**The Irreducible Needs Of Children** T. Berry Brazelton, Stanley I. Greenspan. 2009-02-23 What do babies and young children really need? This impassioned dialogue cuts through all the theories, platitudes, and controversies that surround parenting advice to define what every child must have in the first years of life. The authors, both famed advocates for children, lay out the seven irreducible needs of any child, in any society, and confront such thorny questions as: How much time do children need one-on-one with a parent? What is the effect of shifting caregivers, of custody arrangements? Why are we knowingly letting children fail in school? Nothing is off limits, even such an issue as whether every child needs or deserves to be a wanted child. This short, hard-hitting book, the fruit of decades of experience and caring, sounds a wake-up call for parents, teachers, judges, social workers, policy makers-anyone who cares about the welfare of children.

*Providence* Max Barry. 2020-03-31 'Compelling and innovative... Barry takes a story that has been done countless times before and makes it seem original' - Daily Mail She is the ultimate weapon. She once served us. Now she's got her own plans. Once we approached the aliens in peace... and they annihilated us. Now mankind has developed the ultimate killing machine, the Providence class of spaceship. With the ships' frightening speed, frightening intelligence and frightening weaponry, it's now the salamanders' turn to be annihilated... in their millions. The mismatched quartet of Talia, Gilly, Jolene and Anders are the crew on one of these destroyers. But with the ship's computers designed to outperform human decision-making in practically all areas, they are virtual bystanders. The Providence will take them to where the enemy are and she will dictate the strategy in any battle. The crew's only job role is to publicise their glorious war to a sceptical Earth. Social media and video clips are THEIR weapons in an endless charm offensive. THEIR chief enemy is not the space reptiles but each other, and boredom. But then everything changes. A message comes from base: the Providence is going into the Violet Zone, where there are no beacons and no communications with Earth. It is the heart of the enemy empire - and now the crew are left to wonder whether this is a mission of ultimate destruction or, more sinisterly, of ultimate self-destruction... PROVIDENCE is a dazzling, inventive, and thought-provoking new novel from the author of *Lexicon*.

**The Growth of Intra-Industry Trade** Leonie L. Stone. 2021-12-13 First Published in 1997. The explosive growth of world trade in the last three decades is unparalleled in history, both due to the rapid increase in volume and to the change in the composition of trade. Historically, trade between nations has consisted largely of exchanges of products that were very different from each other, neither closely substitutable in consumption nor production processes. However, in this latest period of trade expansion, the majority of the increase in world trade has been in manufactured goods, many of which are highly substitutable differentiated products. This has led to growth in intra-industry trade, the cross-shipment of similar products. This study links increased shares of intra-industry trade with growth in newly-industrializing countries. To examine these questions, this study first gives a review of existing literature, both theoretical and empirical. Five hypotheses on intra-industry trade are then discussed. A model is then presented and estimated, using data on bilateral trade between the United States and its five major trading partners, Canada, Japan, France, Germany, and the United Kingdom.

What Doesn't Kill Us Stephen Joseph. 2011-11-01 Surviving a traumatic experience is difficult and takes time to move on from, but this book makes the argument that with proper care and understanding, survivors can grow and reshape their lives in a positive way. For the past twenty years, pioneering psychologist Stephen Joseph has worked with survivors of trauma. His studies have yielded a startling discovery: that a wide range of traumatic events—from illness, divorce, separation, assault, and bereavement to accidents, natural disasters, and terrorism—can act as catalysts for positive change. Boldly challenging the conventional wisdom about trauma and its aftermath, Joseph demonstrates that rather than ruining one's life, a traumatic event can actually improve it. Drawing on the wisdom of ancient philosophers, the insights of evolutionary biologists, and the optimism of positive psychologists, *What Doesn't Kill Us* reveals how all of us can navigate change and adversity—traumatic or otherwise—to find new meaning, purpose, and direction in life.

**Black Earth** Jens Mühling.2019-10-15 An in-depth exploration of Ukraine through encounters with the many different people who live there. "Will someone pay for the spilled blood? No. Nobody." Mikhail Bulgakov composed this ominous and prophetic phrase in Kiev amid the turmoil of the Russian civil war. Since then, Ukrainian borders have shifted constantly, and its people have suffered numerous military foreign interventions. Ukraine has only existed as an independent state since 1991, and what exactly it was before then is controversial among its people as well as its European neighbors. In Black Earth: A Journey through the Ukraine, journalist and celebrated travel writer Jens Mühling takes readers across the country amid the ousting of former president Viktor Yanukovich and the Russian annexation of Crimea. Mühling delves deep into daily life in Ukraine, narrating his encounters with Ukrainian nationalists and old communists, Crimean Tatars and Cossacks, smugglers, and soldiers. Black Earth connects all these stories to convey an unconventional and unfiltered view of Ukraine, a country at the crossroads of Europe and Asia and the center of countless conflicts. In this paperback edition, a new preface is included that takes into account recent developments up to the 2022 war between Russia and Ukraine.

**Occidentalism** Ian Buruma,Avishai Margalit.2005-03-29 Twenty-five years ago, Edward Said's Orientalism spawned a generation of scholarship on the denigrating and dangerous mirage of the East in the Western colonial mind. But the West is the more dangerous mirage of our own time, Ian Buruma and Avishai Margalit argue, and the idea of the West in the minds of its self-proclaimed enemies remains largely unexamined and woefully misunderstood. Occidentalism is their groundbreaking investigation of the demonizing fantasies and stereotypes about the Western world that fuel such hatred in the hearts of others. We generally understand radical Islam as a purely Islamic phenomenon, but Buruma and Margalit show that while the Islamic part of radical Islam certainly is, the radical part owes a primary debt of inheritance to the West. Whatever else they are, al Qaeda and its ilk are revolutionary anti-Western political movements, and Buruma and Margalit show us that the bogeyman of the West who stalks their thinking is the same one who has haunted the thoughts of many other revolutionary groups, going back to the early nineteenth century. In this genealogy of the components of the anti-Western worldview, the same oppositions appear again and again: the heroic revolutionary versus the timid, soft bourgeois; the rootless, deracinated cosmopolitan living in the Western city, cut off from the roots of a spiritually healthy society; the sterile Western mind, all reason and no soul; the machine society, controlled from the center by a cabal of insiders—often Jews—pulling the hidden levers of power versus an organically knit-together one, a society of blood and soil. The anti-Western virus has found a ready host in the Islamic world for a number of legitimate reasons, they argue, but in no way does that make it an exclusively Islamic matter. A work of extraordinary range and erudition, Occidentalism will permanently enlarge our collective frame of vision

Why do we fear the word “vulva”? Do we really have to be ashamed of our body hair? Why do gender roles in children’s toys seem to be stuck in the ‘50s? With a sense of humor, an open heart, and unsparing candor, Klengel draws inspiration from her own life as she examines what being a woman today means to her (and really, a whole lot of us!). Please Note: This is for Mature Readers.

*A Place of Execution* Val McDermid.2010-04-01 Winter 1963: two children have disappeared off the streets of Manchester; the murderous careers of Myra Hindley and Ian Brady have begun. On a freezing day in December, another child goes missing: thirteen-year-old Alison Carter vanishes from her town, an insular community that distrusts the outside world. For the young George Bennett, a newly promoted inspector, it is the beginning of his most difficult and harrowing case: a murder with no body, an investigation with more dead ends and closed faces than he'd have found in the anonymity of the inner city, and an outcome which reverberates through the years. Decades later he finally tells his story to journalist Catherine Heathcote, but just when the book is poised for publication, Bennett unaccountably tries to pull the plug. He has new information which he refuses to divulge, new information that threatens the very foundations of his existence. Catherine is forced to re-investigate the past, with results that turn the world upside down. A Greek tragedy in modern England, Val McDermid's *A Place of Execution* is a taut psychological thriller that explores, exposes and explodes the border between reality and illusion in a multi-layered narrative that turns expectations on their head and reminds us that what we know is what we do not know. *A Place of Execution* is winner of the 2000 Los Angeles Times Book Prize and a 2001 Edgar Award Nominee for Best Novel.
