**Shipping and Logistics Management** Yuen Ha (Venus) Lun, Kee Hung Lai, Tai Chiu Edwin Cheng. 2010-04-07 Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry. Against the background of a global business environment, it explains how the shipping market functions, examining the strategic and operational issues that affect entrepreneurs in this industry. The authors discuss global trends and strategies in the shipping business, looking at the role of logistics service providers and at how the use of information technology can help shipping operations. Shipping and Logistics Management also aims to answer several important questions in the shipping industry, including: what are the shipping cost structures?, what are the patterns of sea transport? and how do companies in the shipping industry operate? An invaluable source of information for researchers and advanced, or graduate, students, Shipping and Logistics Management is also a useful reference for shipping practitioners and consultants.

**Red Ocean Traps (Harvard Business Review Classics)** W. Chan Kim, Renée A. Mauborgne. 2017-05-30 As established markets become less profitable, companies increasingly need to find ways to create and capture new markets. Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? World-renowned professors W. Chan Kim and Renee Mauborgne, the authors of the best-selling book *Blue Ocean Strategy* have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models--ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). In this bound version of their bestselling Harvard Business Review classic article, they describe how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous with either technological innovation or creative destruction; and (3) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

**Understanding the Blockchain Economy** Chris Berg, Sinclair Davidson, Jason Potts. 2019 Blockchains are the distributed ledger technology that powers Bitcoin and other cryptocurrencies. But blockchains can be used for more than the transfer of tokens - they are a significant new economic infrastructure. This book offers the first scholarly analysis of the economic nature of blockchains and the shape of the blockchain economy. By applying the institutional economics of Ronald Coase and Oliver Williamson, this book shows how blockchains are poised to reshape the nature of firms, governments, markets, and civil society.

*China's Law of the Sea* Isaac B. Kardon. 2023-03-28 An in-depth examination of the law and geopolitics of China's maritime disputes and their implications for the rules of the international law of the sea China's Law of the Sea is the first comprehensive study of the law and geopolitics of China's maritime disputes. It provides a rigorous empirical account of whether and how China is changing "the rules" of international order--specifically, the international law of the sea. Conflicts over specific rules lie at the heart of the disputes, which are about much more than sovereignty over islands and rocks in the South and East China Seas. Instead, the main contests concern the strategic maritime space associated with those islands. To consolidate control over this vital maritime space, China's leaders have begun to implement "China's law of the sea": building domestic legal institutions, bureaucratic organizations, and a naval and maritime law enforcement apparatus to establish China's preferred maritime rules on the water and in the diplomatic arena. Isaac B. Kardon examines China's laws and policies to defend, exploit, study, administer, surveil, and patrol disputed waters. He also considers other claimants' reactions to these Chinese practices, because other states must acquiesce for China's preferences to become international rules. China's maritime disputes offer unique insights into the nature and scope of China's challenge to international order.

*Henry Friendly, Greatest Judge of His Era* David M. Dorsen. 2012-04-10 Henry Friendly is frequently grouped with Oliver Wendell Holmes, Louis Brandeis, Benjamin Cardozo, and Learned Hand as the best American jurists of the twentieth century. **Crash Dive** Larry Bond. 2011-03-29 They are the ultimate unseen deterrent in modern warfare. Thousands of tons of steel, missiles, torpedoes, and men lurking silently hundreds of feet underwater, able to lie off any coastline and unleash a devastating hail of destruction with pinpoint accuracy. They are the true masters of the oceans, striking swift and unseen before slipping away, ready to do it all over again at a moment's notice. Submarines and their crews have long held a revered place in the military, with a special place of honor reserved for those men who willingly seal themselves in what could amount to a nuclear-powered coffin for months on end. Although the submarine is a relatively recent development in the field of warfare, many of the men who live and fight in these steel fish have already become legends. Edited by bestselling author Larry Bond, *Crash Dive* collects the best nonfiction writing about these near-silent killers of the deep and their crews. From the tough *Gato* class boats that harassed the Japanese Navy during World War II to the cat-and-mouse games played by U.S. and Soviet submarines during the Cold War, *Crash Dive* will take you inside the deep and deadly world of the military submarine.

*Ocean carriers* Erik Stafford.2001 In January 2001, Mary Linn, vice president of finance for Ocean Carriers, a shipping company with offices in New York and Hong Kong, was evaluating a proposed lease of a ship for a three-year period, beginning in early 2003. The customer was eager to finalize the contract to meet his own commitments and offered very attractive terms. No ship in Ocean Carrier's current fleet met the customer's requirements. Mary Linn, therefore, had to decide whether Ocean Carriers should immediately commission a new capsized carrier that would be completed two years hence and could be leased to the customer.

A Historical Dictionary of the U.S. Merchant Marine and Shipping Industry Rene De La Pedraja.1994-08-23 A foremost authority has written the first comprehensive reference about the U.S. Merchant Marine and American shipping from the introduction of steamships to today's diesel container ships--showing the impact of politics, economics, and technology on maritime history during the last two centuries. Over 500 entries describe people, private companies, business and labor groups, engineering and technological developments, government agencies, terms, key laws, landmark cases, issues, events, and ships of note. Short lists of references for further reading accompany these entries. Appendices include a chronology, diagrams of government organizations, and lists of business and labor groups by founding dates. An unusually extensive index lends itself to the varying research interests of students, teachers, and professionals in maritime and economic history, business-labor-government relations, and military studies.

**Maritime Economics 3e** Martin Stopford.2008-12-19 For 5000 years shipping has served the world economy and today it provides a sophisticated transport service to every part of the globe. Yet despite its economic complexity, shipping retains much of the competitive cut and thrust of the "perfect" market of classical economics. This blend of sophisticated logistics and larger than life entrepreneurs makes it a unique case study of classical economics in a modern setting. The enlarged and substantially rewritten Maritime Economics uses historical and theoretical analysis as the framework for a practical explanation of how shipping works today. Whilst retaining the structure of the second edition, its scope is widened to include: lessons from 5000 years of commercial shipping history shipping cycles back to 1741, with a year by year commentary updated chapters on markets; shipping costs; accounts; ship finance and a new chapter on the return on capital new chapters on the geography of sea trade; trade theory and specialised cargoes updated chapters on the merchant fleet shipbuilding, recycling and the regulatory regime a much revised chapter on the challenges and pitfalls of forecasting. With over 800 pages, 200 illustrations, maps, technical drawings and tables Maritime Economics is the shipping industry's most comprehensive text and reference source, whilst remaining as one reviewer put it "a very readable book". Martin Stopford has enjoyed a distinguished career in the shipping industry as Director of Business Development with British Shipbuilders, Global Shipping Economist with the Chase Manhattan Bank N.A., Chief Executive of Lloyds Maritime Information Services; Managing Director of Clarkson Research Services and an executive Director of Clarksons PLC. He lectures regularly at Cambridge Academy of Transport and is a Visiting Professor at Cass Business School, Dalian Maritime University and Copenhagen Business School.
