T-38 Talon Pilot's Flight Operating Instructions United States Air Force.2009-02-01 Northrop's T-38 Talon was the world's first supersonic trainer aircraft, and remains in service today in air forces worldwide. It entered service in 1961, and quickly set climb records, earning it the nickname 'white rocket'. Nearly 1200 Talons were produced before the last one rolled off the assembly line in 1972. Capable of a speed of Mach 1.3, and a climb rate approaching 34,000 feet per minute, the T-38's performance was sufficient to warrant service as the USAF Thunderbirds' aircraft in the mid-1970s. Its primary role however, was as a dedicated training and proficiency platform. More than 50,000 USAF, NASA and NATO pilots have flown the Talon, a record that may never be matched. Originally printed by the U.S. Air Force and Northrop, this handbook for the T-38 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified 'restricted', the manual was recently declassified and is here reprinted in book form.

Northrop Yb-49 Flying Wing Pilot's Flight Manual United States Air Force.2010-03-01 Visionary designer Jack Northrop built a series of experimental flying wing aircraft both before and during WWII. The YB-35, a propeller-driven strategic bomber featuring the drag-reducing all-wing design, offered enormous payload capacity and terrific endurance. The YB-49, a turbojet-powered variant built on the YB-35 airframe, captured the imagination of the world when it first flew in 1947. It quickly set both an unofficial endurance record and a trans-continental speed record, and appeared poised for rapidly deployment. Tragically, in June of 1948 one of two flying prototypes was destroyed when the aircraft suffered a structural failure during a test flight. In hearings after the accident, evidence was presented that in certain circumstances the aircraft could become unstable and exceed the capabilities of a human pilot. Shortly thereafter the YB-49 program was canceled. Jack Northrop's radical design was shelved for a generation, only to re-emerge in the form of the B-2 Spirit Stealth bomber - an aircraft that relies upon computerized controls to ensure stability in flight. Originally printed by Northrop Aircraft in 1948, this YB-49 Flying Wing pilot's flight manual taught pilots everything they needed to know before entering the cockpit. Originally classified Restricted, the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been slightly reformatted. By war's end the Tigers had destroyed more than 1200 Japanese planes, with another 700 listed as probables. Their own losses came to 573 aircraft. Originally printed by the U.S. Army Air Force for pilots transitioning to the P-40, this flight manual contains detailed information about one of history's great planes.
