Communicative Competence, Classroom Interaction, and Educational Equity Courtney B. Cazden.2017-11-28 In the World Library of Educationalists series, international scholars themselves compile career-long collections of what they judge to be their finest pieces—extracts from books, key articles, salient research findings, major theoretical and/or practical contributions—so the world can read them in a single manageable volume. Readers thus are able to follow the themes and strands of their work and see their contribution to the development of a field, as well as the development of the field itself. Contributors to the series include: Michael Apple, James A. Banks, Joel Spring, William F. Pinar, Stephen J. Ball, Elliot Eisner, Howard Gardner, John Gilbert, Ivor F. Goodson, and Peter Jarvis. In this volume, Courtney B. Cazden, renowned educational sociolinguist, brings together a selection of her seminal work, organized around three themes: development of individual communicative competence in both oral and written language and discourse; classroom interaction in learning and teaching; and social justice/educational equity issues in wider contexts beyond the classroom. Since the 1970s, Cazden has been a key figure in the ethnography of schooling, focusing on children's linguistic development (both oral and written) and the functions of language in formal education, primarily but not exclusively in the United States. Combining her experiences as a former primary schoolteacher with the insight and methodological rigor of a trained ethnographer and linguist, Cazden helped to establish ethnography and discourse analysis as central methodologies for analyzing classroom interaction. This capstone volume highlights her major contributions to the field.

Create Your School Library Writing Center Timothy Horan.2016-10-16 Colleges typically have writing centers to which students can bring their writing assignments to a peer tutor for assistance, but most high schools and middle schools do not. This book advocates for the creation of writing centers in 7-12 schools and explains why the school library is the best place for the writing center. There is a glaring absence of writing centers in today's K-12 schools. More and more students are being asked in college entrance testing to submit samples of their writing, and employers are expecting their workers to write correctly and clearly. This book addresses the critical lack of writing centers below the undergraduate level. It demonstrates how middle school and high school librarians can create writing centers in their school libraries, explains how to assist students through a one-on-one writing tutorial method, and gives students and teachers the tools for learning and understanding the complex art of writing. Author Timothy Horan—inventor of the School Library Writing Center—establishes why school libraries represent the best—and most logical—places to create writing centers, and why school librarians are the natural choice to direct writing center operations. He then takes readers through the process of creating a writing center from original

conception up through opening day. Additional topics covered include how to publicize and grow your School Library Writing Center; maintaining your writing center for efficient operation on a daily basis as well as for years to come; how to become an effective writing center director and writing tutor; the most current technology that can be used to assist in the writing, composition, and research process; and working with English language learner (ELL) students within your writing center.

Culturally and Socially Responsible Assessment Catherine S. Taylor. 2022 This book addresses a problem that affects the work of all educators: how traditional methods of assessment undermine the capacity of schools to serve students with diverse cultural and social backgrounds and identities. Anchored in a commonsense notion of validity, this book explains how current K-12 assessment practices are grounded in the language, experiences, and values of the dominant White culture. It presents a timely review of research on bias in classroom and large-scale assessments, as well as research on how students' level of engagement influences their performances. The author recommends practices that can improve the validity of students' assessment performances by minimizing sources of bias, using culturally responsive assessment tools, and adopting strategies likely to increase students' engagement with assessment tasks. This practical resource provides subject-specific approaches for improving the cultural and social relevance of assessment tools and offers guidance for evaluating existing assessment instruments for bias, language complexity, and accessibility issues. Book Features: Research-based recommendations for improving assessment fairness, validity, and cultural/social relevance. Practices that have been shown to improve the effectiveness of classroom assessments in supporting student learning. Concrete examples of how to create culturally relevant assessment tasks that target valued learning goals in language arts, mathematics, social studies, and science classrooms. Appendixes that provide tools educators can use to improve grading practices.
