Versos sencillos / Simple Verses Jos? Mart? 1997-10-01 Poetry. SIMPLE VERSES is the first complete English translation of the classic collection VERSOS SENCILLOS, written by the Cuban poet Jose Marti (1853-1895) in the United States during his years of exile and revolutionary struggle. This great political and literary figure of the nineteenth century has been one of the most influential men in all the Americas. A spiritual autobiography, SIMPLE VERSES captures in each poem an experience, a feeling or a moment that formed the poet and the man. The poet, the soldier, the troubadour, the legislator, the searcher for truth, the enraptured and the disenchanted lover, the defender of poetry and its transformer, the genius and the man - all alternate in a modulated and musical flow like life itself, which it embodies. The translations of Manuel Tellechea, a Cuban American living in Union City, New Jersey, have been published by the University of Pittsburgh, Freedom House, Transaction Publishers, and others.

Inka History in Knots Gary Urton. 2017-04-04 Inka khipus--spun and plied cords that record information through intricate patterns of knots and colors--constitute the only available primary sources on the Inka empire not mediated by the hands, minds, and motives of the conquering Europeans. As such, they offer direct insight into the worldview of the Inka--a view that differs from European thought as much as khipus differ from alphabetic writing, which the Inka did not possess. Scholars have spent decades attempting to decipher the Inka khipus, and Gary Urton has become the world's leading authority on these artifacts. In *Inka History in Knots*, Urton marshals a lifetime of study to offer a grand overview of the types of quantitative information recorded in khipus and to show how these records can be used as primary

sources for an Inka history of the empire that focuses on statistics, demography, and the *longue durée* social processes that characterize a civilization continuously adapting to and exploiting its environment. Whether the Inka khipu keepers were registering census data, recording tribute, or performing many other administrative tasks, Urton asserts that they were key players in the organization and control of subject populations throughout the empire and that khipu record-keeping vitally contributed to the emergence of political complexity in the Andes. This new view of the importance of khipus promises to fundamentally reorient our understanding of the development of the Inka state and the possibilities for writing its history.

Baroque New Worlds Lois Parkinson Zamora, Monika Kaup.2009-01-01 Baroque New Worlds traces the changing nature of Baroque representation in Europe and the Americas across four centuries, from its seventeenth-century origins as a Catholic and monarchical aesthetic and ideology to its contemporary function as a postcolonial ideology aimed at disrupting entrenched power structures and perceptual categories. Baroque forms are exuberant, ample, dynamic, and

porous, and in the regions colonized by Catholic Europe, the Baroque was itself eventually colonized. In the New World, its transplants immediately began to reflect the cultural perspectives and iconographies of the indigenous and African artisans who built and decorated Catholic structures, and Europe's own cultural products were radically altered in turn. Today, under the rubric of the Neobaroque, this transculturated Baroque continues to impel artistic expression in literature, the visual arts, architecture, and popular entertainment worldwide. Since Neobaroque reconstitutions necessarily reference the European Baroque, this volume begins with the reevaluation of the Baroque that evolved in Europe during the late nineteenth century and the early twentieth. Foundational essays by Friedrich Nietzsche, Heinrich Wölfflin, Walter Benjamin, Eugenio d'Ors, René Wellek, and Mario Praz recuperate and redefine the historical Baroque. Their essays lay the groundwork for the revisionist Latin American essays, many of which have not been translated into English until now. Authors including Alejo Carpentier, José Lezama Lima, Severo Sarduy, Édouard Glissant, Haroldo de Campos, and Carlos Fuentes understand the New World Baroque and Neobaroque as decolonizing strategies in Latin America and other postcolonial contexts. This collection moves between art history and literary criticism to provide a rich interdisciplinary discussion of the transcultural forms and functions of the Baroque. Contributors. Dorothy Z. Baker, Walter Benjamin, Christine Buci-Glucksmann, José Pascual Buxó, Leo Cabranes-Grant, Haroldo de Campos, Alejo Carpentier, Irlemar Chiampi, William Childers, Gonzalo Celorio, Eugenio d'Ors, Jorge Ruedas de la Serna, Carlos Fuentes, Édouard Glissant, Roberto González Echevarría, Ángel Guido, Monika Kaup, José Lezama Lima, Friedrich Nietzsche, Mario Praz, Timothy J. LSD, My Problem Child Albert Hofmann.2017-09-27 This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In LSD: My Problem Child, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

Primates in Fragments Laura K. Marsh, Colin A.

Chapman.2013-09-07 This book is number two in a series for Primates in Fragments. In this volume, ten years after the first <http://www.springer.com/social+sciences/anthropology+%26+archaeology/book/978-0-306-47696-9>, we continue to address issues regarding primates within a fractured landscape. There are seven

sections based on specific categories of primates in fragments. In the Introductory section, authors discuss the issues surrounding primates in remnant habitats as well as encourage discussion about what we mean by fragmentation on a landscape scale. In the Long-Term and Regional Studies section, authors present information on changes that have occurred during longer studies as well as changes that have occurred over regions. In the Landscape, Metapopulations and the Matrix section, authors cover topics from dry to moist forests, and from metapopulations to single species use of multiple fragments locations. In Feeding and Behavioral Ecology, authors take a closer look at the flexibility and responsiveness of primates in fragments in terms of their food choices, resource use, and behavioral changes. In Endemic, Endangered, and Nocturnal Primates authors uncover details involving critical primates living in major city centers to the heights of the Himalayas. In Genetics, Disease and Parasites authors cover topics including population viability, disease and parasite transmission between primates in fragments and humans. Finally, in the Conservation and Ecology: Threats and Management section, we synthesize information in this volume and make recommendations for the future of work in this field and the survivability of primates in fragments.

The Nature of 'A Work' Richard P. Smiraglia. 2001-09-10 Living legend Smiraglia has written the first book devoted exclusively to exploring the concept that is commonly referred to as a bibliographic Work. In bringing together material from both inside and outside the discipline of information studies, he traces the continuing development of catalogs, search engines, and other kinds of information retrieval tools, the better to understand the maze of editions and revisions and translations that make up the evolution of a Work. Two appendixes contain charts demonstrating the evolution of concepts and definitions of a Work; a third contains a summary of the sampling technique employed to generate the data in chapter 5 Defining the Work in

Quantitative Terms and chapter 6 The Constitution of Bibliographic Families.

Mulata Nation Alison Fraunhar.2018-08-24 Repeatedly and powerfully throughout Cuban history, the mulata, a woman of mixed racial identity, features prominently in Cuban visual and performative culture. Tracing the figure, Alison Fraunhar looks at the representation and performance in both elite and popular culture. She also tracks how characteristics associated with these women have accrued across the Atlantic world. Widely understood to embody the bridge between European subject and African other, the mulata contains the sensuality attributed to Africans in a body more closely resembling the European ideal of beauty. This symbol bears far-reaching implications, with shifting, contradictory cultural meanings in Cuba. Fraunhar explores these complex paradigms, how, why, and for whom the image was useful, and how it was both subverted and asserted from the colonial period to the present. From the early seventeenth century through Cuban independence in 1899 up to the late revolutionary era, Fraunhar illustrates the ambiguous figure's role in nationhood, citizenship, and commercialism. She analyzes images including key examples of nineteenth-century graphic arts, avant-garde painting and magazine covers of the Republican era, cabaret and film performance, and contemporary iterations of gender. Fraunhar's study stands out for attending to the phenomenon of mulataje not only in elite production such as painting, but also in popular forms: popular theater, print culture, later films, and other media where stereotypes take hold. Indeed, in contemporary Cuba, mulataje remains a popular theme with Cubans as well as foreigners in drag shows, reflecting queerness in visual culture.

On Intelligence Jeff Hawkins, Sandra Blakeslee.2007-04-01 From the inventor of the PalmPilot comes a new and compelling theory of intelligence, brain function, and the future of intelligent machines Jeff Hawkins, the man who created the PalmPilot, Treo smart phone, and other handheld devices, has reshaped our relationship to computers. Now he stands ready to revolutionize both neuroscience and computing in one stroke, with a new understanding of intelligence itself. Hawkins develops a powerful theory of how the human brain works, explaining why computers are not intelligent and how, based on this new theory, we can finally build intelligent machines. The brain is not a computer, but a memory system that stores experiences in a way that reflects the true structure of the world, remembering sequences of events

and their nested relationships and making predictions based on those memories. It is this memory-prediction system that forms the basis of intelligence, perception, creativity, and even consciousness. In an engaging style that will captivate audiences from the merely curious to the professional scientist, Hawkins shows how a clear understanding of how the brain works will make it possible for us to build intelligent machines, in silicon, that will exceed our human ability in surprising ways. Written with acclaimed science writer Sandra Blakeslee, *On Intelligence* promises to completely transfigure the possibilities of the technology age. It is a landmark book in its scope and clarity.

The Art Of Seduction Robert Greene.2010-09-03 Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. *The Art of Seduction* is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the

internationally bestselling author of *The 48 Laws of Power*, *Mastery*, and *The 33 Strategies Of War*.

The Ecological Basis of Conservation Professor of Ecology Moshe Shachak, Professor Gene E Likens. 1997-01-31 From its inception, the U.S. Department of the Interior has been charged with a conflicting mission. One set of statutes demands that the department must develop America's lands, that it get our trees, water, oil, and minerals out into the marketplace. Yet an opposing set of laws orders us to conserve these same resources, to preserve them for the long term and to consider the noncommodity values of our public landscape. That dichotomy, between rapid exploitation and long-term protection, demands what I see as the most significant policy departure of my tenure in office: the use of science-interdisciplinary science-as the primary basis for land management decisions. For more than a century, that has not been the case. Instead, we have managed this dichotomy by compartmentalizing the American landscape. Congress and my predecessors handled resource conflicts by drawing enclosures: We'll create a national park here, they said, and we'll put a wildlife refuge over there. Simple enough, as far as protection goes. And outside those protected areas, the message was equally simplistic: Y'all come and get it. Have at it. The nature and the pace of the resource extraction was not at issue; if you could find it, it was yours.

Linkages in the Landscape Andrew F. Bennett. 2003 The loss and fragmentation of natural habitats is one of the major issues in wildlife management and conservation. Habitat corridors are sometimes proposed as an important element within a conservation strategy. Examples are given of corridors both as pathways and as habitats in their own right. Includes detailed reviews of principles relevant to the design and management of corridors, their place in regional approaches to conservation planning, and recommendations for research and management.
