**Foundations of Macroeconomics** Robin Bade,Michael Parkin.2001 In Foundations of Macroeconomics, Robin Bade and Michael Parkin provide a serious, yet accessible economics course that is focused on helping students understand the basic principles of economics, connecting these principles to today's economic issues, and developing a lasting interest in economics as a relevant part of their own lives. Foundations of Macroeconomics features a tightly constructed pedagogical approach that never wavers from its goal to give students an in-depth understanding of important economic principles in a way that is clear, concise, and concerned every step of the way with engaging students' interest and understanding. This text is shorter than most and focused on key concepts but not watered down. The glue that holds together the chapters and the entire teaching/learning package is the Checkpoint feature. Bade and Parkin know that the best time to review material is when it's fresh in students' minds. Checkpoints reinforce the key points of the chapter by amplifying concepts with a full page of practice problems and solutions that immediately reinforce the learning objectives and strengthen students' understanding of the material. Efoundations, the text's Web site, free with the purchase of any new copy of the book, includes a complete eText, integrated links to the eStudy Guide, Foundations Interactive, Economics in the News, and a full range of Web resources including self assessment quizzes with links back to the eText.

**Economics for Everyone** Jim Stanford.2015 Economics is too important to be left to the economists. This concise and readable book provides non-specialist readers with all the information they need to understand how capitalism works (and how it doesn't). Economics for Everyone, now published in second edition, is an antidote to the abstract and ideological way that economics is normally taught and reported. Key concepts such as finance, competition and wages are explored, and their importance to everyday life is revealed. Stanford answers questions such as 'Do workers need capitalists?', 'Why does capitalism harm the environment?', and 'What really happens on the stock market?' The book will appeal to those working for a fairer world, and students of social sciences who need to engage with economics. It is illustrated with humorous and educational cartoons by Tony Biddle, and is supported with a comprehensive set of web-based course materials for popular economics courses.--Publisher's description.
