Let's Make Cake! (Bobo and Pup-Pup) Vikram

Madan.2021-11-09 A hilarious new series about best friends Bobo and Pup-Pup--a monkey and a dog with very different personalities. Perfect for fans of Elephant & Piggie! Bobo and Pup-Pup are making a cake! Pup-Pup reads the ingredients and Bobo gathers them. Sugar and butter, no problem! Bobo brings salt and lemons. But wait, those are not on the ingredient list! Bobo nabs a lot of things that are not in the recipe. Well, it's an experiment! It will still taste great...won't it? Even if the result isn't perfect, Bobo and Pup-Pup are happy to spend time together. Doing things with your best friend is always fun! This hilarious and relatable graphic picture book will have kids as young as 2 years old—and up to age 7—laughing out loud. New readers will gain confidence and everyone will be eager to devour the companion books, *We Love Bubbles!*; *The Funny Book*; and *Hatch an Egg!* Graphic chapter books serve as a great bridge to graphic novels and longer chapter books.

The Rodent Order Rebecca Stefoff. 2009 Two of every five mammals on Earth are rodents, yet most people know little about this amazingly diverse order of animals. Rats and mice may be all too familiar, but what about gundis and degus? And did you know that porcupines are rodents, but rabbits are not? The Rodent Order explores the world of rodents, from prehistoric guinea pigs the size of horses to the Laotian rock rat, a living fossil recently found alive in the forests of Southeast Asia. The Rodent Order also examines the long relationship between people and rodents. For thousands of years, rodents have influenced human life as pests, food, pets, and carriers of disease. Today human activities are threatening the survival of some rodent species, but other rodents are flourishing-sometimes right under our noses. Book jacket.

an authentic Andy Warhol painting need to be painted by Andy Warhol? Why do audiences feel outraged when they find out that scenes from their beloved blockbuster documentaries are staged? Can people move past assuming that a diamond grown in a lab is a fake? What happens when a forged painting or manuscript becomes more valuable than its original? This is a book about genuine fakes - the curious and complex objects that provoke these very sorts of questions. Genuine fakes fall into the space between things that are real and things that are not; whether or not we think that those things are authentic is a matter of perspective. Unsurprisingly, the world is full of genuine fakes - full of things that defy simple categorisation. From stories of audacious forgeries to feats of technological innovation, historian Lydia Pyne explores how the authenticity of eight genuine fakes depends on their unique combinations of history, science and culture. The stories of art forgeries, fake fossils, nature documentaries, synthetic flavours, museum exhibits, Maya codices and Palaeolithic replicas show that genuine fakes are both complicated and change over time. Drawing from historical archives, interviews, museum exhibits and science fiction as well as her own research, Pyne brings each genuine fake to life through unexpected and often outrageous stories. Genuine Fakes will make readers think about all the unreal things they encounter in their daily lives, and why they invoke the reactions - surprise, wonder, understanding or annoyance - that they do.

Suicidal Jesse Bering.2020-10-23 For much of his thirties, Jesse Bering thought he was probably going to kill himself. He was a successful psychologist and writer, with books to his name and bylines in major magazines. But none of that mattered. The impulse to take his own life remained. At times it felt all but inescapable. Bering survived. And in addition to relief, the fading of his suicidal thoughts brought curiosity. Where had they come

from? Would they return? Is the suicidal impulse found in other animals? Or is our vulnerability to suicide a uniquely human evolutionary development? In *Suicidal*, Bering answers all these questions and more, taking us through the science and psychology of suicide, revealing its cognitive secrets and the subtle tricks our minds play on us when we're easy emotional prey. Scientific studies, personal stories, and remarkable cross-species comparisons come together to help readers critically analyze their own doomsday thoughts while gaining broad insight into a problem that, tragically, will most likely touch all of us at some point in our lives. But while the subject is certainly a heavy one, Bering's touch is light. Having been through this himself, he knows that sometimes the most effective response to our darkest moments is a gentle humor, one that, while not denying the seriousness of suffering, at the same time acknowledges our complicated, flawed, and yet precious existence. Authoritative, accessible, personal, profound—there's never been a book on suicide like this. It will help you understand yourself and your loved ones, and it will change the way you think about this most vexing of human problems.

Envisioning Media Power Brett Christophers.2009-04-16

Envisioning Media Power develops an original geographical perspective on the nature and exercise of power in the international television economy, focusing on the UK and New Zealand markets, and on their respective relationships with the U.S. market and its globally-influential media corporations. In illuminating the fabric of television's international space economy, the book argues that power, knowledge and geography are inseparable not only from one another, but from the process of accumulation of media capital.

there is big hole in your life what do you do? You pack up and go to an old log cabin sitting on a cliff in the middle of nowhere. As you have done all your life. Except now you are alone. In the middle of the Canadian Shield. In the silence of the surrounding bush the days of summer are journaled. There are expected challenges and a few unexpected surprises. Told with an awareness of the absurd and an eye to the funny the healing process progresses. Just for the hell of it a few stories and poems are thrown in. It's all about remembering what was, accepting what is, and rediscovering the beauty [and fragility] of our wilderness.

Now revealed: scientific secrets of genetics, species, extinction, evolution, and animal thought! Zoologists and conservationists are making heroic efforts to rebuild populations of certain animal species on the verge of extinction. These populations are often rebuilt from very small numbers of individuals. What risks do these populations face as a result of this lack of genetic diversity? The rebuilding of the California condor population is a case in point....

spellbinding How does life work? How does nature produce the right numbers of zebras and lions on the African savanna, or fish in the ocean? How do our bodies produce the right numbers of cells in our organs and bloodstream? In *The Serengeti Rules*, award-winning biologist and author Sean Carroll tells the stories of the pioneering scientists who sought the answers to such simple yet profoundly important questions, and shows how their discoveries matter for our health and the health of the planet we depend upon. One of the most important revelations about the natural world is that everything is regulated—there are rules that regulate the amount of every molecule in our bodies and rules that govern the numbers of every animal and plant in the wild. And the most surprising revelation about the rules that regulate life at such different scales is that they are remarkably similar—there is a common underlying logic of life. Carroll recounts how our deep knowledge of the rules and logic of the human body has spurred the advent of revolutionary life-saving medicines, and makes the compelling case that it is now time to use the Serengeti Rules to heal our ailing planet. A bold and inspiring synthesis by one of our most accomplished biologists and gifted storytellers, *The Serengeti Rules* is the first book to illuminate how life works at vastly different scales. Read it and you will never look at the world the same way again.

Everything You Know About Animals is Wrong Matt

Brown.2020-03-25 A humorous and informative book, debunking a range of commonly held myths about animals. Camels store water in their humps and magpies love to steal shiny objects. Or do they? A must-read in the Everything you Know series, this book debunks a range of old-cod stories about animals in author Matt Brown's inimitable humorous and fascinating style. Covering everything from the myth that lemmings throw themselves off cliffs in suicide (they don't, but on occasion some just fall off) to the one about bats being blind (they're not, and they can see but use the more sophisticated echolocation for certain hunting). From head in the sand ostriches to cats landing on their feet, a wealth of information on our beloved pets to creepy crawlies and wild giants, this book will set the marvel of the animal world straight. Plus, there are special features on the odd diets of animals and how wrongly they are portrayed in the movies. All the old stories and myths about animals we've had since childhood are gleefully debunked in a hugely entertaining book.

Bull*t** Steven Elliott.2015-01-07 Our beautiful World is full of lies. Why? Why do people feel such a desperate need to cling to lies, untruths and fantasy? Is the World not beautiful enough without filling it with falsehoods? Over the centuries many men and women have written many thousands of books explaining and supporting lies. In all fairness, the majority of those authors have undoubtedly believed the lies of which they wrote. But that does not excuse the pernicious spreading of lies. I believe it is time that we came out of the dark and entered the light. And I propose to do my bit to lift the veil through this small work. Men and women have been permitted down the ages to spread lies and misinformation. Am I not allowed to endeavor to spread some truth?

Femme Fatale Carole Nelson Douglas. 2007-04-01 Irene Adler is the only woman ever to have outwitted Sherlock Holmes... and the one who has come closest to stealing his heart. She has competed (and sometimes cooperated) with the famous fictional detective over six popular and acclaimed novels, featuring her daring investigations across the Continent. All along, the beautiful and brilliant American diva-turned-detective has managed to conceal her background and history, even from her dashing barrister husband, Godfrey Norton, and her devoted companion and biographer, English spinster Nell Huxleigh. But she has had some help along the way to do this, from such unlikely sources as the Baron de Rothschild, Sarah Bernhardt, and Bram Stoker, as well as the soon-to-be-infamous Nellie Bly, a daring American journalist who helped Irene hunt Jack the Ripper. Now Nellie has wired Irene some astounding news, news that will shake her world: Irene's mother is the target of an assassin. Irene's past is shrouded in secrecy, and at first she is unwilling to divulge anything that would link her to America. But a series of bizarre killings in New York City draws her reluctantly back to her native country, where she must race with a murderer to find her mother, a woman of mystery who may turn out to be the most notorious woman of the nineteenth century. As Irene
