accumulated discussions on art's role in gentrification, yet changes the focus to the growing phenomenon of artistic protests and resistance in the gentrified neighborhoods. Since the 1980s, art and artists' roles in gentrification have been at the forefront of urban geography research in the subjects of housing, regeneration, displacement and new urban planning. In these accounts the artists have been noted to contribute at all stages of gentrification, from triggering it to eventually being displaced by it themselves. The current presence of art in our neoliberal urban spaces illustrates the constant negotiation between power and resistance. And there is a growing need to recognize art's shifting and conflicting relationship with gentrification. The chapters presented here share a common thesis that the aesthetic reconfiguration of the neoliberal city does not only allow uneven and exclusionary urban redevelopment strategies but also facilitates the growth of anti-gentrification resistance. The book will be of interest to scholars working in art history, urban cultures, cultural geography and urban studies as well as contemporary art practitioners and policymakers.

A Garden of Earthly Delights Joyce Carol Oates.2000 An epic novel of the rough, tough and wild 'garden' of America - the back country which hosts a brutal way of life for immigrants. This is the jungle where men are violent and goaded to kill, where women have to learn to look after themselves, and where love is something to be wary of... 'This savage account of the child Clara...is impressive in its truth and power...where THE GRAPES OF WRATH was angrily sentimental, Miss Oates is calmly bitter...A powerful narrative engine drives the story along' - SUNDAY TIMES 'Joyce Carol Oates is a good novelist in the ranging, naturalistic American tradition...but A GARDEN OF EARTHLY DELIGHTS is inward-looking enough to bring Miss Oates home to the novelist's true concern...it is this human reality that makes the book so valuable' - THE GUARDIAN

The Barrio Gangs of San Antonio, 1915-2015 Mike Tapia. 2017-06-22 Barrio Gangs is the most comprehensive academic case study of barrio group dynamics in a major Texas city to date. This is a sociological work on the history of barrio gangs in San Antonio and other large Texas cities to the present day. It examines the century-long evolution of urban barrio subcultures using public archives, oral histories, old photos, and other forms of qualitative data. The study gives special attention to the barrio gangs' "heyday," from the 1940s through the 1960s, comparing their attributes to those of modern groups. It illustrates how social and technological changes have affected barrio networking processes and the intensity of the street lifestyle over time. Intergenerational shifts and the tension that accompanies such changes are also central themes in the book. Few other places are so conducive to such historical exploration as is San Antonio. Street ignobility in the barrio no doubt mirrors processes found in other Chicano communities in Texas and the Southwest. The gang contexts in major Chicano population centers have lengthy historical bases rooted in weak opportunity structures, oppression, and discrimination. This work shows that participation in street violence, drug selling, and other parts of the informal economy are functional adaptations to the social structure; the forces propelling the formation of barrio gangs are not temporary social phenomena.

Barrio Rhythm Steven Joseph Loza. 1993 The hit movie *La Bamba* (based on the life of Richie Valens), the versatile singer Linda Ronstadt, and the popular rock group Los Lobos all have roots in the dynamic music of the Mexican-American community in East Los Angeles. With the recent Eastside Renaissance in the area, barrio music has taken on symbolic power throughout the Southwest, yet its story has remained undocumented and virtually untold. In *Barrio Rhythm*, Steven Loza brings this hidden history to life, demonstrating the music's essential role in the cultural development of East Los Angeles and its influence on mainstream popular culture. Drawing from oral histories and other primary sources, as well as from appropriate representative songs, Loza provides a historical overview of the music from the nineteenth century to the present and offers in-depth profiles of nine Mexican-American artists, groups, and entrepreneurs in Southern California from the post-World War II era to the present. His interviews with many of today's most influential barrio musicians, including members of Los Lobos, Eddie Cano, Lalo Guerrero, and Willie chronicle the cultural forces active in this complex urban community.

Science and the Human Comedy Harcourt Brown. 1976-12-15 New scientific theories, methods, and objectives exert subtle and often unnoticed influences on literary creation. The developments of the attitudes and aspirations of French scientists between the Renaissance and the Revolution and the impact of these new outlooks on French literature form the theme of this book by an authority in the interdisciplinary treatment of science and literature. Implicit in the author's exploration is the view that in the development of the scientific revolution there was no overall design, but rather random growth; human beings turn up at various moments, some of them appropriately, some of them not, so that the record is in part a story of successful endeavour, in part a comedy little short of farce. In the historical panorama of this book, four authors, each known for his ironic, even comic, insight into the human condition, are chosen to illustrate the theme. As men of letters, Rabelais and Voltaire exhibit well-defined scientific interests, while Pascal and Maupertuis were drawn from their scientific vocations into the discussion of ideas in literary forms. Consideration of their similarities and differences suggested the title, *Science and the Human Comedy*. This work is a valuable contribution to our understanding of the historical and cultural conditions accompanying the advancement of science in a critical period, as well as of several ways in which the process was reflected, sometimes directly, more often indirectly, in literature. Things That Keep Us Busy Lars-Erik Janlert, Erik Stolterman. 2017-11-10 An investigation of interactivity, interfaces and their design, and the webs of complex interactions that result. We are surrounded by interactive devices, artifacts, and systems. The general assumption is that interactivity is good—that it is a positive feature associated with being modern, efficient, fast, flexible, and in control. Yet there is no very precise idea of what interaction is and what interactivity means. In this book, Lars-Erik Janlert and Erik Stolterman investigate the elements of interaction and how they can be defined and measured. They focus on interaction with digital artifacts and systems but draw inspiration from the broader, everyday sense of the word. Viewing the topic from a design perspective, Janlert and Stolterman take as their starting point the interface, which is designed to implement the interaction. They explore how the interface has changed over time, from a surface with knobs and dials to clickable symbols to gestures to the absence of anything visible. Janlert and Stolterman examine properties and qualities of designed artifacts and systems, primarily those that are open for manipulation by designers, considering such topics as complexity, clutter, control, and the emergence of an expressive-impressive style of interaction. They argue that only when we understand the basic concepts and terms of interactivity and interaction will we be able to discuss seriously its possible futures.

On the Death and Life of Languages Claude Hagège. 2009-01-01 Twenty-five languages die each year; at this pace, half the world's five thousand languages will disappear within the next century. In this timely book, Claude Hagège seeks to make clear the magnitude of the cultural loss represented by the crisis of language death. By focusing on the relationship of language to culture and the world of ideas, Hagège shows how languages are themselves crucial repositories of culture; the traditions, proverbs, and knowledge of our ancestors reside in the language we use. His wide-ranging examination covers all continents and language families to uncover not only how languages die, but also how they can be revitalized—for example in the remarkable case of Hebrew. In a striking metaphor, Hagège likens languages to bonfires of social behavior that leave behind sparks even after they die; from these sparks languages can be rekindled and made to live again.

Bestiaries and Their Users in the Middle Ages Ron Baxter. 1998 Bestiaries are among the most interesting and varied books of the Middle Ages.

Collections of illustrations depicting real and mythical animals and plants accompanied a text which can be traced back to the earliest centuries of the Christian era. Dr. Baxter, employing a completely fresh and comprehensive approach, has undertaken extensive new research into a large corpus of Bestiaries, applying modern narrative theory to their texts and images to reveal the messages encoded in them. Messages which were systematically altered as Bestiaries were expanded and restructured. By applying the results of this analysis to medieval library records, he has been able to identify important centres of Bestiary use, and to present a radically different picture of what Bestiaries were to their medieval users.

On Modern Women and Their Rights Carmen de Burgos. 2018-08-07 In this book, Carmen de Burgos elaborates extensive and erudite arguments to counter the anti-feminist assertions that female difference leads of necessity to inferiority. She challenges the phrenological definition of women as intellectually inferior to men by bringing to bear recent findings which point to the fallacy of a direct relationship between the size of the brain and an individual's intelligence. She refutes the notion that women are by nature, due to their nervous system, more volatile and passionate than men by highlighting the numbers of crimes of passion committed by men as opposed to women, and noting that it is men who start wars and abuse their mates. Burgos also provides a historical overview of women's participation in important historical and cultural movements. This volume has been carefully edited and translated by professor Gabriela Pozzi and Keith Watts from Grand Valley State University in Michigan.

Dear Life Rachel Clarke. 2020-01-23 'What a remarkable book this is; tender, funny, brave, heartfelt, radiant with love and life, and with the love of life. It brought me often to laughter and - several times - to tears' Robert Macfarlane From the Sunday Times bestselling author of *Your Life in My Hands* comes this vibrant, tender and deeply personal memoir that finds light and love in the darkest of places. As a specialist in palliative medicine, Dr Rachel Clarke chooses to inhabit a place many people would find too tragic to contemplate. Every day she tries to bring care and comfort to those reaching the end of their lives and to help make dying more bearable. Rachel's training was put to the test in 2017 when her beloved GP father was diagnosed with terminal cancer. She learned that nothing - even the best palliative care - can sugar-coat the pain of losing someone you love. And yet, she argues, in a hospice there is more of what matters in life - more love, more strength, more kindness, more joy, more tenderness, more grace, more compassion - than you could ever imagine. For if there is a difference between people who know they are dying and the rest of us, it is simply this: that the terminally ill know their time is running out, while we live as though we have all the time in the world. *Dear Life* is a book about the vital importance of human connection, by the doctor we would all want by our sides at a time of crisis. It is a love letter - to a father, to a profession, to life itself.
