Salinity Glove Box Guide .2005 The Salinity Glove Box Guide covers dryland, irrigation and urban salinity. The Guide is a practical reference tool when working in the field and is useful when discussing salinity concepts with land managers.--P. 1.

Research Techniques in Animal Ecology Luigi Boitani, Todd Fuller.2000-06-01 The present biodiversity crisis is rife with opportunities to make important conservation decisions; however, the misuse or misapplication of the methods and techniques of animal ecology can have serious consequences for the survival of species. Still, there have been relatively few critical reviews of methodology in the field. This book provides an analysis of some of the most frequently used research techniques in animal ecology, identifying their limitations and misuses, as well as possible solutions to avoid such pitfalls. In the process, contributors to this volume present new perspectives on the collection, analysis, and interpretation of data. Research Techniques in Animal Ecology is an overarching account of central theoretical and methodological controversies in the field, rather than a handbook on the minutiae of techniques. The editors have forged comprehensive presentations of key topics in animal ecology, such as territory and home range estimates, habitation evaluation, population viability analysis, GIS mapping, and measuring the dynamics of societies. Striking a careful balance, each chapter begins by assessing the shortcomings and misapplications of the techniques in question, followed by a thorough review of the current literature, and concluding with possible solutions and suggested guidelines for more robust investigations.

Zoo Animal and Wildlife Immobilization and Anesthesia Gary West, Darryl J. Heard, Nigel Caulkett.2014-07-21 Zoo Animal and Wildlife Immobilization and Anesthesia, Second Edition is a fully updated and revised version of the first comprehensive reference on anesthetic techniques in captive and free-ranging wildlife. Now including expanded coverage of avian and aquatic species, this exhaustive resource presents information on the full range of zoo and wildlife species. Covering topics ranging from monitoring and field anesthesia to CPR and euthanasia, the heart of the book is devoted to 53 species-specific chapters providing a wealth of information on little-known and common zoo and wildlife animals alike. In addition to new species chapters, the new edition brings a new focus on pain management, including chronic pain, and more information on species-specific physiology. Chapters on airway management, monitoring, emergency therapeutics, and field procedures are all significantly expanded as well. This update to Zoo Animal and Wildlife Immobilization and Anesthesia is an invaluable addition to the library of all zoo and wildlife veterinarians.

Assessing and Measuring Caring in Nursing and Health Science Jean Watson PhD, RN, AHN-BC, FAAN.2008-09-23 As in the first edition, the author has done a magnificent job compiling these instruments and providing important information that the reader can use to evaluate their usefulness. --Ora Lea Strickland, RN, PhD, FAAN (From the Foreword) This book provides all the essential research tools for assessing and measuring caring for those in the caring professions. Watson's text is the only comprehensive and accessible collection of instruments for care measurement in clinical and educational nursing research. The measurements address quality of care, patient, client, and nurse perceptions of caring, and caring behaviors, abilities, and efficacy. Newly updated, this edition also contains three new chapters, which document the most effective caring language and provide innovative methods of selecting appropriate tools for measurement based on validity and reliability. Key features of new edition: A chapter providing a comprehensive literature review of the research and measurement of caring A chapter entitled Caring Factor Survey, which presents a new scale based on Watson's original theory of human caring Chapters outlining instruments for care measurement, including Holistic Caring Inventory, Peer Group Caring Interaction Scale, and many more New instruments focused on assessing caring at the administrative-relational caring level An updated section dedicated to challenges and future directions of the measurement of caring

A Handbook on Biotelemetry and Radio Tracking Charles J. Amlaner,David W.

Macdonald.2013-10-02 A Handbook on Biotelemetry and Radio Tracking presents the proceedings of an International Conference on Telemetry and Radio Tracking in Biology and Medicine, held in The University of Oxford, Oxford, U.K. on March 20-22, 1979. This book illustrates the advances connected with every aspect of biotelemetry and radio tracking. Organized into five parts encompassing 101 chapters, this compilation of papers begins with an overview of the method that allows assessment or control of biological parameters from animals, subjects, and patients with comparatively little disturbance and restraint. This text then examines radio telemetry as a system for telemetry or communications over great distances. Other chapters consider better transmitter design and construction of radio tracking. This book discusses as well telemetric measurements of hemodynamic response to driving in coronary patients. The final chapter deals with the study of the coastal movements of Atlantic salmon tagged with ultrasonic transmitters. This book is a valuable resource for biological researchers and ecologists.

Soft Computing Applications for Renewable Energy and Energy Efficiency Cascales, Maria del Socorro García.2014-10-31 As the climate and environment continue to fluctuate, researchers are urgently looking for new ways to preserve our limited resources and prevent further environmental degradation. The answer can be found through computer science, a field that is evolving at precisely the time it is needed most. *Soft Computing Applications for Renewable Energy and Energy Efficiency* brings together the latest technological research in computational intelligence and fuzzy logic as a way to care for our environment. This reference work highlights current advances and future trends in environmental sustainability using the principles of soft computing, making it an essential resource for students, researchers, engineers, and practitioners in the fields of project engineering and energy science.

Annual Cycles of Diving Behavior and Ecology of the Weddell Seal Michael Angelo

Castellini,Randall William Davis,Gerald L. Kooyman.1992-01-01 This work details more than ten years of study in the Antarctic on the diving biology of Weddell seals, a species capable of diving over 600 meters and for as long as 82 minutes. The authors focus on seasonal diving patterns and geographical differences and discuss how diving patterns are influenced by the physical and ecological environment of the seals.

Nutrition of the Rabbit Carlos Blas,Julian Wiseman.2010 Rabbit production systems are important providers of meat in many parts of the world due to the species' many advantages: rapid growth rate, good reproductive performance, adaptability and ability to thrive on high fibre raw materials. They also provide angora wool, and are popular as companion animals. Bringing together international expertise in rabbit production, topics covered in this authoritative volume include digestive physiology, feed formulation and product quality as well as new contributions on innovative feeding strategies, new methods for feed processing, feed management around weaning and the relationship between nutrition and intestinal health. This book is an essential resource for researchers, practitioners and students of animal nutrition and production

Journal of Environmental Accounting and Management Zhifeng Yang,Sergio Ulgiati .2018-07-01 his peer-reviewed journal publishes original research results in the field of environmental and ecological science with focus on applications to the sustainable management of natural, human-dominated, and man-made ecosystems. The aim of the journal is to provide a place for a rapid exchange of new ideas and concepts for scientists and engineers in the fields of environmental accounting, human and systems ecology, and environmental management. Manuscripts on environmental accounting and managements are solicited, including: mathematical modeling; computational and management techniques in environmental, ecological, energy and information science; environmental technology

and engineering; human managed ecosystems such as agricultural, urban, coastal, riparian, and wetland ecosystems. No length limitations for contributions are set, but only concisely written manuscripts are considered for publication. Brief papers can be published on the basis of Technical Notes. Discussions of previous published papers are welcome. Topics of Interest Environmental and ecological economics, environmental accounting, environmental impact assessment, ecosystem service assessment, energy and resource use, social factors and management. Modeling in environmental conservation and restoration, eco-hydrology and water resources management, ecological process and pattern, climate change effects, environmental engineering and technology. Planning and management in human dimension-institutions and patterns for socio-economic systems, industrial ecology, ecological informatics, landscape design, and urban planning. Environmental policy, legislation, and innovations with environmental and strategic impact assessment, project appraisal and auditing, and environmental protection.

Stochastic Programming Horand Gassmann, W. T. Ziemba. 2013 This book shows the breadth and depth of stochastic programming applications. All the papers presented here involve optimization over the scenarios that represent possible future outcomes of the uncertainty problems. The applications, which were presented at the 12th International Conference on Stochastic Programming held in Halifax, Nova Scotia in August 2010, span the rich field of uses of these models. The finance papers discuss such diverse problems as longevity risk management of individual investors, personal financial planning, intertemporal surplus management, asset management with benchmarks, dynamic portfolio management, fixed income immunization and racetrack betting. The production and logistics papers discuss natural gas infrastructure design, farming Atlantic salmon, prevention of nuclear smuggling and sawmill planning. The energy papers involve electricity production planning, hydroelectric reservoir operations and power generation planning for liquid natural gas plants. Finally, two telecommunication papers discuss mobile network design and frequency assignment problems.

The Sperm Cell Christopher J. De Jonge, Christopher Barratt. 2011-02-17 Originally published in 2006, this is a comprehensive and definitive account of the human male gamete. The volume summarizes many unique and revealing characteristics of the sperm cell. It provides a detailed overview of human sperm production, maturation and function, and looks at how these processes affect and influence fertility, infertility and ART. The volume thus provides a detailed review of the most important research and developments, augmented with pertinent references. This book will appeal to all practitioners and scientists in reproductive medicine and in particular to clinical scientists, graduate and post-graduate scientists, and laboratory personnel.

Sustainable Practices: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources. 2013-12-31 This reference explores some of the most recent developments in sustainability, delving into topics beyond environmental science to cover issues of sustainable economic, political, and social development--Provided by publisher.

Biomass Supply Chains for Bioenergy and Biorefining Jens Holm-Nielsen, Ehiازه Augustine Ehimen. 2016-02-23 Biomass Supply Chains for Bioenergy and Biorefining highlights the emergence of energy generation through the use of biomass and the ways it is becoming more widely used. The supply chains that produce the feedstocks, harvest, transport, store, and prepare them for combustion or refinement into other forms of fuel are long and complex, often differing from feedstock to feedstock. Biomass Supply Chains for Bioenergy and Biorefining considers every aspect of these supply chains, including their design, management, socioeconomic, and environmental impacts. The first part of the book introduces supply chains, biomass feedstocks, and their analysis, while the second part looks at the harvesting, handling, storage, and transportation of biomass. The third part studies the modeling of supply chains and their management, with the final section discussing, in minute detail, the supply chains involved in the production and usage of individual

feedstocks, such as wood and sugar starches, oil crops, industrial biomass wastes, and municipal sewage stocks. Focuses on the complex supply chains of the various potential feedstocks for biomass energy generation Studies a wide range of biomass feedstocks, including woody energy crops, sugar and starch crops, lignocellulosic crops, oil crops, grass crops, algae, and biomass waste Reviews the modeling and optimization, standards, quality control and traceability, socioeconomic, and environmental impacts of supply chains

The Routledge Companion to Accounting Information Systems Martin Quinn,Erik Strauss.2017-12-22 Information technology has permeated all walks of life in the past two decades. Accounting is no exception. Be it financial accounting, management accounting, or audit, information technology and systems have simplified daily tasks and routine work, simplified reporting, and changed how accounting is done. The Routledge Companion to Accounting Information Systems provides a prestige reference work which offers students and researchers an introduction to current and emerging scholarship in the discipline. Contributions from an international cast of authors provides a balanced view of both the technical underpinnings and organisational consequences of accounting information systems. With a focus on the business consequences of technology, this unique reference book will be a vital resource for students and researchers involved in accounting and information management.

Message from the Darkroom Carlo Mollino.2006 When it was first published in 1999, Crimes Against Humanity called for a radical shift from diplomacy to justice in international affairs. In vivid, non-legalistic prose, leading human rights lawyer Geoffrey Robertson made a riveting case for holding political and military leaders accountable in international courts for genocide, torture, and mass murder. Since then, fearsome figures such as Charles Taylor, Laurent Gbagbo, and Ratko Mladic have been tried in international criminal court, and a global movement has rallied around the human rights framework of justice. Any such legal framework requires constant evolution in order to stay relevant, and this newly revised and expanded volume brings the conversation up to date. In substantial new chapters, Robertson covers the protection of war correspondents, the problem of piracy, crimes against humanity in Syria, nuclear armament in Iran, and other challenges we are grappling with today. He criticizes the Obama administration's policies around "targeted killing" and the trials of Khalid Sheikh Mohammed and other "high value" detainees. By rendering a complex debate accessible, Robertson once again provides an essential guide for anyone looking to understand human rights and how to work toward a more complete blueprint for justice.

Comparative Reproductive Biology Heide Schatten,Gheorghe M. Constantinescu.2008-03-21 When considering the physiological systems of the body, the degree of species variation within the reproductive system compared to other systems is remarkable. Furthermore, it is essential that researchers, educators, and students alike remain aware of the fundamental comparative differences in the reproductive biology of domestic species. Written by renowned scientists in their respective fields, Comparative Reproductive Biology is a comprehensive reference on the reproductive systems of domestic species. The book offers both broad and specific knowledge in areas that have advanced the field in recent years, including advances in cell and molecular biology applied to reproduction, transgenic animal production, gender selection, artificial insemination, embryo transfer, cryobiology, animal cloning and many others. This seminal text includes topics in animal reproduction that are usually only found as part of other books in animal science such as anatomy, histology, physiology, radiology, ultrasonography, and others. Comprehensive reference of the reproductive systems of domestic species Written by a team of top researchers Richly illustrated throughout, including 12 pages of color images

Implant Therapy Myron Nevins,Hom-Lay Wang.2019 Since the publication of the first edition of this book 20 years ago, the landscape of implant dentistry has changed dramatically. Both the industry

and patient demand have expanded exponentially, leaving the clinician with many decisions to make (and often as many questions to ask) regarding patient selection, surgical timing and techniques, implant types, and restorative approaches. This volume brings together the knowledge of the foremost leaders in implant dentistry, covering all aspects of the treatment process, from decision-making and treatment planning through imaging, surgical techniques, bone and soft tissue augmentation, multidisciplinary approaches, loading protocols, and finally strategies for preventing and treating complications and peri-implantitis as well as providing effective implant maintenance therapy. Filled with expert knowledge based on decades of research and clinical experience as well as abundant illustrations and clinical case presentations, this book is an indispensable resource for clinicians seeking to provide implant treatment at the highest standard of care.

Flavonoids, Inflammation and Cancer Hollie Swanson.2015-08-28 This book provides an insightful analysis of the chemopreventive actions of flavonoids. Flavonoids are naturally occurring constituents of plants that have been traditionally used as anti-inflammatory and anti-cancer medicines. In addition, human consumption of vegetables and fruits with high concentrations of flavonoids is associated with decreased cancer mortalities rates. Flavonoids, Inflammation and Cancer presents an in-depth analysis of the mechanisms by which flavonoids are thought to prevent inflammation and the development of GI and steroid-responsive cancers. In addition, the promise and pitfalls associated with using flavonoids as chemopreventive agents are discussed. This book is an invaluable reference for basic and clinical scientists who are interested in exploring the link between nutrition and cancer. Contents:Introduction to Flavonoids and ChemopreventionMechanisms by Which Flavonoids Exert Their Beneficial Anti-cancer EffectsFlavonoids and the Inflammatory ResponseFlavonoids and Cancers of the Gastrointestinal TractFlavonoids and Steroid-responsive CancersSummary and Future Directions Readership: Researchers in the pharmaceutical industry, cancer researchers, immunologists, biochemists, natural product researchers. Key Features:Links the biochemical properties of flavonoids to the events associated with the carcinogenic processExamines both the promise and pitfalls associated with the potential use of flavonoids as chemopreventive therapiesThe results obtained from clinical and preclinical (in vitro and in vivo) studies are compared and contrastedKeywords:Flavonoid;Tumor;Proliferation;Chemoprevention

Food Safety Management John Holah.2013-11-01 Food safety is now seen to be managed and controlled by three fundamental requirements. HACCP programmes control hazards associated with the process, processing environmental prerequisites control hazards associated with the processing environment, and quality systems (e.g. ISO 9000) manage quality-related prerequisites, e.g. supplier approval and control, control of non-conforming products, customer complaints, traceability and recall, etc. This chapter focuses on processing environmental prerequisites and covers the design of the food manufacturing infrastructure (the factory, the process lines and services, the equipment and the food operatives) and the hygienic practices to keep the infrastructure in optimum condition (maintenance, pest control, cleaning and disinfection and personal hygiene). The management of environmental prerequisites initially involves ensuring that all generic prerequisites (such as cleaning and disinfection) are undertaken to best practice and appropriately validated. Further to this, any remaining sources of environmental hazards, and the transfer vectors by which they can contaminate food products, are assessed and appropriate controls installed. If controls are identified such that any failings in these controls would most likely result in product contamination, such controls are termed operational prerequisites (OPs). OPs are managed in a similar way to HACCP critical control points (CCPs) so that in the same way as CCPs are the major focus of attention in the control of the food process, OPs are the major focus in the control of the processing environment.

Environment and Livelihoods in Tropical Coastal Zones International Rice Research Institute,International Water Management Institute.2006-01-01 This book focuses on the challenges people face in managing agricultural crops, aquaculture, fisheries and related ecosystems in inland areas of coastal zones in the tropics of Asia, Africa, Australia and South America. These challenges

can create conflicts in the use of natural resources between different stakeholders. Through many case studies, the book discusses the nature of the conflicts and identifies what is known and not known about how to manage them. For example, some case studies relate to the trade-offs between enhancing agricultural production by constructing embankments to keep out saline water and maintaining not only the variety of rural livelihoods but also brackish aquatic biodiversity. Other case studies provide the lessons learnt from the conversion of mangrove forests to shrimp farms.

Sanitation and Personal Hygiene Handbook .1980 Abstract: School food service personnel are presented with a handbook designed to help foodservice operations provide food that is wholesome, sanitary and safe. Foods eaten by children must be free of bacterial pathogens. Microbial contamination or chemical toxicants in foods may cause food poisoning or foodborne disease. Thus, school foodservice has a responsibility to maintain high standards of cleanliness. Guidelines are given for basic sanitation practices in food storage, preparation, transportation, handling and clean-up. Personal hygiene hints are recommended. Insect and rodent pests represent a health hazard which can be avoided by prevention and control. Safety and sanitation checklists may be used as effective management tools for improving foodservice facilities. Appendices include a bibliography of information resources, food storage rules, a self-inspection questionnaire, and subject outlines with audiovisual aids for use in inservice training programs for foodservice personnel.

Green Logistics and Transportation Behnam Fahimnia, Michael G.H. Bell, David A.

Hensher, Joseph Sarkis. 2015-05-11 This book identifies and furthers the state of the art in green logistics and transportation with a supply chain focus. It includes discussions on concerns and linkages across policy, corporate strategy and operations and inter-organizational relationships and practices. Separate sections are assigned to discuss issues related to greening of logistics and transportation functions, including green logistics network, green land transportation and green air and water transportation. Linking research with practice is another important feature of the book as various techniques and research methodologies are utilized to explain and analyze green logistics and transportation concepts and issues. The authors come from throughout the world from a variety of backgrounds (e.g. policy, technical, engineering, and management backgrounds) to provide solutions and insights from their regional and global perspectives to some of the world's most critical green logistics and transportation issues.

Risk Management Delfina Gabriela Garrido Ramos, Luís Almeida (Editor). 2021 All activities involve risks from a wide variety of sources (management errors, financial uncertainty, legal liabilities, project failures, human errors, accidents, natural disasters, etc.). Risk management is the process of identifying, assessing and controlling threats to an organization. Risk management, also considered as uncertainty management, allows organizations to attempt to prepare for the unexpected by minimizing risks and extra costs before they happen. ISO 31000 recommends that risk management be part of the organization's structure, processes, objectives, strategy and activities. This standard places a greater focus on creating value as the key driver of risk management and features other related principles such as continual improvement, the inclusion of stakeholders, being customized to the organization and consideration of human and cultural factors. It is a model that regularly exchanges feedback with its external environment in order to fit a wider range of needs and contexts. This book gathers contributions of several authors worldwide which cover several aspects related to risk management, including the application of risk management in specific sectors--

Fur Seals Roger L. Gentry, Gerald L. Kooyman. 2014-07-14 The contributors to this volume have accomplished a breakthrough in our ability to collect data on ocean-dwelling mammals. In the first large-scale comparison of fur seals, they have employed quantitative methods and a special

instrument called a Time-Depth-Recorder to study the strategies used by females in six species of cared seals to rear and wean their young in different environments. Originally published in 1986. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Mechanism Design for Sustainability Zongwei Luo.2013-03-12 This book provides advanced analytics and decision management techniques and tools for developing sustainable competitive advantages in the studied target context. In order to achieve sustainable economy, "the capacity to endure," it is essential to understand and study the mechanisms for interactions and impact from and among these perspectives.

Sustainability Impact Assessment of Land Use Changes Katharina Helming, Marta Pérez-Soba, Paul Tabbush.2008-06-11 There are many reasons why strategic intelligence is required to support policy decisions. These primarily stem from the nature of today's knowledge society with two contrasting trends. On the one hand, there is a trend of increasing human intelligence in the economic, social and political systems. On the other hand, there is a trend towards dissolving certainties about the problems and solutions of today's society. Clearly, more information does not necessarily imply more certainties on how to act. What is more, the same facts are often interpreted in markedly different ways: the same policy relevant information can - and often does - result in conflicting framing of a problem by different stakeholders. This is mainly due to competing assumptions, rather than because of inconsistent facts. Therefore, it is not surprising that policy-makers are calling for strategic intelligence to support their understanding of today's challenges, including the relevant aspects of science and technology, their impact and their possible future developments. Over the last 15 years, Europe has rapidly adopted the practice of developing and using Impact Assessment (IA) tools to support decision-making. Formal procedures and guidance for IA are well established within the European Commission and in most EU Member States. The adoption of IA procedures alone, however, does not guarantee that every policy domain is actually using the full potential of these assessment tools in the preparation of policies and legislation.

Sustainability: Multi-Disciplinary Perspectives Heriberto Cabezas, Urmila Diwekar.2012-11-14 The concept of sustainability is inherently multi-disciplinary because it concerns a complex system having economic, technological, ecological, political, and other perspectives. Consequently, any effort in the area of sustainability involves concepts, principles, and methods from engineering, the social sciences including economics and social psychology, the biological sciences including ecology, and the physical sciences. *Sustainability: Multi-Disciplinary Perspectives* discusses multidisciplinary aspects of the salient concepts, principles, and methods relevant to sustainability in a coherent and comprehensive manner. Topics covered range from green engineering and sustainability metrics to infrastructure and environmental policy.
