WHO Guidelines on Hand Hygiene in Health Care World Health Organization.2009 The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

Languages of Education Daniel Tröhler.2012-01-06 In this landmark contribution to the study of the formation of the modern school, Daniel Tröhler applies one of the most recognized methods of historical research to an analysis of the language of the academic discipline of education. Arguing the value of looking at languages rather than arguments--langues rather than paroles--this method of historical research is used to examine the background of different philosophies, theories, or arguments of education, specifically republicanism and Protestantism. Tröhler's argument is that such analysis is essential to tracing back educational arguments to the ideological core of their concerns, and thus to understanding in international perspective the historical development of education systems and organizations and to evaluating their different theoretical and political approaches and claims. Elegantly written, with the historian's attention to archival material, this book enables the reader to understand the complex and different social, cultural, religious, and political context factors embedded in the thought of schooling and its objects of scrutiny--its notions of the child and teacher. Languages of Education is essential reading for scholars and students across the fields of history and philosophy of education, curriculum studies, and comparative education.

By Other Means Part II Kathleen Hicks,Melissa Dalton.2019-11-04 Geopolitical competition is increasingly playing out in the space beyond diplomacy and short of conventional war, sometimes referred to as the gray zone, which is forcing the United States to confront the liabilities of its strengths. This report assesses current U.S. government actions to deter, campaign through, and respond to competitors' gray zone tactics. Using the campaign planning framework established in By Other Means Part I, it also provides recommendations aimed at ameliorating U.S. liabilities and building on its asymmetries to improve U.S. national security in the presence of rivals' gray zone approaches.

Workforce Intermediaries Robert Giloth.2004 Confronted with businesses facing a long-term shortage of skilled workers and evaluations showing that job training for the poor over the past 25 years had produced only meager results, a number of groups throughout the country have sought to find a more effective approach. The efforts of these partnerships, which editor Robert Giloth calls workforce intermediaries, are characterized by a focus on improving business productivity and helping low-income individuals not just find a job, but advance over time to jobs that enable them to support themselves and their families. This book takes stock of the world of workforce intermediaries: entrepreneurial partnerships that include businesses, unions, community colleges, and community organizations. Noted scholars and policy makers examine the development and effectiveness of these intermediaries, and a concluding chapter discusses where we need to go from here, if society is to provide a more coherent approach to increasing the viability and capacity of these important institutions. Environmental Law, Disrupted KEITH. OWLEY HIROKAWA (JESSICA.),Jessica Owley.2021-12-14 To date, U.S. law has largely served as an obstacle to an honest assessment of our preparedness to face the climate change challenge. Given that society has become comfortable amidst mild climatic conditions, and given a pervasive reluctance to change, extreme and abrupt climatic changes will hit hard. Our current legal structure maintains a dangerous status quo and it is time to unleash the potential of communities and the private sector to produce innovative solutions. This book, the fourth in a series by the Environmental Law Collaborative, addresses disruption from a variety of influences and perspectives. Some essays consider the disruptive effects of environmental changes on human and ecological safety, security, and well-being, suggesting that the impacts of climate changes are not accounted for in the current legal system. Some identify key changes needed to respond to climatic challenges, social inequities, and dwindling grey and green resources. Others deconstruct social, political, and professional frameworks to understand how such influences might be used to disrupt the current regime, or even ones where expectations are being disrupted with the endorsement of law. Taken together, these essays provide an understanding of the cause, effect, and opportunity that environmental disruption presents in the climate change era.

The Wizards Of Langley Jeffrey T. Richelson.2008-11-10 In this, the first full-length study of the Directorate of Science and Technology, Jeffrey T. Richelson walks us down the corridors of CIA headquarters in Langley, Virginia, and through the four decades of science, scientists, and managers that produced the CIA we have today. He tells a story of amazing technological innovation in service of intelligence gathering, of bitter bureaucratic infighting, and sometimes, as in the case of its mind-control adventure, of stunning moral failure. Based on original interviews and extensive archival research, The Wizards of Langley turns a piercing lamp on many of the agency's activities, many never before made public.

Lessons Encountered National Defense University, Joseph J. Collins, Jr. Richard D. Hooker. 2015 This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decisionmakers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

The Puzzle Palace James Bamford. 2018-06-05 The first book ever written on the National Security Agency from the New York Times bestselling author of *Body of Secrets* and *The Shadow Factory*. In this groundbreaking, award-winning book, James Bamford traces the NSA's origins, details its inner workings, and explores its far-flung operations. He describes the city of fifty thousand people and nearly twenty buildings that is the Fort Meade headquarters of the NSA—where there are close to a dozen underground acres of computers, where a significant part of the world's communications are monitored, and where reports from a number of super-sophisticated satellite eavesdropping systems are analyzed. He also gives a detailed account of NSA's complex network of listening posts—both in the United States and throughout much of the rest of the world. When a Soviet general picks up his car telephone to call headquarters, when a New York businessman wires his branch in London, when a Chinese trade official makes an overseas call, when the British Admiralty urgently wants to know the plans and movements of Argentina's fleet in the South Atlantic—all of these messages become NSA targets. James Bamford's illuminating book reveals how NSA's mission of Signals Intelligence (SIGINT) has made the human espionage agent almost a romantic figure of the past. Winner Best Investigative Book of the Year Award from Investigative Reporters & Editors "The Puzzle Palace has the feel of an artifact, the darkly revealing kind. Though published during the Reagan years, the book is coolly subversive and powerfully prescient."—The New Yorker "Mr. Bamford has emerged with everything except the combination to the director's safe."—The New York Times Book Review

Science Education and Curriculum in South Africa Oscar Koopman. 2016-11-01 This book explores the impact of the socio-historical, political, and economic environment in South Africa, both during and after Apartheid. During this time, the South African education system demonstrated an interest in a specific type of knowledge, which Koopman refers to as 'a science of government'. This 'science of government' leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature, and is presented as a series of abstract concepts and definitions. The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum. The book draws on the work of various phenomenological scholars, namely Edmund Husserl, Martin Heidegger, Merleau-Ponty, and Max van Manen to discuss these tensions.

Wedge Mark Riebling. 2010-06-15 Prophetic when first published, even more relevant now, *Wedge* is the classic, definitive story of the secret war America has waged against itself. Based on scores of interviews with former spies and thousands of declassified documents, *Wedge* reveals and re-creates -- battle by battle, bungle by bungle -- the epic clash that has made America uniquely vulnerable to its enemies. For more than six decades, the opposed and overlapping missions of the FBI and CIA -- and the rival personalities of cops and spies -- have caused fistfights and turf tangles, breakdowns and cover-ups, public scandals and tragic deaths. A grand panorama of dramatic episodes, peopled by picaresque secret agents from Ian Fleming to Oliver North, *Wedge* is both a journey and a warning. From Pearl Harbor, McCarthyism, and the plots to kill Castro through the JFK assassination, Watergate, and Iran Contra down to the Aldrich Ames affair, Robert Hanssen's treachery, and the hunt for Al Qaeda -- *Wedge* shows the price America has paid for its failure to resolve the conflict between law enforcement and intelligence. Gripping and authoritative -- and updated with an important new epilogue, carrying the action through to September 11, 2001 -- *Wedge* is the only book about the schism that has informed nearly every major blunder in American espionage.

China's Interests and Goals in the Arctic Elizabeth Wishnick. 2018-02-09 China has been elaborating its position on the Arctic at the same time as the United States has been refining its own Arctic strategy as Chairman of the Arctic Council through April 2017. This Letort Paper examines the geopolitical implications of China's growing involvement in the Arctic for U.S. interests. First, the evolution of U.S. Arctic strategy is discussed, including its political and military components. Next, China's interests and goals in the Arctic are addressed. A third section examines the Arctic in China's relations with Canada, Russia, and the Nordic states. This Letort Paper then evaluates the consequences of China's expanding Arctic presence for U.S. security interests and concludes with policy recommendations--Publisher's web site.

Strengthening the Disaster Resilience of the Academic Biomedical Research Community National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Health and Medicine Division, Institute for Laboratory Animal Research, Board on Earth Sciences and Resources, Board on Health Sciences Policy, Committee on Strengthening the Disaster Resilience of Academic Research Communities. 2017-11-20 The academic biomedical research community is a hub of employment, economic productivity, and scientific progress. Academic research institutions are drivers of economic development in their local and state economies and, by extension, the national economy. Beyond the economic input that the academic biomedical research community both receives and provides, it generates knowledge that in turn affects society in myriad ways. The United States has experienced and continues to face the threat of disasters, and, like all entities, the academic biomedical research community can be affected. Recent disasters, from hurricanes to cyber-attacks, and their consequences have shown that the investments of the federal government and of the many other entities that sponsor academic research are not uniformly secure. First and foremost, events that damage biomedical laboratories and the institutions that house them can have impacts on the safety and well-being of humans and research animals. Furthermore, disasters can affect career trajectories, scientific progress, and financial stability at the individual and institutional levels. *Strengthening the Disaster Resilience of the Academic Biomedical Research Community* offers recommendations and guidance to enhance the disaster resilience of the academic biomedical research community, with a special focus on the potential actions researchers, academic research institutions, and research sponsors can take to mitigate the impact of future disasters.

The Report of the Constitution Project's Task Force on Detainee Treatment, Abridged Edition Constitution Project (Georgetown Public Policy Institute). Task Force on Detainee Treatment, Constitution Project (Georgetown Public Policy Institute), Neil Lewis, Kent Eiler, Katherine Hawkins, Alka Pradhan. 2013-04-16 The Constitution Project's Task Force on Detainee Treatment is an independent, bipartisan, blue-ribbon panel charged with examining the federal government's policies and actions related to the capture, detention and treatment of suspected terrorists during the Clinton, Bush and Obama administrations. The project was undertaken with the belief that it was important to provide an account as authoritative and accurate as possible of how the United States treated, and continues to treat, people held in our custody as the nation mobilized to deal with a global terrorist threat.

Forging the Shield Donald A. Carter. 2015 This illustrated book that includes tables, charts, and maps primarily discusses the role of USAREUR (US Army Europe) in rearming and training the new German Army which was perhaps the Army's single greatest contribution toward maintaining security in Western Europe. Likewise, the relationship between American soldiers and their French and West German hosts evolved over time and is a critical element in telling the story of the US Army in Europe.

25 Years of Transformations of Higher Education Systems in Post-Soviet Countries Jeroen Huisman, Anna Smolentseva, Isak Froumin. 2018-04-24 This book is open access under a CC BY 4.0 license. This open access book is a result of the first ever study of the transformations of the higher education institutional landscape in fifteen former USSR countries after the dissolution of the Soviet Union in 1991. It

explores how the single Soviet model that developed across the vast and diverse territory of the Soviet Union over several decades has evolved into fifteen unique national systems, systems that have responded to national and global developments while still bearing some traces of the past. The book is distinctive as it presents a comprehensive analysis of the reforms and transformations in the region in the last 25 years; and it focuses on institutional landscape through the evolution of the institutional types established and developed in Pre-Soviet, Soviet and Post-Soviet time. It also embraces all fifteen countries of the former USSR, and provides a comparative analysis of transformations of institutional landscape across Post-Soviet systems. It will be highly relevant for students and researchers in the fields of higher education and sociology, particularly those with an interest in historical and comparative studies.

Constructing Cassandra Milo Jones, Philippe Silberzahn. 2013-08-21 Constructing Cassandra analyzes the intelligence failures at the CIA that resulted in four key strategic surprises experienced by the US: the Cuban Missile Crisis in 1962, the Iranian revolution of 1978, the collapse of the USSR in 1991, and the 9/11 terrorist attacks—surprises still play out today in U.S. policy. Although there has been no shortage of studies exploring how intelligence failures can happen, none of them have been able to provide a unified understanding of the phenomenon. To correct that omission, this book brings culture and identity to the foreground to present a unified model of strategic surprise; one that focuses on the internal make-up of the CIA, and takes seriously those Cassandras who offered warnings, but were ignored. This systematic exploration of the sources of the CIA's intelligence failures points to ways to prevent future strategic surprises.

The Afghanistan Papers Craig Whitlock, The Washington Post. 2022-08-30 A Washington Post Best Book of 2021 The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military became mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, The Afghanistan Papers contains "fast-paced and vivid" (The New York Times Book Review) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had "no visibility into who the bad guys are." His successor, Robert Gates, said: "We didn't know jack shit about al-Qaeda." The Afghanistan Papers is a "searing indictment of the deceit, blunders, and hubris of senior military and civilian officials" (Tom Bowman, NRP Pentagon Correspondent) that will supercharge a long-overdue reckoning over what went wrong and forever change the way the conflict is remembered.

Hubris Michael Isikoff, David Corn. 2007-05-29 The real story behind the investigation of Iraq, and the basis for the MSNBC documentary of the same name hosted by Rachel Maddow Filled with news-making revelations that made it a New York Times bestseller, Hubris takes us behind the scenes at the White House, CIA, Pentagon, State Department, and Congress to show how George W. Bush came to invade Iraq—and how his administration struggled with the devastating fallout. Hubris connects the dots between Bush's expletive-laden outbursts at Saddam Hussein, the bitter battles between the CIA and the White House, the fights within the intelligence community over Saddam's supposed weapons of mass destruction, the outing of an undercover CIA officer, and the Bush administration's misleading sales campaign for war. Written by veteran reporters Michael Isikoff and David Corn, this is an inside look at how a president took the nation to war using faulty and fraudulent intelligence. It's a dramatic page-turner and an intriguing account of conspiracy, backstabbing, bureaucratic ineptitude, journalistic malfeasance, and arrogance.

Evidence-based Conservation Terry C.H. Sunderland, Jeffrey Sayer, Hoang Thi Minh Ha. 2012-09-10 There is a considerable gap between the science of conservation biology and the design and execution of biodiversity conservation projects in the field. Science is often failing to inform the practice of conservation, which remains largely experience-based. The main reason is the poor accessibility of evidence on the effectiveness of different interventions. This is the basis for this book adopting an 'evidence-based approach', modelled on the systematic reviews used in health sciences and now being applied to many policy arenas. Evidence-based Conservation brings together a series of case studies, written by field practitioners, that provides the evidence-base for evaluating how effective conservation and poverty alleviation strategies can be better implemented. A series of systematic reviews uses experiences and data from fifteen integrated conservation and development projects conducted in the Lower Mekong region, specifically in Vietnam, Laos and Cambodia. They provide wide-ranging overviews of the effectiveness of protected areas and how innovative tools and methods for monitoring and evaluation can be utilised for more effective outcomes. Results are in the form of management and policy recommendations, based on the quality of evidence and the cost-utility of the intervention. By bridging the gap between field practice and conservation, the analysis should lead to more effective integrated conservation and development interventions. The book represents one of the first attempts to apply the evidence-based approach to conservation and development.

Treasury's War Juan Zarate. 2013-09-10 For more than a decade, America has been waging a new kind of war against the financial networks of rogue regimes, proliferators, terrorist groups, and criminal syndicates. Juan Zarate, a chief architect of modern financial warfare and a former senior Treasury and White House official, pulls back the curtain on this shadowy world. In this gripping story, he explains in unprecedented detail how a small, dedicated group of officials redefined the Treasury's role and used its unique powers, relationships, and reputation to apply financial pressure against America's enemies. This group unleashed a new brand of financial power -- one that leveraged the private sector and banks directly to isolate rogues from the international financial system. By harnessing the forces of globalization and the centrality of the American market and dollar, Treasury developed a new way of undermining America's foes. Treasury and its tools soon became, and remain, critical in the most vital geopolitical challenges facing the United States, including terrorism, nuclear proliferation, and the regimes in Iran, North Korea, and Syria. This book is the definitive account, by an unparalleled expert, of how financial warfare has taken pride of place in American foreign policy and how America's competitors and enemies are now learning to use this type of power themselves. This is the unique story of the United States' financial war

campaigns and the contours and uses of financial power, and of the warfare to come.

The Next Arms Race Henry D. Sokolski.2015-01-31 With most of the world's advanced economies now stuck in recession; Western support for defense cuts and nuclear disarmament increasing; and a major emerging Asian power at odds with its neighbors and the United States; it is tempting to think our times are about to rhyme with a decade of similar woes—the disorderly 1930s. Might we again be drifting toward some new form of mortal national combat? Or, will our future more likely ape the near-half-century that defined the Cold War—a period in which tensions between competing states ebbed and flowed but peace mostly prevailed by dint of nuclear mutual fear and loathing? The short answer is, nobody knows. This much, however, is clear: The strategic military competitions of the next 2 decades will be unlike any the world has yet seen. Assuming U.S., Chinese, Russian, Israeli, Indian, French, British, and Pakistani strategic forces continue to be modernized and America and Russia continue to reduce their strategic nuclear deployments, the next arms race will be run by a much larger number of contestants—with highly destructive strategic capabilities far more closely matched and capable of being quickly enlarged than in any other previous period in history.

Spying Blind Amy B. Zegart.2009-02-17 In this pathbreaking book, Amy Zegart provides the first scholarly examination of the intelligence failures that preceded September 11. Until now, those failures have been attributed largely to individual mistakes. But Zegart shows how and why the intelligence system itself left us vulnerable. Zegart argues that after the Cold War ended, the CIA and FBI failed to adapt to the rise of terrorism. She makes the case by conducting painstaking analysis of more than three hundred intelligence reform recommendations and tracing the history of CIA and FBI counterterrorism efforts from 1991 to 2001, drawing extensively from declassified government documents and interviews with more than seventy high-ranking government officials. She finds that political leaders were well aware of the emerging terrorist danger and the urgent need for intelligence reform, but failed to achieve the changes they sought. The same forces that have stymied intelligence reform for decades are to blame: resistance inside U.S. intelligence agencies, the rational interests of politicians and career bureaucrats, and core aspects of our democracy such as the fragmented structure of the federal government. Ultimately failures of adaptation led to failures of performance. Zegart reveals how longstanding organizational weaknesses left unaddressed during the 1990s prevented the CIA and FBI from capitalizing on twenty-three opportunities to disrupt the September 11 plot. *Spying Blind* is a sobering account of why two of America's most important intelligence agencies failed to adjust to new threats after the Cold War, and why they are unlikely to adapt in the future.

Battle Of Mogadishu: Anatomy Of A Failure Major Roger N. Sangvic.2015-11-06 By applying Cohen and Gooch's model to the Battle of Mogadishu, this paper shows that the failure of the TFR mission on 3-4 October 1993 was the result of a system failure. Secretary Aspin received far more blame than he deserved for making the decision. Misperception of the real impact tanks and APCs could have had on the overall mission is the real cause of this disproportionate blame. GEN Hoar and GEN Powell, in addition, bear as much responsibility as Secretary Aspin for the decision. Neither of these generals strongly advocated the deployment to Aspin even though the worsening situation on the ground merited their strong support. Both Hoar and Powell's approval recommendations can be characterized as lukewarm. Aspin's real failure was of not being more critical of the conduct of the TFR operations. In light of Secretary Aspin's acknowledged concern over the number of similar operations conducted by TFR and his knowledge that the Administration was seeking a political solution, he should have notified MG Garrison of the policy shift through the JCS and CINCCENT and provided additional guidance on risk. Had Aspin either reassessed the risk of each TFR operation more thoroughly or done a better job coordinating the policy shift in light of the increased risks, it is likely that the three October raid would not have occurred.

Connecting People to Work Aspen Institute.2014 With many Americans striving to build their skills to get jobs in a rapidly changing economy, the workforce development field has seen a significant increase in sector strategies, which focus on the specific skills that employers need and address the real-world challenges facing low-income workers. Maureen Conway and Robert P. Giloth deliver a robust volume featuring perspectives from prominent nonprofit and philanthropy leaders, academics and researchers to capture how sector-based workforce development, in industries ranging from health to construction, has evolved over 30 years - and how it can continue to grow and inform future investments and policy decisions. The book offers lessons for policymakers, philanthropic investors, researchers and local leaders interested in policies and practices that support strong businesses while helping struggling Americans connect to good jobs. *Connecting People to Work* features case studies of organizations implementing sector-based workforce development strategies in the health care, construction, manufacturing and restaurant industries, and highlights how policy and economic changes and new practices among education and training institutions are affecting workforce development efforts. It also includes evaluation results and a review of major sector-financing strategies. The book discusses the need for these workforce strategies at a time when many people are out of work or underemployed and face a labor market that is difficult to navigate. Too many workers today earn too little to make ends meet, and they often lack the time or resources to participate in local education programs that may or may not help them find work. Many low-wage workers often need additional support as they go through training, an approach generally adopted by sector strategies. The results chronicled in the book make clear that such strategies can help create viable opportunities for more Americans to gain the skills they need to achieve greater financial stability.
