Systems Thinking Piero Mella.2012-06-07 The core belief underlying this book is that the most useful and effective models to strengthen our intelligence are system ones, developed following the logic of Systems Thinking. Such models can explore complexity, dynamics, and change, and it is the author's view that intelligence depends on the ability to construct models of this nature. The book is designed to allow the reader not only to acquire simple information on Systems Thinking but above all to gradually learn the logic and techniques that make this way of thinking an instrument for the improvement of intelligence. In order to aid the learning and practice of the Systems Thinking discipline, the author has abandoned a rigid formal language for a more discursive style. He writes in the first person, with an ample number of citations and critical analyses, and without ever giving in to the temptation to use formal mathematics.

Design-Based School Improvement Rick Mintrop.2020-08-12 At the heart of the effort to enact and scale up successful school reforms is the need for more robust links between research and practice. One promising approach is design development, a methodology widely used in other fields and only recently adapted to education, which offers a disciplined process for identifying practical problems, assessing evidence of outcomes, accounting for variability in implementation and results, and establishing a foundation for broader understanding of the problem and proposed solutions. This exciting new book provides a practical guide for education leaders who are seeking to address issues of equity in their schools and want to pursue this approach. The book provides a step-by-step description of the process, augmented by case studies of four education leaders: Christine, a middle school principal who is concerned with the volume of disciplinary referrals in her school; Michelle, an elementary school principal who wants to address achievement gaps; Eric, an assistant superintendent who wants to improve the quality of principals' instructional feedback to teachers; and Nora, a high school principal who is concerned about the use of racial and homophobic slurs in the hallways. The book follows each of these leaders as they formulate and refine interventions to address these problems. Design-Based School Improvement also includes a series of "excursions into theory" that discuss the research basis for design-based improvement. The author—a leading thinker about policy implementation and school reform—shows a profound appreciation for the complexity of work in schools and the deep and sustained thinking entailed in undertaking productive change. By bringing theory to life and putting it in the hands of skilled practitioners, this book promises to become an invaluable resource for education leaders seeking to solve problems of equity and social justice in schools.

Nationalist Politics and Everyday Ethnicity in a Transylvanian Town Rogers Brubaker, Margit Feischmidt, Jon Fox, Liana Grancea. 2018-06-05 Situated on the geographic margins of two nations, yet imagined as central to each, Transylvania has long been a site of nationalist struggles. Since the fall of communism, these struggles have been particularly intense in Cluj, Transylvania's cultural and political center. Yet heated nationalist rhetoric has evoked only muted popular response. The citizens of Cluj--the Romanian-speaking majority and the Hungarian-speaking minority--have been largely indifferent to the nationalist claims made in their names. Based on seven years of field research, this book examines not only the sharply polarized fields of nationalist politics--in Cluj, Transylvania, and the wider region--but also the more fluid terrain on which ethnicity and nationhood are experienced, enacted, and understood in everyday life. In doing so the book addresses fundamental questions about ethnicity: where it is, when it matters, and how it works. Bridging conventional divisions of academic labor, Rogers Brubaker and his collaborators employ perspectives seldom found together: historical and ethnographic, institutional and interactional, political and experiential. Further developing the argument of Brubaker's groundbreaking *Ethnicity without Groups*, the book demonstrates that it is ultimately in and through everyday experience--as much as in political contestation or cultural articulation--that ethnicity and nationhood are produced and reproduced as basic categories of social and political life.

[How Memory Divides](#) Jeremy Brooke Straughn. 2021-05-09 This book examines the paradox of collective identity in eastern Germany in the wake of German reunification. Following the fall of the Berlin Wall, citizens of the former German Democratic Republic were confronted with a dilemma: Were they already Germans without qualification, like their compatriots in the West? Or did they remain East Germans for the time being, with an identity tied to their distinct past, as if they were foreigners who had migrated without leaving home? *How Memory Divides* shows that these questions remain unresolved even today, less because of any incomplete unity between Germans in West and East, than because of the contradictory ways in which easterners themselves have remembered their past. Drawing on a unique study spanning two decades, the author reveals how divergent biographical memories have given rise to life stories with a diverse array of genres and storylines at odds with official accounts of the GDR and its demise. Over time, efforts to effect unity between West and East have reproduced divisions within the East. This book will appeal to scholars and students of sociology and politics with interests in memory, heritage, and identity.

My Life, My Stage Ernst Stern. 1951 Autobiography of Ernst Stern, a Romanian-German scenic designer.

Entertainment Science Thorsten Hennig-Thurau, Mark B. Houston. 2018-08-01 The entertainment industry has long been dominated by legendary screenwriter William Goldman's "Nobody-Knows-Anything" mantra, which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage - the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney's recent success.

Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new entertainment product succeed. The book thus offers a timely alternative to “Nobody-Knows” decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of success in the entertainment industry. Entertainment Science is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Hennig-Thurau and Mark B. Houston – two of our finest scholars in the area of entertainment marketing – have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard Professor Emeritus of Marketing, Columbia University Entertainment Science is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can’t be ignored anymore. Hennig-Thurau and Houston are the scientific frontrunners of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig Entertainment Science’s winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists. Future Babble Dan Gardner.2010-10-12 In 2008, as the price of oil surged above \$140 a barrel, experts said it would soon hit \$200; a few months later it plunged to \$30. In 1967, they said the USSR would have one of the fastest-growing economies in the year 2000; in 2000, the USSR did not exist. In 1911, it was pronounced that there would be no more wars in Europe; we all know how that turned out. Face it, experts are about as accurate as dart-throwing monkeys. And yet every day we ask them to predict the future — everything from the weather to the likelihood of a catastrophic terrorist attack. Future Babble is the first book to examine this phenomenon, showing why our brains yearn for certainty about the future, why we are attracted to those who predict it confidently, and why it’s so easy for us to ignore the trail of outrageously wrong forecasts. In this fast-paced, example-packed, sometimes darkly hilarious book, journalist Dan Gardner shows how seminal research by UC Berkeley professor Philip Tetlock proved that pundits who are more famous are less accurate — and the average expert is no more accurate than a flipped coin. Gardner also draws on current research in cognitive psychology, political science, and behavioral economics to discover something quite reassuring: The future is always uncertain, but the end is not always near.

Intercultural Interactions Kenneth Cushner, Richard W. Brislin.1996 This new edition of Intercultural Interactions presents a fully updated set of training materials which have been developed to form the basis of a variety of cross-cultural orientation programmes. These materials are based on the assumption that there are commonalities, or similar personal experiences, when people live and work in cultures other than their own. More comprehensive in scope than its predecessor, the Second Edition also contains a practical new user's guide, and its expanded coverage draws readers in with more vivid scenarios and examples reflecting changing world events and social milieu.

Swarm Creativity Peter A. Gloor.2006-01-05 Swarm Creativity introduces a powerful new concept-Collaborative Innovation Networks, or COINs. Its aim is to make the concept of COINs as ubiquitous among business managers as any methodology to enhance quality and competitive advantage. The difference though is that COINs are nothing like other methodologies. A COIN is a cyberteam of self-motivated people with a collective vision, enabled by technology to collaborate in achieving a common goal--n innovation-by sharing ideas, information, and work. It is no exaggeration to state that COINs are the most productive engines of innovation ever. COINs have been around for hundreds of years. Many of us have already been a part of one without knowing it. What makes COINs so relevant today, though is that the concept has reached its tipping point--thanks to the Internet and

the World Wide Web. This book explores why COINS are so important to business success in the new century. It explains the traits that characterize COIN members and COIN behavior. It makes the case for why businesses ought to be rushing to uncover their COINs and nurture them, and provides tools for building organizations that are more creative, productive and efficient by applying principles of creative collaboration, knowledge sharing and social networking. Through real-life examples in several business sectors, the book shows how to leverage COINs to develop successful products in R & D, grow better customer relationships, establish better project management, and build higher-performing teams. In short, this book answers four key questions: Why are COINs better at innovation? What are the key elements of COINs? Who are the people that participate in COINs and how do they become members? And how does an organization transform itself into a Collaborative Innovation Network?

Heinrich Glarean's Books Iain Fenlon,Inga Mai Groote.2013-08-22 This collection of essays investigates the work of Heinrich Glarean, one of the most influential humanists and music theorists of the sixteenth century. For the first time, Glarean's musical writings, including his masterwork the Dodekachordon, are considered in the wider context of his work in a variety of disciplines such as musicology, history, theology and geography. Contributors reference books from Glarean's private library, including rare and previously unseen material, to explore his strategies and impact as a humanist author and university teacher. The book also uses other newly discovered source material such as course notes written by students and Glarean's preparations for his own lectures to offer a fascinating picture of his reactions to contemporary debates. Providing a detailed analysis of Glarean's library as reconstructed from the surviving copies, Heinrich Glarean's Books offers new and exciting perspectives on the multidisciplinary work of an accomplished intellectual.

MOOCs Now Susan W. Alman,Jennifer Jumba.2017-02-14 Learn from experts who have created and presented Massive Open Online Courses (MOOCs) that can reach a vast audience, and discover how to develop and present this new online form of continuing education. MOOCs (Massive Open Online Courses) have become popular with eager learners as well as some educators wanting to test the boundaries of learning. Understandably, many educators approach MOOCs with trepidation and a number of questions. Are MOOCs simply a fad? Does this new venue threaten traditional higher education models? How are teachers to be remunerated for their efforts? And what can be done about student retention in an anonymous venue of a MOOC? This book answers these questions and many more, offering a practical and realistic guide to MOOCs—one that will help anyone involved in higher education to better understand MOOCs and enable them to make decisions about whether and how to offer MOOCs.

The authors address topics such as the various costs of offering a MOOC (teachers, developers, licensing, and software), explain accessibility options, examine the challenges of copyright and the administration required, and explore what the librarian's role should be. This insightful guide also explains your options for the presentation of text, video, and audio content; whether to give assignments or tests; and how to decide whether you should offer your MOOC for free or require a fee and offer a certificate upon course completion.

In this publication, we present papers from the conference's Experience Track, the Policy Track, the Business Track, the International Track, and the Workshops.

Storytelling and the Sciences of Mind David Herman.2017-02-24 An transdisciplinary exploration of narrative not just as a target for interpretation but also as a means for making sense of experience itself. With *Storytelling and the Sciences of Mind*, David Herman proposes a cross-fertilization between the study of narrative and research on intelligent behavior. This cross-fertilization goes beyond the simple importing of ideas from the sciences of mind into scholarship on narrative and instead aims for convergence between work in narrative studies and research in the cognitive sciences. The book as a whole centers on two questions: How do people make sense of stories? And: How do people use stories to make sense of the world? Examining narratives from different periods and across multiple media and genres, Herman shows how traditions of narrative research can help shape ways of formulating and addressing questions about intelligent activity, and vice versa. Using case studies that range from Robert Louis

Stevenson's Dr Jekyll and Mr Hyde to sequences from The Incredible Hulk comics to narratives told in everyday interaction, Herman considers storytelling both as a target for interpretation and as a resource for making sense of experience itself. In doing so, he puts ideas from narrative scholarship into dialogue with such fields as psycholinguistics, philosophy of mind, and cognitive, social, and ecological psychology. After exploring ways in which interpreters of stories can use textual cues to build narrative worlds, or storyworlds, Herman investigates how this process of narrative worldmaking in turn supports efforts to understand—and engage with—the conduct of persons, among other aspects of lived experience.

From Governance to Identity Alberto Amaral, Ivar Bleiklie, Christine Musselin. 2008-11-06 On the occasion of Mary Henkel's seventieth birthday a group of her colleagues have come together to write this volume of articles as a tribute to her work and a token of gratitude for contributions to higher education research. The authors analyse these developments leading up to and possibly beyond the present in a tribute to Mary Henkel's work using her birthday as an occasion to focus attention on her contributions to higher education research – something she would normally seek to avoid. This book is also a contribute to understanding how research in higher education has developed since its origins as Mary Henkel was one of its founding scholars together with other well-known researchers such as Maurice Kogan, Guy Neave, Ulrich Teichler, Martin Trow, Burton Clark, etc. The book will be useful to all researchers in areas related to higher education, namely governance, academic work, academic identities and quality.

Privacy Online Sabine Trepte, Leonard Reinecke. 2011-07-21 Communications and personal information that are posted online are usually accessible to a vast number of people. Yet when personal data exist online, they may be searched, reproduced and mined by advertisers, merchants, service providers or even stalkers. Many users know what may happen to their information, while at the same time they act as though their data are private or intimate. They expect their privacy will not be infringed while they willingly share personal information with the world via social network sites, blogs, and in online communities. The chapters collected by Trepte and Reinecke address questions arising from this disparity that has often been referred to as the privacy paradox. Works by renowned researchers from various disciplines including psychology, communication, sociology, and information science, offer new theoretical models on the functioning of online intimacy and public accessibility, and propose novel ideas on the how and why of online privacy. The contributing authors offer intriguing solutions for some of the most pressing issues and problems in the field of online privacy. They investigate how users abandon privacy to enhance social capital and to generate different kinds of benefits. They argue that trust and authenticity characterize the uses of social network sites. They explore how privacy needs affect users' virtual identities. Ethical issues of privacy online are discussed as well as its gratifications and users' concerns. The contributors of this volume focus on the privacy needs and behaviors of a variety of different groups of social media users such as young adults, older users, and genders. They also examine privacy in the context of particular online services such as social network sites, mobile internet access, online journalism, blogs, and micro-blogs. In sum, this book offers researchers and students working on issues related to internet communication not only a thorough and up-to-date treatment of online privacy and the social web. It also presents a glimpse of the future by exploring emergent issues concerning new technological applications and by suggesting theory-based research agendas that can guide inquiry beyond the current forms of social technologies.

Driven Into Paradise Reinhold Brinkmann, Christoph Wolff. 1999-09-14 This is a long overdue and brilliant contribution to our understanding of the intellectual migration from Europe. The essays in this volume illuminate in new ways the experiences of musicians and scholars who fled Europe.—Leon Botstein, Music Director, American Symphony Orchestra With a sweep and coherence very rare in essay collections, this volume immediately takes its place as one of the most important publications on twentieth-century music. The range of source materials is dazzling: anecdotes, letters, memoirs, interviews, newspaper articles, musical scores, films, and archival documents. Handled with deft scholarship, they add up to a balanced yet deeply moving account of how figures of exile experienced and transformed American culture.—Walter Frisch, author of *The Early Works of Arnold Schoenberg*

Designing Hypermedia for Learning David H. Jonassen, Heinz Mandl. 2012-12-06 This most unusual book results from the NATO Advanced Research Workshop, *Designing Hypertext/Hypermedia for Learning*, held in Rottenburg am Neckar, FRO, from July 3-8, 1989. The idea for the workshop resulted from the burgeoning interest in hypertext combined with the frustrating lack of literature on learning applications for hypertext. There was little evidence in 1988 that hypertext could successfully support learning outcomes. A few projects were investigating hypertext for learning, but few conclusions were available and little if any advice on how to design hyper text for learning applications was available. Could hypertext support learning objectives? What mental processing requirements are unique to learning outcomes? How would the processing requirements of learning outcomes interact with unique user processing requirements of browsing and constructing hypertext? Should hypertext information bases be restructured to accommodate learning outcomes? Should the user interface be manipulated in order to support the task functionality of learning outcomes? Does the hypertext structure reflect the intellectual requirements of learning outcomes? What kinds of learning-oriented hypertext systems were being developed and what kinds of assumptions were these systems making? These and other questions demonstrated the need for this workshop. The workshop included presentations, hardware demonstrations, sharing and browsing of hypertexts, and much discussion about all of the above. These were the experiences that you, the reader of this book, unfortunately did not experience.
