Increasing Resistance of Wood Pallets to Handling Impacts Robert K. Stern.1975 Nearly one-eight of the lumber produced in the United States goes into wood pallets, stimulating the Forest Products Laboratory to search for better techniques of pallet construction and handling. Extensive research at the Laboratory centered on impacts between pallets and forklift tines during loading. This report covers two successive studies that showed: The strong desirability of using an 'impact panel' attachment to the forklift trucks that handle wood pallets; and a strong advantage in butting the first and second top end deckboards if the pallets are to be handled by a conventional forklift truck. Use of an impact panel can greatly decrease the damage to reuseable pallets.

*Daily Inspection Checklist and Preventative Maintenance Log* Lewis Liftwell.2019-08-08 Track main safety checkpoints every day on each truck before employees operate fork lifts. This book prompts employees to check safety features such as fluid levels, gauges, tires, battery, lift system, plates, stickers, exhaust, belts, and hydraulic controls, and prompts employees to include their initials. There is also a signature log to record employees' printed names and examples of their initials for tracking purposes. Further, several pages at the back of the book prompt mechanics to record the dates, billing numbers, parts numbers, and a narrative of services performed for preventative maintenance on each truck.
