Integrative Addiction and Recovery Shahla Modir, George Munoz. 2018-11-13 Integrative Addiction and Recovery offers an authentic model of comprehensive integrative modalities germane and specific to the field of addiction and recovery treatment. Although many treatment services for addiction include holistic, alternative, or integrative in their descriptions, they contain no substantive programs or services consistent with the mind, body, spirit paradigm contained within the integrative approach to health and healing. Consequently, many patients do not have the opportunity to benefit from the true spirit of an integrative approach within the discipline of addiction and recovery medicine. This book sets the standard for a bona fide integrative approach for others to follow, providing information that is immediately useful in clinical practice and rigorously evidence-based. Authored by world-class experts in the field of addiction medicine, Integrative Addiction and Recovery presents both scientific and holistic data regarding a wide variety of holistic and conventional approaches to the treatment of substance abuse and behavioral addictions. Its chapters cover both conventional and holistic treatment and provide background for each of the major classes

of drugs of abuse, including opiates, alcohol, tobacco, stimulants, sedative-hypnotics, hallucinogens and marijuana. It also includes chapters on the topics of food addiction and behavioral addictions such as gambling and shopping. The authors explore the major holistic modalities, providing background and theory in areas like acupuncture, Traditional Chinese Medicine, Homeopathy, Aromatherapy, and Ayurvedic Medicine, while at the same time providing spiritual approach chapters on Shamanism and Ibogaine, as well as more conventional issues with a holistic view including Co-Occurring Disorders and Psychosocial Treatment, and Group Support. The very complex issue of chronic pain and addiction is also addressed, along with relapse prevention strategies.

Islamic Psychology G. Hussein Rassool. 2021-03-31 Islamic Psychology or ilm an-nafs (science of the soul) is an important introductory textbook drawing on the latest evidence in the sub-disciplines of psychology to provide a balanced and comprehensive view of human nature, behaviour and experience. Its foundation to develop theories about human nature is based upon the writings of the Qur'an, Sunna, Muslim scholars and contemporary research findings. Synthesising contemporary empirical psychology and Islamic psychology, this book is holistic in both nature and process and includes the physical, psychological, social and spiritual dimensions of human behaviour and experience. Through a broad and comprehensive scope, the book addresses three main areas: Context, perspectives and the clinical applications of applied psychology from an Islamic approach. Microbiological Risk Assessment Associated with the Food Processing and Distribution Chain Jeanne-Marie

Membre. 2022-05-23 According to the World Health Organization, one in every ten people worldwide falls ill from eating contaminated food every year, with 550 million cases of diarrheal diseases. Microbiological risk assessment aims to characterize the nature and probability of harm resulting from human exposure to the biological agents that are present in foodstuffs. This assessment must take into account all stages of the chain: from the production of raw materials to consumption. After briefly introducing food safety and risk assessment, this book details the four major steps of microbiological risk assessment. The contributors first present hazard identification and then exposure assessment, which is subdivided into methods for the detection and enumeration of pathogens and for the quantification of the level of exposure. Then, hazard characterization is subdivided into pathogenicity mechanisms and quantification of the dose-response relationship. Finally a guide for microbiological risk characterization is provided. The conclusion presents possible development avenues for microbiological risk assessment, particularly its integration into a holistic assessment of food systems.

Helton. 2018-02-24 This book offers a comprehensive overview to chronic illness care, which is the coordinated, comprehensive, and sustained response to chronic diseases and conditions by a range of health care providers, formal and informal caregivers, healthcare systems, and community-based resources. Using an ecological framework, which looks at the interdependent influences between individuals and their larger environment, this unique text examines chronic illness care at multiple levels and includes sections on the individual influences on chronic illness, the role of family and social networks, and how chronic care is provided across the spectrum of health care settings; from home to clinic to the emergency department to hospital and residential care facilities. The book describes the organizational frameworks and strategies that are needed to provide quality care for chronically ill patients, including behavioral health, care management, transitions of care, and health information technology. The book also addresses the changing workforce needs in health care, and the fiscal models and policies that will be required to meet the needs of this population, with a focus on sustaining the ongoing transformation in health care. Six-Hohenbalken.2017-04-07 This book focuses on the ethical, aesthetic, and scholarly dimensions of how genocide-related works of art, documentary films, poetry and performance, museums and monuments, music, dance, image, law, memory narratives, spiritual bonds, and ruins are translated and take place as translations of acts of genocide. It shows how genocide-related modes of representation are acts of translation which displace and produce memory and acts of remembrance of genocidal violence as inheritance of the past in a future present. Thus, the possibility of representation is examined in light of what remains in the aftermath where the past and the future are inseparable companions and we find the idea of the untranslatability in acts of genocide. By opening up both the past and lived experiences of genocidal violence as and through multiple acts of translation, this volume marks a heterogeneous turn towards the future, and one which will be of interest to all scholars and students of memory and genocide studies, transitional justice, sociology, psychology, and social anthropology.

From Religious Empires to Secular States Birol

Başkan.2014-03-26 In the 1920s and the 1930s, Turkey, Iran and Russia vehemently pursued state-secularizing reforms, but adopted different strategies in doing so. But why do states follow different secularizing strategies? The literature has already shattered the illusion that secularization of the state has been a unilinear, homogeneous and universal process, and has convincingly shown that secularization of the state has unfolded along different paths. Much, however, remains to be uncovered. This book provides an in-depth comparative historical analysis of state secularization in three major Eurasian countries: Turkey, Iran and Russia. To capture the aforementioned variation in state secularization across three countries that have been hitherto analyzed as separate studies, Birol Başkan adopts three modes of state secularization: accommodationism, separationism and

eradicationism. Focusing thematically on the changing relations between the state and religious institutions, Başkan brings together a host of factors, historical, strategic and structural, to account for why Turkey adopted accommodationism, Iran separationism and Russia eradicationism. In doing so, he expertly demonstrates that each secularization strategy was a rational response to the strategic context the reformers found themselves in.

Russian Experimental Fiction Edith W. Clowes.2014-07-14 In the three decades following Stalin's death, major underground Russian writers have subverted Soviet ideology by using parody to draw attention to its basis in utopian thought. Referring to utopian writing as diverse as Defoe's Robinson Crusoe, Dostoevsky's Notes from Underground, and Orwell's Animal Farm, they have tested notions of truth, reality, and representation. They have gone beyond their precursors by experimenting with the tensions between ludic and didactic art. Edith Clowes explores these meta-utopian narratives, which address a wide range of attitudes toward utopia, to expose the

challenge that literary play poses to dogmatism and to elucidate the sense of renewal it can bring to social imagination. Using both structural analysis and reception theory, she introduces readers outside Russia to a fascinating body of literature that includes Aleksandr Zinoviev's *The Yawning Heights*, Abram Terts's *Liubimov*, Vladimir Voinovich's *Moscow 2042*, and Liudmila Petrushevskaja's *The New Robinsons*. Not advocating its own utopian alternative to current social realities, meta-utopian fiction investigates the function of a deep human impulse to imagine, project, and enforce alternative social orders. Clowes examines the technical innovations meta-utopian writers have made in style, image, and narrative structure that inform fresh modes of social imagination. Her analysis leads to an inquiry into the intended and real audiences of this fiction, and into the ways its authors try to move them toward more sophisticated social discourse. Unquestionably, several factors have combined to make this happen. These include a prevailing demand for the convenience of ready-to-eat or heat-and-eat manufactured food products that allow ready entry and survival of some robust, temperature-insensitive microorganisms; a drastic reduction in the costs of air, sea, and road transportation that has taken some pathogenic microorganisms to where they were absent previously; an expanding world population that has stretched the boundary of human activity; and an ageing population whose weakened immune functions provide a fertile ground for opportunistic pathogens to invade and thrive. Given the diversity of causative agents (ranging from viruses, bacteria, yeasts, filamentous fungi, protozoa, helminthes, toxins, to toxic agents), and the ingenuity of pathogenic microbes to evolve through genetic reassortment, horizontal gene transfer, and/or random genetic mutation, it has become an enormous challenge to understand how foodborne agents are able to evade host immune defenses and induce diseases, and also to develop and apply innovative approaches for improved diagnosis, treatment, and prevention of foodborne diseases. Handbook of Foodborne Diseases summarizes the latest findings on more than 100 foodborne diseases and their causative agents. With contributions from international experts on foodborne pathogens, toxins, and toxic agents research, this volume provides state-of-the-art overviews on foodborne diseases in relation to their etiology, biology, epidemiology, clinical presentation, pathogenesis, diagnosis, treatment, and prevention. Apart from offering a comprehensive textbook for undergraduate and postgraduate students in food, medical, and veterinary microbiology, this volume constitutes a valuable reference on foodborne diseases for medical professionals and health authorities, and forms an informative educational resource for the general public.

Beneath the Lion's Gaze: A Novel Maaza Mengiste.2011-01-03

An important novel, rich in compassion for its anguished characters. —The New York Times Book Review This memorable, heartbreaking story opens in Addis Ababa, Ethiopia, 1974, on the eve of a revolution. Yonas kneels in his mother’s prayer room, pleading to his god for an end to the violence that has wracked his family and country. His father, Hailu, a prominent doctor, has been ordered to report to jail after helping a victim of state-sanctioned torture to die. And Dawit, Hailu’s youngest son, has joined an underground resistance movement—a choice that will lead to more upheaval and bloodshed across a ravaged Ethiopia. Beneath the Lion’s Gaze tells a gripping story of family, of the bonds of love and friendship set in a time and place that has rarely been explored in fiction. It is a story about the lengths human beings will go in pursuit of freedom and the human price of a national revolution. Emotionally gripping, poetic, and indelibly tragic, Beneath The Lion’s Gaze is a transcendent and powerful debut.

human agency to his critical discussion of structural forces, Georgi M. Derluguian reconstructs from firsthand accounts the life story of Musa Shanib—who from a small town in the Caucasus grew to be a prominent leader in the Chechen revolution. In his examination of Shanib and his keen interest in the sociology of Pierre Bourdieu, Derluguian discerns how and why this dissident intellectual became a nationalist warlord. Exploring globalization, democratization, ethnic identity, and international terrorism, Derluguian contextualizes Shanib's personal trajectory from de-Stalinization through the nationalist rebellions of the 1990s, to the recent rise in Islamic militancy. He masterfully reveals not only how external economic and political forces affect the former Soviet republics but how those forces are in turn shaped by the individuals, institutions, ethnicities, and social networks that make up those societies. Drawing on the work of Charles Tilly, Immanuel Wallerstein, and, of course, Bourdieu, Derluguian's explanation of the recent ethnic wars and terrorist acts in Russia succeeds in illuminating the role of human agency in shaping history.

Disability Policy in China Xiaoyuan Shang, Karen R.

Fisher. 2015-12-14 Without access to a public social welfare system in parts of China, some families face invidious decisions about the lives of their children with disabilities. In other places, children with disabilities can now expect to participate in their families and communities with the same aspirations as other children. Understanding how Chinese policy has changed in the places that have addressed these stark situations is vital for the rights of the children and their families who still struggle to find the support they need. This book examines family experiences of child disability policy in China, and is the first to compile research on this area. It applies a child disability rights framework in four domains - care and protection, economic security, development and participation - to investigate families' experiences of the effectiveness of support to fulfil their children's rights.

Questioning how families experience the interrelationships between these rights, it also considers what the further implications of the policy are. It includes vivid case studies of families' experiences, and combines these with national data to draw out the likely future policy directions to which the Chinese government has said it is committed. Bringing together a wealth of statistical and qualitative data on children with disabilities, this book will be of great interest to students and scholars of Chinese social welfare, social policy, society and children's studies, as well as policy-makers and NGOs alike.

The Microbiome in Rheumatic Diseases and Infection

Gaafar Ragab, T. Prescott Atkinson, Matthew L. Stoll. 2018-06-19

This book discusses the role of the microbiome in rheumatic diseases and details its implications for patient treatment.

Recently, with technological advances, there has been significant research into the microbiome. This has enabled us to more profoundly understand its role in our immune system maturation as well as the role played by microorganisms in autoimmunity and the deeply related rheumatic diseases. This book comprehensively explains the emerging microbiome research through the interrelationships of biomedical sciences, including: immunology, microbiology, bioinformatics, and, with special emphasis, the clinical aspect of rheumatology. It examines the interplay between infectious organisms and major autoimmune diseases, including rheumatoid arthritis, psoriatic arthritis, juvenile arthritis, systemic lupus erythematosus, and vasculitis, and explains how to apply that knowledge to diagnostic techniques and treatment decisions. The international team of expert authors provides insight into current therapies and future interventions specifically targeting the microbiota and explores the impact of our deeper understanding on enhancing personalized medicine. Remembering Transitions Ksenia Robbe. 2023-10-04 This volume offers critical perspectives on memories of political and socioeconomic 'transitions' that took place between the 1970s and 1990s across the globe and that inaugurated the end of the Cold War. The essays respond to a wealth of recent works of literature, film, theatre, and other media in different languages that rethink the transformations of those decades in light of present-day crises. The authors scrutinize the enduring silences produced by established frameworks of memory and time and explore the mnemonic practices that challenge these frameworks by positing radical ambivalence or by articulating new perspectives and subjectivities. As a whole, the volume contributes to current debates and theory-making in critical memory studies by reflecting on how the changing recollection of transitions constitutes a response to the crisis of memory and time regimes, and how remembering these times as crises renders visible continuities between this past and the present. It is a valuable resource for academics, students, practitioners, and general readers interested in exploring the dynamics of memory in post-authoritarian societies.

The Underground Hamid Ismailov.2014-01-10 "I am Moscow's underground son, the result of one too many nights on the town," says Mbobo, the precocious twelve-year-old narrator of Hamid Ismailov's *The Underground*. Born from a Siberian woman and an African athlete competing in the 1980 Moscow Olympics, Mbobo navigates the complexities of being a fatherless, mixed-raced boy in the Soviet Union in the years before its collapse, guided only by the Moscow subway system. Named one of the ten best Russian novels of the 21st Century (Continent Magazine), *The Underground* is Ismailov's haunting tour of the Soviet capital, on the surface and beneath. Though deeply engaged with great Russian authors of the past—Dostoyevsky, Nabokov, and, above all, Pushkin—Ismailov is an emerging master of Russian writing that reflects the country's diversity today. Reviews Hamid Ismailov has the capacity of Salman Rushdie at his best to show the grotesque realization of history on the ground. —Literary Review The dream of grandeur is more than justified by the artfulness of *The Underground*, which...create[s] the motifs of blackness, subterranean movement, and isolation that are the novel's strongest effects. —Transitions Online Hamid Ismailov is

The Myth of the Non-Russian Erika Haber.2003 Erika Haber's analysis of the interplay between literature and culture in the Soviet Union of the 1970s and 1980s breaks new ground not only in our understanding of this relationship, but also in our appreciation of the literary genre popularized at that time by the Colombian writer Gabriel Garc a M rquez--magical realism. The Soviets perceived Garc a M rquez as a Socialist, and they sanctioned his magical realism--when other writing styles were outlawed--as a natural extension of socialist realism. Haber discusses the use of magical realism in Soviet literature, focusing especially on two non-Slavic writers: Fasil Iskander, of Abkhazia, and Chingiz Aitmatov, of Kyrgyzstan. She explores how these writers used literary tools of subversion and successfully

employed magical realism in rebellion against the prescription of national conformity in art. In critical readings of Iskander and Aitmatov, Haber demonstrates how these writers juxtaposed their native myth with Soviet myth, thus undermining the primary message of socialist realism by suggesting a plurality of worlds and truths.
