Led Zeppelin Bob Spitz.2021-11-09 "In this authoritative, unsparing history of the biggest rock group of the 1970s, Spitz delivers inside details and analysis with his well-known gift for storytelling." —PEOPLE From the author of the iconic, bestselling history of The Beatles, the definitive account of arguable the greatest rock band of all time. Rock star. Whatever that term means to you, chances are it owes a debt to Led Zeppelin. No one before or since has lived the dream quite like Jimmy Page, Robert Plant, John Paul Jones, and John Bonham. In Led Zeppelin, Bob Spitz takes their full measure, separating myth from reality with his trademark connoisseurship and storytelling flair. From the opening notes of their first album, the band announced itself as something different, a collision of grand artistic ambition and brute primal force, of English folk music and African American blues. Spitz's account of their artistic journey, amid the fascinating ecosystem of popular music, is irresistible. But the music is only part of the legend: Led Zeppelin is also the story of how the sixties became the seventies, of how innocence became decadence, of how rock took over. Led Zeppelin wasn't the first band to let loose on the road, but as with everything else, they took it to an entirely new level. Not all the legends are true, but in Spitz's careful accounting, what is true is astonishing and sometimes disturbing. Led Zeppelin gave no quarter, and neither has Bob Spitz. Led Zeppelin is the long-awaited full reckoning the band richly deserves.

Complexity Perspectives in Innovation and Social Change David Lane,Denise Pumain,Sander Ernst van der Leeuw,Geoffrey West.2009-02-13 Innovation is nowadays a question of life and death for many of the economies of the western world. Yet, due to our generally reductionist scientific paradigm, invention and innovation are rarely studied scientifically. Most work prefers to study its context and its consequences. As a result, we are as a society, lacking the scientific tools to understand, improve or otherwise impact on the processes of invention and innovation. This book delves deeply into that topic, taking the position that the complex systems approach, with its emphasis on 'emergence', is better suited than our traditional approach to the phenomenon. In a collection of very coherent papers, which are the result of an EU-funded four year international research team's effort, it addresses various aspect of the topic from different disciplinary angles. One of the main emphases is the need, in the social sciences, to move away from neo-darwinist 'population thinking' to 'organization thinking' if we want to understand social evolution. Another main emphasis is on developing a generative approach to invention and innovation, looking in detail at the contexts within which invention and innovation occur, and how these contexts impact on the chances for success or failure. Throughout, the book is infused with interesting new insights, but also presents several well-elaborated case studies that connect the ideas with a substantive body of 'real world' information.

Slavery and Essentialism in Highland Madagascar DENIS. REGNIER.2022-08 This book explores the prejudice against slave descendants in highland Madagascar and its persistence more than a century after the official abolition of slavery. 'Unclean people' is a widespread expression in the southern highlands of Madagascar, and refers to people of alleged slave descent who are discriminated against on a daily basis and in a variety of ways. Denis Regnier shows that prejudice is rooted in a strong case of psychological essentialism: free descendants think that 'slaves' have a 'dirty' essence that is impossible to cleanse. Regnier's field experiments question the widely accepted idea that the social stigma against slavery is a legacy of pre-colonial society. He argues, to the contrary, that the essentialist construal of 'slaves' is the outcome of the historical process triggered by the colonial abolition of slavery: whereas in pre-abolition times slaves could be cleansed through ritual means, the abolition of slavery meant that slaves were transformed only superficially into free persons, while their inner essence remained unchanged and became progressively constructed as 'forever unchangeable'. Based on detailed fieldwork, this volume will be of interest to scholars of anthropology, African studies, development studies, cultural psychology, and those looking at the legacy of slavery.

Politics of Culture in Iran Nematollah Fazeli.2006-08-21 This first full-length study of the history of Iranian anthropology charts the formation and development of anthropology in Iran in the twentieth century. The text examines how and why anthropology and culture became part of wider socio-political discourses in Iran, and how they were appropriated, and rejected, by the pre- and post-revolutionary regimes. The author highlights the three main phases of Iranian anthropology, corresponding broadly to three periods in the social and political development of Iran: *the period of nationalism: lasting approximately from the constitutional revolution (1906-11) and the end of the Qajar dynasty until the end of Reza Shah's reign (1941) *the period of Nativism: from the 1950s until the Islamic revolution (1979) *the post-revolutionary period. In addition, the book places Iranian anthropology in an international context by demonstrating how Western anthropological concepts, theories and methodologies affected epistemological and political discourses on Iranian anthropology.

Anthropology of Landscape Christopher Tilley, Kate Cameron-Daum.2017-02-01 *An Anthropology of Landscape* tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

Prehistoric Myths in Modern Political Philosophy Karl Widerquist.2016-12-05 How modern philosophers use and perpetuate myths about prehistoryThe state of nature, the origin of property, the origin of government, the primordial nature of inequality and war why do political philosophers talk so much about the Stone Age? And are they talking about a Stone Age that really happened, or is it just a convenient thought experiment to illustrate their points?Karl Widerquist and Grant S. McCall take a philosophical look at the origin of civilisation, examining political theories to show how claims about prehistory are used. Drawing on the best available evidence from archaeology and anthropology, they show that much of what we think we know about human origins comes from philosophers imagination, not scientific investigation.Key FeaturesShows how modern political theories employ ambiguous factual claims about prehistoryBrings archaeological and anthropological evidence to bear on those claimsTells the story of human origins in a way that reveals many commonly held misconceptions

Cargo Cult Lamont Lindstrom. 2019-03-31 Who is not captivated by tales of Islanders earnestly scanning their watery horizons for great fleets of cargo ships bringing rice, radios and refrigerators - ships that will never arrive? Of all the stories spun about the island peoples of Melanesia, tales of cargo cult are among the most fascinating. The term cargo cult, Lamont Lindstrom contends, is one of anthropology's most successful conceptual offspring. Like culture, worldview and ethnicity, its usage has steadily proliferated, migrating into popular culture where today it is used to describe an astonishing roll-call of people. Its history makes for lively and compelling reading. The cargo cult story, Lindstrom shows, is more significant than it at first appears, for it recapitulates in summary form three generations of anthropological theory and Pacific studies. Although anthropologists' enthusiasm for the notion of cargo cult has waned, it now colors outsiders' understanding of Melanesian culture, and even Melanesians' perceptions of themselves. The repercussions for contemporary Islanders are significant: leaders of more than one political movement have felt the need to deny that they are any kind of cargo cultist. Of particular interest to this history is Lindstrom's argument that accounts of cargo cult are at heart tragedies of thwarted desire, melancholy anticipation and crazy unrequited love. He makes a convincing case that these stories expose powerful Western scenarios of desire itself—giving cargo cult its combined titillation of the fascinating exotic and the comfortably familiar.

Use of the name Ju/'hoansi (meaning real people) acknowledges their new sense of empowerment. Since the publication of the Third Edition in 2003, Richard Lee has made eight further trips to the Kalahari, the most recent in 2010 and 2011. The Dobe and Nyae Nyae Areas have continued to transform and the people have had to respond and adapt to the pressures of capitalist economics and bureaucratic governance of the Namibian and Botswana states. Anthropology of Tourism Dennison Nash. 1996 Tourism plays an important role in social development and has attracted the interest of the social sciences, including anthropology where it has become an accepted part of anthropological studies. This book is designed to give an overview and critical assessment of this developing field of study. Basic research from three theoretical perspectives is reviewed and assessed: tourism as a form of development or acculturation, as a personal transition, and as a kind of social superstructure. In later chapters the applied side of the field is examined, including considerations of tourism policy and sustainable tourism development. Most chapters include summary case studies illustrating some of the important points under examination. The book concludes with a discussion of the integration of basic and applied approaches in the anthropological agenda on tourism and suggestions concerning the future course of study in the field.
