Inclusive Designing P. M. Langdon, J. Lazar, A. Heylighen, H. Dong. 2014-07-08 'Inclusive Designing' presents the proceedings of the seventh Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT '14). It represents a unique multi-disciplinary workshop for the Inclusive Design Research community where designers, computer scientists, engineers, architects, ergonomists, policymakers and user communities can exchange ideas. The research presented at CWUAAT '14 develops methods, technologies, tools and guidance that support product designers and architects to design for the widest possible population for a given range of capabilities, within a contemporary social and economic context. In the context of developing demographic changes leading to greater numbers of older people and people with disabilities, the general field of Inclusive Design Research strives to relate the capabilities of the population to the design of products. Inclusive populations of older people contain a greater variation in sensory, cognitive and physical user capabilities. These variations may be co-occurring and rapidly changing leading to a demanding design environment. Recent research developments have addressed these issues in the context of: governance and policy; daily living activities; the workplace; the built environment, Interactive Digital TV and Mobile communications. Increasingly, a need has been identified for a multidisciplinary approach that reconciles the diverse and sometimes conflicting demands of Design for Ageing and Impairment, Usability and Accessibility and Universal Access. CWUAAT provides a platform for such a need. This book is intended for researchers, postgraduates, design practitioners, clinical practitioners, and design teachers.

The Evolution of Language Erica A. Cartmill, Sean Roberts, Heidi Lyn, Hannah Cornish. 2014 This volume comprises refereed papers and abstracts of the 10th International Conference on the Evolution of Language (EVOLANGX), held in Vienna on 14-17th April 2014. As the leading international conference in the field, the biennial EVOLANG meeting is characterised by an invigorating, multidisciplinary approach to the origins and evolution of human language, and brings together researchers from many subject areas, including anthropology, archaeology, biology, cognitive science, computer science, genetics, linguistics, neuroscience, palaeontology, primatology and psychology. For this 10th conference, the proceedings will include a special perspectives section featuring prominent researchers reflecting on the history of the conference and its impact on the field of language evolution since the inaugural EVOLANG conference in 1996.

Assessing Cultural Anthropology Robert Borofsky. 1994 Assesses current theories and approaches in anthropology and envisages future directions of the discipline. Contributors include: Clifford Geertz, Roy Rappaport and Eric Wolf. Contemporary theory is emphasized in the text.

Exploring Developmental Theories Frances Degen Horowitz. 2014-02-25 Through the evaluation and integration of developmental theories, this volume proposes a new structural/behavioral model of development. Dr. Horowitz's model helps account for both the behavioral development of children (with extensions across the life-span) and for the universal and non-universal characteristics in human behavioral development. Exploring Developmental Theories also sheds a new and different light on the nature-nurture or heredity-environment controversy and on the topic of continuity and discontinuity in development. Exploring Developmental Theories: *examines the concepts of stage, structure, and systems; organismic theory; and general system theory; *analyzes open and closed systems as well as organismic and mechanistic world views; *integrates the concepts associated with organismic and mechanistic world views; *examines learning mechanisms and processes that foster the acquisition of behavior, and *discusses the strengths and weaknesses of Gessel, Piaget, and behaviorism in accounting for behavioral development.

Vulnerability as generativity Cristiana Ottaviano, Alessia Santambrogio. 2018-04-10T00:00:00+02:00 This book focuses on parenthood and generativity, considered not only a set of biological functions, but as human and socio-cultural capabilities above and beyond gender differences. The authors reconsider in particular the institution of motherhood, emphasizing the historical and social function of women. Alongside a reflection on the gender role of women as mothers and wives, this volume explores male identities and fatherhood. While claiming that parenthood and care are human characteristics - and not just gendered or female attributes - the authors suggest the adoption of a gynanic perspective on inter-gender relationships.

The Autistic Brain Temple Grandin, Richard Panek. 2014-03-27 'An extraordinary source of inspiration for autistic children, their parents - and all people' Time It's estimated that one in almost a hundred people are diagnosed as being on the autistic spectrum but there is far more hope for them today than ever before thanks to groundbreaking new research. In this fascinating and highly readable book, Temple Grandin offers her own experience as an autistic person alongside remarkable new discoveries about the autistic brain, as well as genetic research. She also highlights long-ignored sensory problems as well as the need to treat autism symptom by symptom, rather than with an umbrella diagnosis. Most exciting of all, she argues that raising and educating children on the autistic spectrum needs to be less about focusing on their weaknesses, and more about fostering their unique contributions.

Autism: A Very Short Introduction Uta Frith. 2008-10-23 What is autism and Asperger syndrome? What are the core symptoms, and what causes them? How early can autism be recognised and what can be done? Why does autism seem to be more and more common? Are we all a little bit autistic? This Very Short Introduction offers a clear statement on what is currently known about autism and Asperger syndrome. Looking at symptoms from the full spectrum of autistic disorders, and evaluating current evidence from neuroscience and genetics, this authoritative and accessible book explores the source and nature of social impairment and exceptional talent. Autism: A Very Short Introduction gives a glimpse of life seen through the eyes of autism.--BOOK JACKET.

Empty Fortress Bruno Bettelheim. 1967 Focusing on three case histories, the author attempts to reveal the problems and struggles of the autistic child.

History Elsa Morante. 2015-02-24 History was written nearly thirty years after Elsa Morante and Alberto Moravia spent a year in hiding among remote farming villages in the mountains south of Rome. There she witnessed the full impact of the war and first formed the ambition to write an account of what history - the great political events driven by men of power, wealth, and ambition - does when it reaches the realm of ordinary people struggling for life and bread. The central character in this powerful and unforgiving novel is Ida Mancuso, a schoolteacher whose husband has died and whose feckless teenage son treats the war as his playground. A German soldier on his way to North Africa rapes her, falls in love with her, and leaves her pregnant with a boy whose survival becomes Ida's passion. Around these two other characters come and go, each caught up by the war which is like a river in flood. We catch glimpses of bombing raids, street crimes, a cattle car from which human cries emerge, an Italian soldier succumbing to frostbite on the Russian front, the dumb endurance of peasants who have lived their whole lives with nothing and now must get by with less than nothing.

Nondestructive Biomarkers in Vertebrates Cristina Fossi, Claudio Leonzio. 2020-01-29 Nondestructive Biomarkers in Vertebrates presents an innovative approach for hazard assessment in vertebrates based on nondestructive rather than destructive methods. The book reviews the state of the art and defines the development and validation procedure of this new strategy. Biological materials, such as blood samples, epithelial tissue, eggs, feathers, and feces that can be obtained without stress or damage to the animal are suggested. Certain traditional studies (blood esterases, blood chemistry, mixed function oxidases, porphyrins, DNA damage, and cytological changes) can be performed on these specimens, along with new tests requiring only very small samples. This approach is developed to benefit protected, threatened species whose existence cannot be further jeopardized by the use of destructive methods. This volume will be particularly useful to ecotoxicologists, wildlife protection personnel, environmental consultants, and conservationist organizations.

Systemic Therapy with Individuals Paolo Bertrando. 2018-05-08 The authors describe the work they are doing with individual clients in Milan.

Locating themselves clearly within the tradition of the Milan approach and more recent social constructionist and narrative influences, and articulating continually a broad systemic framework emphasizing meaning problems in context and relationship, they introduce a range of ideas taken from psychoanalysis, strategic therapy, Gestalt therapy and narrative work. They describe the therapy as Brief/Long-term therapy and introduce new interviewing techniques, such as connecting the past, present and future in a way that releases clients and helps them construct new narratives for the future; inviting the patient to speak to the therapist as an absent family member; and working with the client to monitor their own therapy. The book is written with a freshness that suggests the authors are describing work in progress, and the reader is privy to the authors' own thoughts and reactions as they comment on the process of their therapy cases. This is a demystifying book, for it allows the reader to understand why one particular technique was preferred over another.

Revealing the Inner Worlds of Young Children Robert N. Emde, Dennie Wolf, Dennie Palmer Wolf, David Oppenheim. 2003 Reports the work of a 20-year collaboration between 36 psychologists who have created and investigated a tool to elicit and analyze children's narratives. This tool is the MacArthur Story Stem Battery, a systematic collection of story beginnings that are referred to as 'stems.'

Sensory Perceptual Issues in Autism and Asperger Syndrome Olga Bogdashina. 2003-01-01 This book will assist practitioners who work with autistic people to comprehend sensory perceptual differences in autism. Strategies for dealing with sensory integration dysfunction are presented in a manner that can easily be understood by practitioners and carers.

Bambini super-vaccinati, 2a edizione Eugenio Serravalle. 2014-04-10 Visito bambini da quasi trent'anni, e cerco di curarli sempre in piena scienza e coscienza". Nel corso dei miei studi universitari ho appreso la pratica vaccinale, e per anni ho vaccinato i bimbi affidati alle mie cure con ogni vaccino disponibile sul mercato, fermamente convinto dell'utilità dell'immunizzazione di massa. Ho dedicato molto tempo ai bimbi, ai miei pazienti, sempre col desiderio di andare al fondo dei problemi senza mai fermarmi alla superficie, ma anzi, mantenendo un vivo interesse e un fermo spirito critico. Nel corso della mia attività ho incontrato molti bambini non vaccinati, e poco a poco ho iniziato a rendermi conto che avevo accettato senza riserve il concetto abituale secondo il quale i vaccini, non importa quali, sono sempre efficaci e sicuri. Da lì in poi ho cominciato a constatare che la frequenza delle malattie di età pediatrica più comuni avevano un'incidenza ridotta nei bambini non vaccinati rispetto a quelli vaccinati. Ho incontrato genitori i cui figli si erano o ammalati gravemente o addirittura erano morti a causa del vaccino che gli era stato somministrato. Ho iniziato a vedere questa pratica sotto una luce diversa e a dare nuove interpretazioni alle malattie che avevo visto insorgere dopo una vaccinazione (a volte provocate anche da me) e che prima di allora non avevo mai messo in relazione al vaccino. Ho iniziato a pormi domande diverse, a cercare risposte diverse (non necessariamente obbedienti a logiche routinarie) studiando tutto quello che la letteratura scientifica internazionale metteva a mia disposizione. Eugenio Serravalle è medico specialista in Pediatria Preventiva, Puericultura e Patologia Neonatale. Ha già pubblicato *La salute è servita* (Paideia 2006), *Vaccinare contro il papillomavirus?* (con Roberto Gava, *Salus Infirmorum* 2008), *Tutto quello che occorre sapere prima di vaccinare il proprio bambino* (SI 2009), *Vaccinare contro il tetano?* (con Roberto Gava, *Salus Infirmorum* 2010), *Bambini super-vaccinati*, (*Il leone verde* 2009, 2012 2°ed.) *Le vaccinazioni di massa* (coautore, *Salus Infirmorum* 2013). Da anni è consulente e responsabile di progetti di educazione alimentare di scuole d'infanzia di Pisa, città dove vive, e comuni limitrofi. Già membro della Commissione Provinciale Vaccini della Provincia Autonoma di Trento, relatore in convegni e conferenze sul tema delle vaccinazioni, della salute dei bambini e dell'alimentazione pediatrica in tutta Italia. Making the Patient Your Partner W. Sterling Edwards. 1997-07-30 Health professionals need to learn the communication skills that will create collaborative and mutually satisfying relationships with patients. The failure of doctors to relate effectively to patients results in noncompliance, malpractice suits, longer stays in hospitals and other negative outcomes. Interpersonal skills can be easily learned by studying the techniques described by Gordon and Edwards. Using cases, interviews, dialogues, and vignettes, the authors provide effective models or blueprints for health professionals to follow. Gordon is a psychologist who has pioneered internationally recognized effectiveness training programs widely used by teachers, parents, salesmen, managers, and other professionals. He has published six books that have sold over five million copies in 17 languages. In this work, he has enlisted the expertise of Edwards, a highly respected medical doctor and educator, to provide the necessary insider's view of the health profession. Together they make a convincing case for doctors to develop closer and more collaborative relationships with patients.

Mental Models Philip Nicholas Johnson-Laird. 1983 This book offers a unified theory of the major properties of mind, including comprehension, inference, and consciousness. The author argues that we apprehend the world by building inner mental replicas of the relationships among objects and events that concern us. The mind is essentially a model-building device that can itself be modeled on a computer. The book provides a blueprint for building such a model and numerous important illustrations of how to do it.

Diagnostic Manual--Intellectual Disability 2 (DM-ID) Jarrett Barnhill, Robert J. Fletcher, Sally-Ann Cooper. 2017-07 Improved outcomes for individuals with co-occurring intellectual/developmental disability (IDD) and mental illness depends upon effective psychiatric treatment. Effective treatment requires an accurate psychiatric diagnosis. Obtaining that accurate diagnosis for individuals with IDD has been, and remains, very challenging. This book was written to address this challenge. More than 100 experts from around the world have now updated the DM-ID to accompany the DSM-5.

Depressive Rumination Costas Papageorgiou, Adrian Wells. 2004-02-06 Rumination (recyclic negative thinking), is now recognised as important in the development, maintenance and relapse of recurrence of depression. For instance, rumination has been found to elevate, perpetuate and exacerbate depressed mood, predict future episodes of depression, and delay recovery during cognitive therapy. Cognitive therapy is one of the most effective treatments for depression. However, depressive relapse and recurrence following cognitive therapy continue to be a significant problem. An understanding of the psychological processes which contribute to relapse and recurrence may guide the development of more effective interventions. This is a major contribution to the study and treatment of depression which reviews a large body of research on rumination and cognitive processes, in depression and related disorders, with a focus on the implications of this knowledge for treatment and clinical management of these disorders. * First book on rumination in depressive and emotional disorders * Contributors are the leaders in the field * First editor is a rising researcher and clinician with specialist interest in depression, and second editor is world renowned for his work on cognitive therapy of emotional disorders

The Sustainability Curriculum Cedric Cullingford, John Blewitt. 2013-06-17 The links between education and sustainable development are deepening, although subject to much controversy and debate. The success of the sustainability discourse depends both on the pedagogic and research functions of higher education. Similarly, for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development, but also to be responsive to scrutiny of its own practices in relation to sustainability. Among professionals in higher education, sustainable development has its supporters and detractors. It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines. Although it is not currently an academic discipline in its own right, increasing public and professional familiarity with the term, and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing. This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines, institutional practices, fields of study and methods of enquiry. The contributors, drawn from a wide-range of disciplines, perspectives, educational levels and institutional contexts, examine the purpose of the modern university and the nature of sustainable education, which includes exploring links to social movements for sustainability projects, curriculum change, culture and biodiversity, values relating to gender equality and global responsibility, and case studies on the transformation, or otherwise, of some specific disciplines.

Personality: Determinants, Dynamics, and Potentials Gian Vittorio Caprara, Daniel Cervone. 2000-08-15 This book, first published in 2000, is a comprehensive survey of research and theory in personality psychology.

L'IO della Salute Franco Verzella. 2019-05-31 L'ultimo lavoro letterario di Franco Verzella riguarda l'impatto della comunicazione nel rapporto con il

paziente. Il fine è quello della salute e del benessere, un binomio che deve essere sempre presente nella professione medica. Nei suoi dialoghi con il tempo e i dubbi che giornalmente si pongono in tale combinazione medico-paziente, medico-genitori, Franco riesce ad entrare simbioticamente con la sua empatia, fondata su una eccezionale sensibilità delle scelte comportamentali, soprattutto quando si tratta dei nostri tributi alla patologia. Giulio Tarro Franco Verzella (30 agosto 1939). Nel 1981 ottiene dal Ministro della Pubblica Istruzione il riconoscimento del lavoro pionieristico nel settore della microchirurgia della cataratta, ed è l'unico medico italiano citato, nel 1999, tra gli innovatori nel venticinquesimo anniversario della American Society of cataract and refractive surgery, per il suo contributo originale alla chirurgia refrattiva nella miopia. Dal 1982 si occupa di Medicina Funzionale e Terapia Chelante. Nel settore dell'autismo e disturbi dello sviluppo, opera in collaborazione diretta con Autism Research Institute, San Diego, dal 2004 e presiede DAN! Europe, Associazione, dal giugno 2005. Nel 2005 apre un primo contatto tra l'ufficio tecnico del Ministero della Salute, diretto dal professor Saraceni, ed Autism Research Institute. Nel 2007 promuove il nuovo progetto di legge dedicato all'autismo, a firma dell'Onorevole Teresio Delfino, e partecipa al tavolo nazionale di lavoro sull'autismo aperto dal Ministro della Salute, Livia Turco, che nella relazione finale recepisce per la prima volta l'approccio multidisciplinare per la prevenzione e la cura del bambino autistico. Ha pubblicato: Atlas of extra capsular technique, phacoemulsification and intraocular lenses, Lens edition, 1981; Alla fine del buio, Sugarco, 1986; Miopia elevata in numeri e parole, Antea, 1990; Dialoghi con il tempo, Rebellato, 1990; Nutrizione, mente e salute, Edisai 2002; Senza Obbligo di Lenti, Edisai, 2002; Defeat autism now, Valter Casini editore, 2005; Uscire dall'autismo: un approccio biologico e medico, Maggioli editore, giugno 2008.

A History of Autism Adam Feinstein.2011-07-07 This unique book is the first to fully explore the history of autism - from the first descriptions of autistic-type behaviour to the present day. Features in-depth discussions with leading professionals and pioneers to provide an unprecedented insight into the historical changes in the perception of autism and approaches to it Presents carefully chosen case studies and the latest findings in the field Includes evidence from many previously unpublished documents and illustrations Interviews with parents of autistic children acknowledge the important contribution they have made to a more profound understanding of this enigmatic condition

The Hartmann Era Martin S. Bergmann.2000 Ten papers from an October 1997 conference in New York City review the period when ego psychology dominated American psychoanalysis and its brightest luminary was Heinz Hartmann. Bergmann (psychology, New York U.) contributes the central study, which examines Hartmann's influence on an era that continues to influence the profession. Other topics include the idealization of theory and the aim of adaptation, the interplay of different ways of thinking, and illusion and disillusion in an attempt to present a more reasonable theory of the mind. The final 150 pages is a transcript of discussions. Annotation copyrighted by Book News, Inc., Portland, OR

Psychoanalysis and Neuroscience Mauro Mancina.2007-04-29 Recent scientific studies have brought significant advances in the understanding of basic mental functions such as memory, dreams, identification, repression, which constitute the basis of the psychoanalytical theory. This book focuses on the possibility of interactions between psychoanalysis and neuroscience: emotions and the right hemisphere, serotonin and depression. It is a unique tool for professionals and students in these fields, and for operators of allied disciplines, such as psychology and psychotherapy.

Vaccinazioni, alla ricerca del rischio minore (2a edizione) Eugenio Serravalle.2019-05-07 I vaccini sono tutti uguali? Qual è la durata? Quale l'efficienza? Cosa si intende per immunità di gregge? È la stessa per tutte le malattie? Sono solo alcune delle tante domande cui risponde il libro di Eugenio Serravalle venendo incontro alla necessità di moltissimi genitori di avere un'idea più precisa su tali questioni dopo la tempesta di dichiarazioni, prese di posizione, decreti ministeriali e marce indietro delle stesse istituzioni, che hanno generato confusione e incertezze; e conclusa, per imposizione di legge, con l'introduzione dell'obbligatorietà per 10 vaccinazioni. Restano tuttavia le domande, i dubbi, le argomentazioni pro e contro che un genitore vorrebbe sempre raccogliere, anche se di segno diverso, per capire meglio e senza condizionamenti in che termini stia la questione in Italia e nel mondo, quali dati, esperienze, casi e osservazioni dirette di reazioni avverse non emergano dalla farmaco-vigilanza, e risultino oscurati dalle statistiche dei grandi numeri, pur essendo comunque significativi a livello del singolo individuo. Un libro per i genitori, ma anche per chiunque voglia imparare a distinguere, al di là della questione vaccinale, ciò che è utile alla propria salute dai finti bisogni creati dalla commercializzazione dei farmaci e da alimentazione e stile di vita inadeguati. In un'epoca ossessionata dalle fake news, questo libro rappresenta una lettura indispensabile per imparare ad applicare il senso critico ad argomenti sui quali ci troviamo spesso più indifesi, cioè l'informazione medico-sanitaria diffusa da stampa e televisione. L'Autore accompagna il lettore nel labirinto dei dati e dei termini tecnici con chiarezza e linearità, dedicando anche alcune pagine alla rievocazione della propria esperienza più che trentennale di pediatra, che ha costituito il punto di partenza per valutare, e a volte criticare, alcune tesi ufficiali.

Handbook of Diagnosis and Treatment of Bipolar Disorders Terence A. Ketter.2009-08-26 This readable guide to the assessment and management of patients with bipolar disorder can help physicians keep abreast of dramatic and rapid advances of recent years and integrate them into their practice. Handbook of Diagnosis and Treatment of Bipolar Disorders emphasizes recent controlled studies and FDA-approved indications and translates these data into the real world of clinical practice. The contributions of the eleven chapter authors from Stanford University reflect more than a decade of clinical research and treatment undertaken at that institution, including advances in diagnosis and interventions supported by controlled studies. They provide crucial information regarding diagnosis, pharmacotherapy, psychotherapy, and treatment of patients from special populations -- such as children, women, and older adults -- and patients with particular challenging illness course such as rapid cycling. This is the first book to provide quantitative assessment of potential benefit (number needed to treat) and risk (number needed to harm) for all approved treatments for bipolar disorder, providing clinicians with information needed to balance benefits and risks in order to render individualized state-of-the-art, evidence-based care. It describes all FDA-approved indications -- reviewing efficacy, safety, tolerability, pharmacokinetics, illness phase-specific dosing, and drug interactions. A chapter on multiphase treatment strategy explains crucial illness transition points and describes how these have been integrated with knowledge of illness phase in mood disorders. The book then demonstrates the relevance of this approach to therapeutics by providing: An overview of pharmacotherapy that covers the emergence of evidence-based pharmacotherapy and number-needed-to-treat and -harm analyses. Guidelines to managing acute manic and mixed episodes that include evidence-based assessments of lithium, divalproex, carbamazepine, and second-generation antipsychotics. Coverage of acute major depressive episodes in bipolar disorders that outlines four tiers of treatment for this most pervasive illness phase with the fewest approved treatments. Discussion of the longer-term management of bipolar disorders, including reviews of controlled trials of recently approved pharmacotherapies such as lamotrigine, olanzapine, aripiprazole, and adjunctive quetiapine. A review of the use of mood stabilizers and second-generation antipsychotics, often in combinations, as well as the controversial role of adjunctive antidepressants in treating patients with rapid-cycling bipolar disorders. Description of important advances in evidence-based adjunctive psychotherapeutic interventions in bipolar depression, and bipolar maintenance treatment. Comprehensive in scope, yet readily accessible for application to clinical practice, the book includes summary tables, quick-reference lists of clinical pearls, and case studies to make its content more relevant. Handbook of Diagnosis and Treatment of Bipolar Disorders is the ideal source for integrating recent research into everyday practice.

ABC of Mental Health Teifion Davies, Tom Craig.2009-07-06 Mental health services have changed completely in the UK, and the new edition of ABC of Mental Health has been thoroughly updated and revised to reflect this. Providing clear practical advice on how to recognise, diagnose and manage mental disorders successfully and safely, with sections on selecting drugs and psychological treatments, and improving compliance, ABC of Mental Health also contains information on the major categories of mental health disorders, the mental health needs of vulnerable groups (such as the elderly, children, homeless and ethnic minorities) and the psychological treatments. Fully up to date with recent mental health legislation, this new edition is as comprehensive as it is invaluable. By covering the mental health needs of special groups, this ABC equips GPs, hospital doctors, nurses, counsellors and social workers with all the information they need for the day to day management of patients with mental health problems.

Contingencies of Reinforcement B. F. Skinner.2014-07-01 B. F. Skinner titled this book, Contingencies of Reinforcement, after the heart of his science of behavior. Contingencies relate classes of actions to postcedent events and to the contexts in which those action-postcedent relations occur. The basic processes seem straightforward, but many people do not know or understand the underlying theory. Skinner believed that 'a theory is

essential to the scientific understanding of behavior as a subject matter". This book presents some of Skinner's most sophisticated statements about theoretical issues. To his original articles, he added notes to clarify and expand subtle points. The book thus provides an overview of Skinner's thinking about theory and the philosophy underpinning the science he began.

A cavallo del sole Alessandra Matturri.2020-04-08 Un bambino autistico, una madre tenace, un medico ispirato e un padre che si allontana. E ancora, un amore e un innamoramento antichi, presenze forti e assenze reali o presunte. Su uno sfondo di segreti e traumi, emozioni e pensieri, scelte dettate dal cuore o dall'onore, appare un miracoloso protocollo americano che produce la parziale o quasi totale "cura" dalla sindrome di Asperger. La sofferenza, la determinazione e la forza stringono e sciolgono in questo libro i nodi di un variopinto arazzo di esistenze. Alessandra Matturri, avvocato penalista, ha da sempre la passione per la scrittura. Lasciata la professione per dedicarsi al secondogenito affetto da sindrome di Asperger, combatte da anni per il suo futuro accompagnandolo nella risoluzione dallo spettro autistico e nel conseguimento di risultati scolastici a livello universitario per un normale inserimento sociale e professionale.

Occupational Therapy for Older People Christian Pozzi, Alessandro Lanzoni, Maud J. L. Graff, Alessandro Morandi.2020-01-31 This book focuses on evidence-based occupational therapy in the care of older adults in different clinical settings, from home to acute hospital, from intensive care unit to rehabilitation centers and nursing homes. Occupational therapy has progressively developed as a new discipline aiming to improve the daily life of individuals of different ages, from children to older adults. The book first reviews the interaction between occupational therapy and geriatrics and then discusses in depth how occupational therapy interventions are applied in the community, in the acute hospital and in the nursing home. It highlights the key role of occupational therapy in the management of frail patients, including critically ill older patients and persons with dementia, and describes in detail how to maintain occupational therapy interventions across different settings to avoid the fragmentation of care. The ageing population requires new innovative approaches to improve the quality of life, and as such this book provides clinicians with handy, key information on how to implement occupational therapy in the daily clinical care of older adults based on the current scientific evidence.

World Hypotheses Stephen C. Pepper.2023-11-10 World hypotheses correspond to metaphysical systems, and they may be systematically judged by the canons of evidence and corroboration. In setting forth his root-metaphor theory and examining six such hypotheses—animism, mysticism, formism, mechanism, contextualism, and organicism—Pepper surveys the whole field of metaphysics. Because this book is an analytical study, it stresses issues rather than men. It seeks to exhibit the sources of these issues and to show that some are unnecessary; that the rest gather into clusters and are interconnected in systems corresponding closely to the traditional schools of philosophy. The virtue of the root-metaphor method is that it puts metaphysics on a purely factual basis and pushes philosophical issues back to the interpretation of evidence. This book was written primarily as a contribution to the field, but its plan excellently suits it for use as a text in courses in metaphysics, types of philosophical theory, or present tendencies in philosophy.

Biomarkers in Bipolar Disorders Rodrigo Machado-Vieira, Jair Soares.2022-01-16 Biomarkers in Bipolar Disorders summarizes cutting-edge findings in biomarkers' research, emphasizing the most promising findings, tools and technologies relevant to drug development and personalized medicine. Key findings cover different levels of evidence such as genes, molecules, cells, systems, brain and behavior related to diagnosis (state and trait/endophenotypes), prediction of treatment response and follow-up outcomes, along with the most promising perspectives in each area. Each section includes a comprehensive and focused overview on the state-of-the-art and perspectives. The book concludes with a section on practical applications, encompassing diagnostics development (genetic testing, biomarkers), and new drug development. Edited by Dr. Rodrigo Machado-Vieira and Dr. Jair C. Soares, and contributed by leading experts in the field of biomarker research, this book will become the leading tool for all researchers and clinicians in Bipolar Disorder. Describes strategies for the biomarker discovery of relevant proteins differentially expressed in Bipolar Disorder Presents techniques and main findings in transcriptome research related to CNS synaptic function Provides an overview on current behavioral strategies and their validity in drug development in Bipolar Disorder Discusses current genetic findings, integrating tests for treatments leading to personalized treatments

Neurotribes Steve Silberman.2016-08-23 This New York Times–bestselling book upends conventional thinking about autism and suggests a broader model for acceptance, understanding, and full participation in society for people who think differently. What is autism? A lifelong disability, or a naturally occurring form of cognitive difference akin to certain forms of genius? In truth, it is all of these things and more—and the future of our society depends on our understanding it. Wired reporter Steve Silberman unearths the secret history of autism, long suppressed by the same clinicians who became famous for discovering it, and finds surprising answers to the crucial question of why the number of diagnoses has soared in recent years. Going back to the earliest days of autism research, Silberman offers a gripping narrative of Leo Kanner and Hans Asperger, the research pioneers who defined the scope of autism in profoundly different ways; he then goes on to explore the game-changing concept of neurodiversity. NeuroTribes considers the idea that neurological differences such as autism, dyslexia, and ADHD are not errors of nature or products of the toxic modern world, but the result of natural variations in the human genome. This groundbreaking book will reshape our understanding of the history, meaning, function, and implications of neurodiversity in our world.

Autism as an Executive Disorder James Russell.1997 Autism continues to fascinate researchers because it is both debilitating in its effects and complex in its nature and origins. The prevalent theory is that autism is primarily characterised by difficulties in understanding mental concepts, but the contributors to this book present new and compelling arguments for an alternative theory. Their research points strongly to the idea that autism is primarily a disorder of executive functions, those involved in the control of action and thought. As such, the book provides a new and controversial perspective on this important question.
