The Way of the Cocktail Julia Momosé.2021-11-09 JAMES BEARD AWARD WINNER • A rich, transportive guide to the world of Japanese cocktails from acclaimed bartender Julia Momosé of Kumiko ONE OF THE TEN BEST COOKBOOKS OF THE YEAR: Boston Globe • ONE OF THE BEST COOKBOOKS OF THE YEAR: Vanity Fair, Food52, Wired • “A love letter to the art of preparing a drink.”—Vanity Fair With its studious devotion to tradition, craftsmanship, and hospitality, Japanese cocktail culture is an art form treated with reverence. In this essential guide, Japanese American bartender Julia Momosé of Kumiko and Kikkō in Chicago takes us on a journey into this realm. She educates and inspires while breaking down master techniques and delving into the soul of the culture: the traditions and philosophy, the tools and the spirits—and the complex layering of these elements that makes this approach so significant. The recipes are inspired by the twenty-four micro-seasons that define the flow of life in Japan. Enter a world where the spiced woodsy cocktail called Autumn’s Jacket evokes the smoldering burn of smoking rice fields in fall, and where the Delicate Refusal tells the tale of spring’s tragic beauty, with tequila blanco and a flutter of sakura petals. Perfected classics like the Manhattan and Negroni, riffs on some of Japan’s most beloved cocktails like the Whisky Highball, and even alcohol-free drinks influenced by ingredients such as yuzu, matcha, and umé round out the collection.

The Spiral Cage Al Davison.2003 Born with severe spina bifida, doctors considered Al Davison a hopeless case, condemned to the 'spiral cage' of his own DNA. In Al's own words and pictures, this book movingly portrays his struggle to overcome 'disability' and the prejudice that surrounds it. *Nils-Udo* Nils-Udo, MacLaren Art Centre.2000

Field Emissions and Field Ionization Robert Gomer.1992-12-31 Market: Students and researchers in vacuum and surface science, microscopy, and semiconductor physics. This definitive work was based on four lectures presented at Harvard University in 1958. When it was written, field emission was one of the few techniques available for surface studies and the attainment of ultra-high vacuum was a little-known art. Though more sophisticated treatments have since been developed, Gomer's pioneering work remains valid to this day.

Financial Statistics and Data Analytics Shuangzhe Li, Milind Sathye.2021-03-02 Modern financial management is largely about risk management, which is increasingly data-driven. The problem is how to extract information from the data overload. It is here that advanced statistical and machine learning techniques can help. Accordingly, finance, statistics, and data analytics go hand in hand. The purpose of this book is to bring the state-of-art research in these three areas to the fore and especially research that juxtaposes these three.

Van Gogh TV's »Piazza Virtuale« Tilman Baumgärtel.2021-11-30 Piazza virtuale by the group of artists known as Van Gogh TV was not only the biggest art project ever to appear on television, but from a contemporary point of view the project was also a forerunner of today's social media. The ground-breaking event that took place during the 100 days of documenta IX in 1992 was an early experiment with entirely user-created content. This is the first book-length study of this largely forgotten experiment: It documents the radicality of Piazza virtuale's approach, the novel programme ideas and the technical innovations. It also allows, via QR codes, direct access to videos from the show, which until now have been inaccessible.

Victory Point Owen D Pomery.2024-06-20 On a summer's day, Ellen returns to the coastal town she grew up in: Victory Point. Revisiting old haunts and people from her past, she feels increasingly disconnected from her previous life, and exhausted by her constant struggle to forge a path ahead. Exploring the town, Ellen searches for some comfort in her own history that could give her the strength to move forward in her own life. Victory Point explores the concept of how we live and

choose to be remembered, asking whether we should strive for a higher calling, or if a simple, domestic legacy is the most honest and admirable achievement we can hope for. Set in a town that is itself an architectural experiment, this graphic novel is a poignant and heartfelt search for meaning in life.

Seeing with Different Eyes Patrick Curry, Angela Voss

.2009-05-05 *Seeing with Different Eyes: Essays in Astrology and Divination* represents the cutting-edge of contemporary thought and research on divination. The thirteen authors come from a variety of academic disciplines, ranging from anthropology and classics to English literature and religious studies, and all address the question of divination, astrology and oracles in a spirit of critical but sympathetic inquiry. The emphasis is on a participatory and reflexive approach which is firmly post-positivist, seeking to understand the divinatory act on its own terms within widely varying contexts – ancient Greek and Chaldean philosophy and theurgy, Theravadan Buddhism, Biblical studies, Elizabethan Hermeticism, Jacobean drama, Heideggerian philosophy, Medieval scholasticism, 19th century occultism, contemporary Guatemalan divination and Western medical practice. The authors are all teachers or researchers in the area of divination and symbolism, which is a new disciplinary focus developing at the University of Kent, Canterbury under the aegis of the MA programme in the Cultural Study of Cosmology and Divination. The essays in this volume originally contributed to an international conference of the same name held there in April 2006.

African Indigenous Knowledge and the Sciences Gloria Emeagwali, Edward Shizha. 2016-07-08 This book is an intellectual journey into epistemology, pedagogy, physics, architecture, medicine and metallurgy. The focus is on various dimensions of African Indigenous Knowledge (AIK) with an emphasis on the sciences, an area that has been neglected in AIK discourse. The authors provide diverse views and perspectives on African indigenous scientific and technological knowledge that can benefit a wide spectrum of academics, scholars, students, development agents, and policy makers, in both governmental and non-governmental organizations, and enable critical and alternative analyses and possibilities for understanding science and technology in an African historical and contemporary context.

Alternatives to Animal Testing Hajime Kojima, Troy Seidle, Horst Spielmann. 2018-12-27 This open access book presents recent advances in the pure sciences that are of significance in the quest for alternatives to the use of animals in research and describes a variety of practical applications of the three key guiding principles for the more ethical use of animals in experiments – replacement, reduction, and refinement, collectively known as the 3Rs. Important examples from across the world of implementation of the 3Rs in the testing of cosmetics, chemicals, pesticides, and biologics, including vaccines, are described, with additional information on relevant regulations. The coverage also encompasses emerging approaches to alternative tests and the 3Rs. The book is based on the most informative contributions delivered at the Asian Congress 2016 on Alternatives and Animal Use in the Life Sciences. It will be of value for those working in R&D, for graduate students, and for educators in various fields, including the pharmaceutical and cosmetic sciences, pharmacology, toxicology, and animal welfare. The free, open access distribution of Alternatives to Animal Testing is enabled by the Creative Commons Attribution license in International version 4: CC BY 4.0.

Cyberresearch on the Ancient Near East and Neighboring Regions Vanessa Bigot Juloux, Amy Rebecca Gansell, Alessandro Di Ludovico. 2018 *CyberResearch on the Ancient Near East and Neighboring Regions* provides case studies on archaeology, objects, cuneiform texts, and online publishing, digital archiving, and preservation. Eleven chapters present a rich array of material, spanning the fifth through the first millennium BCE, from Anatolia, the Levant, Mesopotamia, and Iran. Customized cyber- and general glossaries support readers who lack either a technical background or familiarity with the ancient cultures. Edited by Vanessa Bigot Juloux, Amy Rebecca Gansell, and Alessandro Di Ludovico, this volume is dedicated to broadening the understanding and accessibility of digital humanities tools, methodologies, and results to Ancient Near Eastern Studies. Ultimately, this book provides a model for introducing cyber-studies to the mainstream of humanities

research.

Making Livonia Anu Mänd, Marek Tamm. 2020-06-09 The region called Livonia (corresponding to modern Estonia and Latvia) emerged out of the rapid transformation caused by the conquest, Christianisation and colonisation on the north-east shore of the Baltic Sea in the late twelfth and the early thirteenth centuries. These radical changes have received increasing scholarly notice over the last few decades. However, less attention has been devoted to the interplay between the new and the old structures and actors in a longer perspective. This volume aims to study these interplays and explores the history of Livonia by concentrating on various actors and networks from the late twelfth to the seventeenth century. But, on a deeper level, the goal is more ambitious: to investigate the foundation of an increasingly complex and heterogeneous society on the medieval and early modern Baltic frontier - 'the making of Livonia'.

The Cambridge History of Medieval Monasticism in the Latin West Alison I. Beach, Isabelle Cochelin. 2020-01-09 Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

Digital Humanities Pedagogy Brett D. Hirsch. 2012 The essays in this collection offer a timely intervention in digital humanities scholarship, bringing together established and emerging scholars from a variety of humanities disciplines across the world. The first section offers views on the practical realities of teaching digital humanities at undergraduate and graduate levels, presenting case studies and snapshots of the authors' experiences alongside models for future courses and reflections on pedagogical successes and failures. The next section proposes strategies for teaching foundational digital humanities methods across a variety of scholarly disciplines, and the book concludes with wider debates about the place of digital humanities in the academy, from the field's cultural assumptions and social obligations to its political visions. (4e de couverture).

Internal Security Management in Nigeria Oshita O. Oshita, Ikenna Mike Alumona, Freedom Chukwudi Onuoha. 2019-07-23 This book explores the disturbing dimensions of the problem of insecurity in Nigeria, such as herdsmen violence, the Boko Haram insurgency, cybercrime, militancy in the Niger Delta, communal conflict and violence, as well as police corruption. It offers a comprehensive discussion of the theoretical foundations of internal security, the threats to internal security, the role of formal and informal agencies in internal security management and the challenges of internal security management.

Longitudinal Data Analysis Jason Newsom, Richard N. Jones, Scott M. Hofer. 2013-06-19 This book provides accessible treatment to state-of-the-art approaches to analyzing longitudinal studies. Comprehensive coverage of the most popular analysis tools allows readers to pick and choose the techniques that best fit their research. The analyses are illustrated with examples from major longitudinal data sets including practical information about their content and design. Illustrations from popular software packages offer tips on how to interpret the results. Each chapter features suggested readings for additional study and a list of articles that further illustrate how to implement the analysis and report the results. Syntax examples for several software packages for each of the chapter examples are provided at www.psypress.com/longitudinal-data-analysis. Although many of the examples address health or social science questions related to aging, readers from other disciplines will find the analyses relevant to their work. In addition to demonstrating statistical

analysis of longitudinal data, the book shows how to interpret and analyze the results within the context of the research design. The methods covered in this book are applicable to a range of applied problems including short- to long-term longitudinal studies using a range of sample sizes. The book provides non-technical, practical introductions to the concepts and issues relevant to longitudinal analysis. Topics include use of publicly available data sets, weighting and adjusting for complex sampling designs with longitudinal studies, missing data and attrition, measurement issues related to longitudinal research, the use of ANOVA and regression for average change over time, mediation analysis, growth curve models, basic and advanced structural equation models, and survival analysis. An ideal supplement for graduate level courses on data analysis and/or longitudinal modeling taught in psychology, gerontology, public health, human development, family studies, medicine, sociology, social work, and other behavioral, social, and health sciences, this multidisciplinary book will also appeal to researchers in these fields.

Ministry Of Space Warren Ellis.2006-07-24 This is the story of how we could have gone to space. Maybe how we should have gone to space. This is the story of the Ministry of Space: The black budget that financed the move into space. The deaths of the test pilots taken from the surviving Spitfire flyers of the Battle of Britain. And in 2000, the end of the Golden Age, as America and Russia begin moving into space. The secret revealed, and the destruction of a man who sacrificed himself for the Ministry of Space. Plus, a sketchbook section by Chris Weston and an all-new appendix by Warren Ellis revealing the facts behind the fiction!

Communicative Figurations Andreas Hepp,Andreas Breiter,Uwe Hasebrink.2017-11-27 This open access volume assesses the influence of our changing media environment. Today, there is not one single medium that is the driving force of change. With the spread of various technical communication media such as mobile phones and internet platforms, we are confronted with a media manifold of deep mediatization. But how can we investigate its transformative capability? This book answers this question by taking a non-media-centric perspective, researching the various figurations of collectivities and organizations humans are involved in. The first part of the book outlines a fundamental understanding of the changing media environment of deep mediatization and its transformative capacity. The second part focuses on collectivities and movements: communities in the city, critical social movements, maker, online gaming groups and networked groups of young people. The third part moves institutions and organizations into the foreground, discussing the transformation of journalism, religion, politics, and education, whilst the fourth and final part is dedicated to methodologies and perspectives.

Digital Scholarly Editing Matthew James Driscoll,Elena Pierazzo.2016-08-15 This volume presents the state of the art in digital scholarly editing. Drawing together the work of established and emerging researchers, it gives pause at a crucial moment in the history of technology in order to offer a sustained reflection on the practices involved in producing, editing and reading digital scholarly editions—and the theories that underpin them. The unrelenting progress of computer technology has changed the nature of textual scholarship at the most fundamental level: the way editors and scholars work, the tools they use to do such work and the research questions they attempt to answer have all been affected. Each of the essays in *Digital Scholarly Editing* approaches these changes with a different methodological consideration in mind. Together, they make a compelling case for re-evaluating the foundation of the discipline—one that tests its assertions against manuscripts and printed works from across literary history, and the globe. The sheer breadth of *Digital Scholarly Editing*, along with its successful integration of theory and practice, help redefine a rapidly-changing field, as its firm grounding and future-looking ambit ensure the work will be an indispensable starting point for further scholarship. This collection is essential reading for editors, scholars, students and readers who are invested in the future of textual scholarship and the digital humanities.

Assyria to Iberia Joan Aruz,Michael Seymour.2016-12-30 The exhibition Assyria to Iberia at the

Dawn of the Classical Age (The Metropolitan Museum of Art, New York, 2014) offered a comprehensive overview of art and cultural exchange in an era of vast imperial and mercantile expansion. The twenty-seven essays in this volume are based on the symposium and lectures that took place in conjunction with the exhibition. Written by an international group of scholars from a wide variety of disciplines, they include reports of new archaeological discoveries, illuminating interpretations of material culture, and innovative investigations of literary, historical, and political aspects of the interactions that shaped art and culture in the in the early first millennium B.C. Taken together, these essays explore the cultural encounters of diverse populations interacting through trade, travel, and migration, as well as war and displacement, in the ancient world. Assyria to Iberia: Art and Culture in the Iron Age contributes significantly to our understanding of the epoch-making exchanges that spanned the Near East and the Mediterranean and exerted immense influence in the centuries that followed.

The Case for Marriage Linda Waite, Maggie Gallagher. 2002-03-05 A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of The Book of Virtues "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- The Wall Street Journal www.broadwaybooks.com

Water Library Basia Irland.2007 Water Library consists of nine interconnected sections focusing on projects that artist Basia Irland has created over the last thirty years in Africa, Canada, Europe, South America, Southeast Asia, and the United States. Through her work, Irland offers a creative understanding of water while examining how communities of people, plants, and animals rely on this vital element. With a humanistic and artistic approach anchored in science, Water Library is a tribute to ecology expressed through art. Irland's art projects explore practical ways to conserve water through rain harvesting systems, how to foster dialogue and cooperation along the entire length of a river, and the dangerous impact of waterborne diseases on human health. By offering thought-provoking information, presented poetically, Water Library inspires in readers a broader appreciation of water's importance in their everyday lives. [Basia Irland] harbors a visceral affinity with rivers and with our water-dominated planet as a whole, with its similarities to our own bodies of water, from tears to lowly piss to the breaking of waters at birth. Process, work in time, is all-important. Irland also acknowledges the significance of migration, of the 'body in motion.' Some of her sculptures are portable, companions on the journey.--Lucy R. Lippard, art and cultural critic

Computers Helping People with Special Needs Klaus Miesenberger,Arthur Karshmer,Petr Penaz,Wolfgang Zagler.2012-07-21 The two-volume set LNCS 7382 and 7383 constitutes the refereed proceedings of the 13th International Conference on Computers Helping People with Special Needs, ICCHP 2012, held in Linz, Austria, in July 2012. The 147 revised full papers and 42 short papers were carefully reviewed and selected from 364 submissions. The papers included in the first volume are organized in the following topical sections: universal learning design; putting the disabled student in charge: user focused technology in education; access to mathematics and science; policy and service provision; creative design for inclusion, virtual user models for designing and using inclusive products; web accessibility in advanced technologies, website accessibility metrics; entertainment software accessibility; document and media accessibility; inclusion by accessible social media; a new era for document accessibility: understanding, managing and implementing the ISO standard PDF/UA; and human-computer interaction and usability for elderly.

Food Taboos and Biblical Prohibitions Peter Altmann,Anna Angelini,Abra Spiciarich.2020-06 This volume presents contributions from The Larger Context of the Biblical Food Prohibitions: Comparative and Interdisciplinary Approaches conference held in Lausanne in June, 2017. The biblical food prohibitions constitute an excellent object for comparative and interdisciplinary approaches given their materiality, their nature as comparative objects between cultures, and their nature as an anthropological object. This volume articulates these three aspects within an integrated and dynamic perspective, bringing together contributions from Levantine archaeology, ancient Near

Eastern studies, and anthropological and textual perspectives to form a new, multi-disciplinary foundation for interpretation.

Storage Networks Explained Ulf Troppens, Rainer Erkens, Wolfgang Müller. 2005-08-05 Storage Networks Explained has much to recommend it.... rarity in the literature of digital data storage - a complete exposition of both the base subject matter and its applications, which at the same time offers a level of readability making it suitable as an introduction to the subject. Storage Networks Explained is also flexible. It can be read cover-to-cover, browsed, or used as a reference. I recommend Storage Networks Explained as an essential component of any active information technology library. —Paul Massiglia, Technical Director, VERITAS Software Corporation Storage networks will become a basic technology like databases or local area networks. According to market research, 70% of external storage devices will be connected via storage networks in 2003. The authors have hands-on experience of network storage hardware and software, they teach customers about concrete network storage products, they understand the concepts behind storage networks, and show customers how storage networks address their business needs. Storage networks provide shared access to stored data from multiple computers and servers, thus increasing storage efficiency and availability. They permit information management functions such as backup and recovery, data mirroring, disaster recovery, and data migration to be performed quickly and efficiently, with a minimum of system overhead. This book explains how to use storage networks to fix malfunctioning business processes, covering the technologies as well as applications. A hot topic that will become increasingly important in the coming years. One of the first books to focus on using rather than building storage networks, and how to solve problems. Looking beyond technology and showing the true benefits of storage networks. Covers fibre channel SAN, Network Attached Storage, iSCSI and InfiniBand technologies. Contains several case studies (e.g. the example of a travel portal, protecting a critical database) Endorsed by the Storage Networking Industry Association. Written by very experienced professionals who tailored the book specifically to meet customer needs including support with supplementary material on Troppens website and Preface written by Tony Clark. Provides basic application information key for system administrators, database administrators and managers who need to know about the networking aspects of their systems. As well as systems architects, network managers, information management directors and decision makers. This book also supports applications for graduate students and other relevant courses in the field. Awarded Best System Administration Book 2005 by the Linux Journal

Art as Organism Charissa N. Terranova. 2015-10-10 In this groundbreaking book, Charissa Terranova unearths a forgotten narrative of modernism, which charts the influence that biology, General Systems Theory and cybernetics had on art in the twentieth century. From kinetic and interactive art to early computer art and installations spanning an entire city, she shows that the digital image was a rich and expansive artistic medium of modernism. This book links the emergence of the digital image to the dispersion of biocentric aesthetic philosophies developed by Bauhaus pedagogue Laszlo Moholy-Nagy, from 1920s Berlin to the Massachusetts Institute of Technology in the 1970s. It uncovers seminal but overlooked references to biology, the organism, feedback loops, emotions and the Gestalt, along with an intricate genealogy of related thinkers across disciplines. Terranova interprets anew major art movements such as the Bauhaus, Op Art and Experiments in Art and Technology (E.A.T.), by referencing contemporary insights from architects, embryologists, electrical engineers and computer scientists, among others. This book reveals the complex connections between visual culture, science and technology that comprise the deep history of twentieth-century art.

The Routledge Companion to Biology in Art and Architecture Charissa N. Terranova, Meredith Tromble. 2016-08-12 The Routledge Companion to Biology in Art and Architecture collects thirty essays from a transdisciplinary array of experts on biology in art and architecture. The book presents a diversity of hybrid art-and-science thinking, revealing how science and culture are interwoven. The book situates bioart and bioarchitecture within an expanded field of biology in art, architecture, and design. It proposes an emergent field of biocreativity and outlines its historical and

theoretical foundations from the perspective of artists, architects, designers, scientists, historians, and theoreticians. Includes over 150 black and white images.

Colliding Worlds: How Cutting-Edge Science Is Redefining Contemporary Art Arthur I.

Miller.2014-06-16 A dazzling look at the artists working on the frontiers of science. In recent decades, an exciting new art movement has emerged in which artists utilize and illuminate the latest advances in science. Some of their provocative creations—a live rabbit implanted with the fluorescent gene of a jellyfish, a gigantic glass-and-chrome sculpture of the Big Bang (pictured on the cover)—can be seen in traditional art museums and magazines, while others are being made by leading designers at Pixar, Google's Creative Lab, and the MIT Media Lab. In *Colliding Worlds*, Arthur I. Miller takes readers on a wild journey to explore this new frontier. Miller, the author of *Einstein*, *Picasso* and other celebrated books on science and creativity, traces the movement from its seeds a century ago—when Einstein's theory of relativity helped shape the thinking of the Cubists—to its flowering today. Through interviews with innovative thinkers and artists across disciplines, Miller shows with verve and clarity how discoveries in biotechnology, cosmology, quantum physics, and beyond are animating the work of designers like Neri Oxman, musicians like David Toop, and the artists-in-residence at CERN's Large Hadron Collider. From NanoArt to Big Data, Miller reveals the extraordinary possibilities when art and science collide.

Networking Tatiana Bazzichelli.2009-02 Networking means to create nets of relations, where the publisher and the reader, the artist and the audience, act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy, through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies, from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information, disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet, during the past twenty years a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker, operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s (first and foremost Fluxus), but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the 1980s even before the Internet even existed, and then moved on to Hackmeetings, to Teletstreet and networking art by different artists such as 0100101110101101.ORG, [epidemiC], Jaromil, Giacomo Verde, Giovanotti Mondani Meccanici, Correnti Magnetiche, Candida TV, Tommaso Tozzi, Federico Bucalossi, Massimo Contrasto, Mariano Equizzi, Pigreca, Molleindustria, Guerriglia Marketing, Sexyshock, Phag Off and many others.

Towards Life Cycle Sustainability Management Matthias Finkbeiner.2011-07-23 This book is a selection of the most relevant contributions to the LCM 2011 conference in Berlin. The material explores scientific and practical solutions to incorporating life cycle approaches into strategic and operational decision making. There are several sections addressing methodological topics such as LCSM approaches, methods and tools, while more application-oriented sections deal with the implementation of these approaches in relevant industrial sectors including agriculture and food, packaging, energy, electronics and ICT, and mobility.
