*Global Arctic* Matthias Finger, Gunnar Rekvig. 2022-02-25 The Arctic has become a global arena. This development can only be comprehensively understood from a transdisciplinary perspective encompassing ecological, cultural, societal, economic, industrial, geopolitical, and security considerations. This book offers thorough explanations of Arctic developments and challenges. Global warming is in large part the driving force behind the transformation of the Arctic by making access possible to the areas previously out of reach for mining and shipping. An all-year ice-free Arctic Ocean, a reality possible as soon as perhaps 2030, creates a new dynamic in the North. The retreating ice edge enables the exploitation of previously inaccessible resources such as hydrocarbon deposits and rare metals, as well as the shortest sea route from Asia to Europe. Consequently, the Northern Sea Route (NSR) promises faster and cheaper shipping. Russia, along side foreign investment, especially from China, is financing the needed infrastructure. A warming Arctic, however, also has negative impacts. The Arctic is home to fragile ecosystems that are already showing signs of deteriorating. The Arctic has seen unprecedented wildfires, which, together with the release of trapped methane from the disappearing permafrost, will, in turn, accelerate global warming. A warmer Arctic Ocean will also negatively impact fisheries. Couple this with other global changes, such as ocean acidification and modified ocean currents, and the global outlook is bleak. Additionally, the security situation in the Arctic is worsening. After the 2014 Ukraine crisis, the West imposed sanctions on the Russian Federation, which have revived the divisions of the Cold War. The reemergence of these postures is threatening the highly successful Barents Cooperation and other initiatives for peace in the circumpolar North. This book offers new insights and presents arguments for how to mitigate the challenges the Arctic is facing today.

*Hard Work Conquers All* Michel S. Beaulieu, David K. Ratz, Ronald N. Harpelle. 2017-11-15 Above the entrance to the Finnish Labour Temple in Thunder Bay is the motto labor omnia vincit – “hard work conquers all” – reflecting the dedication of the Finnish community in Canada. *Hard Work Conquers All* examines Finnish community building in Canada during the twentieth century. Waves of immigrants imbued the relationship between people, homeland, and host country with the politics, ideologies, and cultural expressions of their time. This collection of essays explores the cultural identities of Finnish Canadians, their ties to Finland, intergenerational cultural transfer, and the community’s connections with socialism and labour movements. It offers new interpretations of the influence of Finnish immigration on Canada.

**Russia’s Foreign Energy Policy** Kenan Aslanli. 2023-08-31 This book examines Russia’s multidimensional foreign energy policy and the emerging and ongoing conflicts with energy-consuming and transit countries. *Russia’s Foreign Energy Policy* examines whether the interdependence patterns shaped through various channels (such as foreign trade, investment, finance, technology, and social interactions) between Russia and energy-importing countries could prevent energy-based conflict. Drawing on semi-structured expert interviews, Kenan Aslanli challenges the one-sided conventional wisdom that focusses on foreign policy ambitions and overlooks the peculiarities of the energy dimension. Instead, Aslanli highlights the complexity of contemporary energy affairs using a holistic approach that goes beyond geopolitics. He examines various energy types such as crude oil, natural gas, and nuclear and considers a diverse range of actors which include energy companies and international organizations. Using examples from Europe, Asia, and the Middle East, Aslanli demonstrates how the Russian strategy of using energy resources as a tool or energy weapon for foreign policy goals has a diminishing return in the long run. This book will be of great interest to students and scholars of energy policy, foreign policy, and Russian studies more broadly.

GEO SAISON 09/2022 - Gute Reise! GEO SAISON Redaktion. 2022-08-16 Ich schreibe diesen Text am bislang heißesten Tag des Jahres und in der Hoffnung, dass Erinnerungen nicht nur wärmen, sondern auch kühlen können. Also, Beginn Zeitreise: Ich hatte mein Studium fast abgeschlossen, wollte aber noch ein Auslandssemester einlegen. So landete ich durch Zufall im Winter in einer kleinen finnischen Stadt mit unaussprechlichem Namen, wo die Tage zunächst so kurz waren, dass ich mich ständig fragte, ob es schon wieder oder noch immer dunkel sei. Viel Zeit nutzte ich daher für Streifzüge durchs nahe Helsinki. Von Beginn an beeindruckte mich dort die Liebe zu Design und Architektur, die Aufgeschlossenheit für alles Neue. Die Bibliotheken, die Museen, die Cafés mit Internetterminals – alles war moderner, als ich es kannte. Es wundert nicht, dass sich Helsinki – wie Sie in meiner Lieblingsgeschichte ab S. 98 lesen können – längst auf den Weg zur klimaneutralen Stadt gemacht hat. Und es wundert genauso wenig, dass so viele smarte nachhaltige Ideen aus Finnland kommen und aus Norwegen, Schweden, Dänemark und Island. Eben darum haben wir dem »nachhaltigen Norden« ein ganzes Heft gewidmet. In Finnland übrigens blieb mir nur die Sprache fremd. Am Ende des Aufenthalts beherrschte ich lediglich die wenig hilfreiche Lüge Minun koira on sairas (Mein Hund ist krank) und Rakastan Helsinkiä. Das heißt: »Ich liebe Helsinki« – und ist bis heute die reine Wahrheit. Viel Spaß beim Lesen und Nachreisen!

**Classification and Inventory of the World’s Wetlands** C.M. Finlayson, Arnold van der Valk. 2012-12-06 This book brings together, for the first time, information on various wetland classification systems and wetland inventories from around the world, outlining regional, national and local wetland classifications developed in Africa, Australia, Canada, China, Europe, India, South America and the USA. Oriented towards the conservation and management of wetlands, these existing national and regional classification systems have been useful in providing an essential base for the development of an international system. The volume also reviews various attempts at drawing up an inventory of wetlands in different parts of the world, ranging from field and literature surveys to highly sophisticated efforts using aerial photography and satellite imaging. Audience: Workers in wetland ecology, especially those working on classification, inventory, conservation, or management of wetlands at the local, national, regional or international levels.

Information Studies for Arctic Social Sciences and Humanities serves as a key interdisciplinary title that links the social sciences and humanities with current issues, trends, and projects in library, archival, and information sciences within shared Arctic frameworks and geographies. Including contributions from professionals and academics working across and on the Arctic, the book presents recent research, theoretical inquiry, and applied professional endeavours at academic and public libraries, as well as archives, museums, government institutions, and other organisations. Focusing on efforts that further Arctic knowledge and research, papers present local, regional, and institutional case studies to conceptually and empirically describe real-life research in which the authors are engaged. Topics covered include the complexities of developing and managing multilingual resources; working in geographically isolated areas; curating combinations of local, regional, national, and international content collections; and understanding historical and contemporary colonial-industrial influences in indigenous knowledge. Library and Information Studies for Arctic Social Sciences and Humanities will be essential reading for academics, researchers, and students working the fields of library, archival, and information or data science, as well as those working in the humanities and social sciences more generally. It should also be of great interest to librarians, archivists, curators, and information or data professionals around the globe.

**Communicating the North** Peter Stadius.2016-05-23 What makes a magazine in South Africa promote Scandinavian unity among its immigrant readers and why does a Swedish king endorse attempts to influence pan-Scandinavian opinion through a transnational media event in Sweden, Norway and Denmark? Can portraits of exotic Lapplanders in the British press, enthusiastic accounts of the welfare state in post-war travel literature and descriptions of the liberal Nordic woman as a metaphor for a freer society in Franco Spain really be bundled together under a joint label of 'Nordicness'? How is it that despite the variety of images of the Nordic region that are circulating, we still find this recurring idea of a shared Nordic identity? These are some of the questions the current volume seeks to answer. Covering the time period from the early nineteenth century up until the present and encompassing case studies from Britain, Spain, Poland, and South Africa, as well as from the Nordic countries, contributors to the volume investigate the images that have been presented of the Nordic region in the media in and outside of the Nordic countries, how such images have been shaped by mechanisms of mediation, and the channels through which they have been distributed. The chapters address both specific cases such as media events and individual publications, as well as the structural and institutional settings for mediating the Nordic region.

**Nordic Experiences in Pan-nationalisms** Ruth Hemstad,Peter Stadius.2023-06-30 This book seeks to reassess and shed new light on pan-nationalisms in general and on Scandinavianism/Nordism in particular, by seeing them as possible futures and as interconnected ideas and practices across and beyond Europe. An actor and practice oriented approach is applied at the expense of more essentialist categorizations of what pan-nationalism is, or is not to underline both the synchronic and diachronic diversity of various pan-national movements. A range of expert international scholars discuss encounters, transfers, similarities and differences among pan-movements in Norden and Europe based on a broad empirical material, focusing on Scandinavianism/Nordism, pan-Slavism, pan-Turanism, pan-Germanism and Greater Netherlandism, and the position of Britishness in Great Britain. This book will be of key interest to scholars and students of nationalism, European history, European studies and Scandinavian studies, history, social science, political geography, civil society and literary studies.
