The Makers of Venice Mrs. Oliphant (Margaret).1891

Venice, Città Excelentissima Marino Sanudo.2008-06-30 When Venice was both a center of Renaissance culture and a gathering place for news from around the world, Marin Sanudo tried to write everything down. He was the finest diarist of his time, with a keen eye for the everyday and the monumental alike. Venice, Città Excelentissima offers a broad and engaging introduction to Sanudo's detailed observations of life in his beloved city and the world it knew. This expertly translated volume glimpses into Renaissance life at a spectacular time when Venice was at the top of its game. Organized thematically, the selections offer a Venetian's viewpoint of the glories of high culture, the gritty reality and sparkling drama of daily life, the perils of diplomacy and war, and the high-risk ventures of voyages and commerce. Here, the work of the Renaissance's most assiduous historian is finally given the accessibility it warrants and the merit it is due.

Mathematics for Machine Learning Marc Peter Deisenroth,A. Aldo Faisal,Cheng Soon Ong.2020-04-23 The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Encyclopedia of Renaissance Philosophy Marco Sgarbi.2022-10-27 Gives accurate and reliable summaries of the current state of research. It includes entries on philosophers, problems, terms, historical periods, subjects and the cultural context of Renaissance Philosophy. Furthermore, it covers Latin, Arabic, Jewish, Byzantine and vernacular philosophy, and includes entries on the cross-fertilization of these philosophical traditions. A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is, rather simply to cover the philosophy of the period between 1300 and 1650.

Sacred Art Henry Glassie,Pravina Shukla.2017-11-20 Sacred art flourishes today in northeastern Brazil, where European and African religious traditions have intersected for centuries. Professional artists create images of both the Catholic saints and the African gods of Candomblé to meet the needs of a vast market of believers and art collectors. Over the past decade, Henry Glassie and Pravina Shukla conducted intense research in the states of Bahia and Pernambuco, interviewing the artists at length, photographing their processes and products, attending Catholic and Candomblé services, and finally creating a comprehensive book, governed by a deep understanding of the artists themselves. Beginning with Edival Rosas, who carves monumental baroque statues for churches, and ending with Francisco Santos, who paints images of the gods for Candomblé terreiros, the book displays the diversity of Brazilian artistic techniques and religious interpretations. Glassie and Shukla enhance their findings with comparisons from art and religion in the United States, Nigeria, Portugal, Turkey, India, Bangladesh, and Japan and gesture toward an encompassing theology of power and beauty that brings unity into the spiritual art of the world.

Sinatra at the Sands - 2026 George H. Rothacker.2024-03-11 Sinatra was at his finest at the Copa Room in 1966. Can the entertainer be even better, enhanced by new technology sixty years later? Twin brothers from Lakehurst, New Jersey, join forces to bring Frank Sinatra back to life in 2026, reprising and updating a concert series staged in Las Vegas in 1966 by the legendary entertainer. After earning their masters degrees in computer science from Oxford University, Lorenzo and Aldo Fiore set off on different career paths only to find their way back into a collaboration that pushes technology to the edges of possibility, as they each reach their own personal objectives through the process. Sinatra at the Sands -2026 is full of twists and turns, successes and setbacks, each shedding light on what it means to be human, as well as the limitations of our species to predict outcomes for ourselves and for future generations. Although the novel is speculative and the climactic events perhaps not totally possible at this time, the technology within its pages exists for readers of today, provoking questions about the limits of our science just a few short years away.

Modern Architecture and Other Essays Vincent Scully.2003 Vincent Scully has shaped not only how we view the evolution of architecture in the twentieth century but also the course of that evolution itself. Combining the modes of historian and critic in unique and compelling ways--with an audience that reaches from students and scholars to professional architects and ardent amateurs--Scully has profoundly influenced the way architecture is thought about and made. This extensively illustrated and elegantly designed volume distills Scully's incalculable contribution. Neil Levine, a former student of Scully's, selects twenty essays that reveal the breadth and depth of Scully's work from the 1950s through the 1990s. The pieces are included for their singular contribution to our understanding of modern architecture as well as their relative unavailability to current readers. Levine offers a perceptive overview of Scully's distinguished career and introduces each essay, skillfully setting the scholarly and cultural scene. The selections address almost all of modern architecture's major themes and together go a long way toward defining what constitutes the contemporary experience of architecture and urbanism. Each is characteristically Scully--provocative, yet precise in detail and observation, written with passionate clarity. They document Scully's seminal views on the relationship between the natural and the built environment and trace his progressively intense concern with the fabric of the street and of our communities. The essays also highlight Scully's engagement with the careers of so many of the twentieth century's most significant architects, from Frank Lloyd Wright and Louis Kahn to Robert Venturi. In the tradition of great intellectual biographies, this finely made book chronicles our most influential architectural historian and critic. It is a gift to architecture and its history.

Print Culture in Renaissance Italy Brian Richardson.1994 The emergence of print in late fifteenth-century Italy gave a crucial new importance to the editors of texts, who determined the form in which texts from the Middle Ages would be read, and who could strongly influence the interpretation and status of texts by adding introductory material or commentary. Brian Richardson here examines the Renaissance circulation and reception of works by earlier writers including Dante, Petrarch, Boccaccio and Ariosto, as well as popular contemporary works of entertainment. In so doing he sheds light on the impact of the new printing and editing methods on Renaissance culture, including the standardisation of vernacular Italian and its spread to new readers and writers, the establishment of new standards in textual criticism, and the increasing rivalry between the two cities on which this study is chiefly focused, Venice and Florence.

Thinking Architecturally Paul Righini.2000 Through a critical study of issues such as order, form, space, style, place-making, aesthetics, and architectural theory, students are encouraged to think about their own creative ideas. The use of analytical reasoning, lateral thinking, drawing and modelling is emphasised.

Based on a True Story Donald F. Stevens.1998-07-01 Combining history with discussions of dramatic cinema, *Based on a True Story: Latin American History at the Movies* examines how film has portrayed Latin America from the late fifteenth century to the present. The book opens with an introduction on the visual presentation of the past in the movies, while the rest of the book consists of essays that explore the best feature films on Latin America from the professional historian's perspective.

Aldo Leopold Curt D. Meine.2010-10-19 This biography of Aldo Leopold follows him from his childhood as a precocious naturalist to his profoundly influential role in the development of conservation and modern environmentalism in the United States. This edition includes a new preface by author Curt Meine and an appreciation by acclaimed Kentucky writer and farmer Wendell Berry.

Engineering Eden Jordan Fisher Smith.2019-03-19 "Weaves together a dramatic court case in Los Angeles, a grizzly-bear attack, and a surprisingly fascinating debate . . . a thrilling read." —The Wall Street Journal Winner of the California Book Award, Silver Medal for Nonfiction Longlisted for the PEN/E.O. Wilson Award for Literary Science Writing One of Outside magazine's 10 Outdoor Books that Shaped the Last Decade In the summer of 1972, twenty-five-year-old Harry Eugene Walker hitchhiked away from his family's northern Alabama dairy farm to see America. Nineteen days later, he was killed by an endangered grizzly bear in Yellowstone National Park. The ensuing civil trial, brought against the US Department of the Interior for alleged mismanagement of the park's grizzly population, emerged as a referendum on how America's most beloved wild places should be conserved. Two of the twentieth century's greatest wildlife biologists testified—on opposite sides. Moving across decades and among Yellowstone, Yosemite, Glacier, and Sequoia National Parks, former park ranger Jordan Fisher Smith has crafted an epic, emotionally wrenching account of America's fraught, century-and-a-half-long attempt to remake Eden—in the name of saving it. "This meticulously investigated history of Yellowstone and its wildlife management problems should appeal to fans of Jack Olsen's classic *Night of the Grizzlies*." —Library Journal "A wonderful book . . . Smith uses [Walker's death] as a narrative focal point to explore science, policy making, bureaucracy, ego, even the law, and when he explores something he goes deep." —John M. Barry, #1 New York Times–bestselling author of *The Great Influenza* "First-rate storytelling." —Seattle Times

The Wilderness Debate Rages on Michael P. Nelson,J. Baird Callicott.2008 Ten years ago, *The Great New Wilderness Debate* began a cross-disciplinary conversation about the varied constructions of wilderness and the controversies that surround them. *The Wilderness Debate Rages On* will reinvigorate that conversation and usher in a second decade of debate. Like its predecessor, the book gathers both critiques and defenses of the idea of wilderness from a wide variety of perspectives and voices. *The Wilderness Debate Rages On* includes the best explorations of the concept of the concept of wilderness from the past decade, underappreciated essays from the early twentieth century that offer an alternative vision of the concept and importance of wilderness, and writings meant to clarify or help us rethink the concept of wilderness. Narrative writers such as Wendell Berry, Scott Russell Sanders, Marilynne Robinson, Kathleen Dean Moore, and Lynn Maria Laitala are also given a voice in order to show how the wilderness debate is expanding outside the academy. The writers represented in the anthology include ecologists, environmental philosophers, conservation biologists, cultural geographers, and environmental activists. The book begins with little-known papers by early twentieth-century ecologists advocating the preservation of natural areas for scientific study, not, as did Thoreau, Muir, and the early Leopold, for purposes of outdoor recreation. The editors argue that had these writers influenced the eventual development of federal wilderness policy, our national wilderness system would better serve contemporary conservation priorities for representative ecosystems and biodiversity.

Represented Discourse, Resonance and Stance in Joking Interaction in Mexican Spanish Minerva Oropeza Escobar.2011 The book provides a new angle for the study of otherwise amply discussed discourse and interactional phenomena. The new perspective consists in addressing the interconnections between resonance, stance, represented discourse and joking in Mexican conversational discourse. In so doing, it contributes to a better understanding of the interplay between collaboration, intersubjectivity and emergence, among other relevant issues. Scholars and advanced students concerned with dialogic syntax theory, stance theory and Spanish, will find the present analysis interesting and innovative. However, the writing and methodology, based on clearly discussed and presented examples from selected conversational excerpts, including graphic representations of linguistic and discourse data, makes the analysis easy to follow also to non-specialists. The book is thus interesting to a broad circle of readers, whether they are concerned with any of the issues dealt with or with their mutual connections, whether they are specialists or not.

Oppositions Reader K. Michael Hays.1998 In its eleven-year history, *Oppositions*, the journal of the New York-based Institute for Architecture and Urban Studies (IAUS), had an impact far beyond what its modest cover might suggest. Indeed, *Oppositions* set the agenda, introduced the key players, and published the seminal pieces in the theorization of architecture in the last twenty years. It is a testament to the enduring importance of the journal that its issues are still highly sought after today, prized (and priced) as collector's items, and found behind the desk at virtually every architectural library. *Oppositions Reader* collects the most important essays from 26 issues of *Oppositions*. Essays from the editors of the series—Peter Eisenman, Kenneth Frampton, Mario Gandelsonas, Anthony Vidler, and Kurt Forster—are included, along with texts by such noted architects, theorists, and historians as Aldo Rossi, Alan Colquhoun, Leon Krier, Denise Scott Brown, Bernard Tschumi, Rem Koolhaas, Mary McLeod, Giorgio Ciucci, and Rafael Moneo. The page design, by Massimo Vignelli, has been faithfully reproduced. Harvard Professor K. Michael Hays has selected the writings for inclusion. Contributors include: Diana Agrest, Stanford Anderson, Giorgio Ciucci, Stuart Cohen, Alan Colquhoun, Francesco Dal Co, Peter Eisenman, William Ellis, Kurt W. Forster, Kenneth Frampton, Mario Gandelsonas, Giorgio Grassi, Fred Koetter, Rem Koolhaas, Leon Krier, Mary McLeod, Rafael Moneo, Joan Ockman, Martin Pawley, Aldo Rossi, Colin Rowe, Denise Scott Brown, Jorge Silvetti, Ignasi de Sol -Morales, Manfredo Tafuri, Bernard Tschumi, Anthony Vidler, and Hajime Yatsuka. It is an understatement to say that this volume is indispensable for any scholar or student interested in contemporary architectural theory.

Reconsidering Boccaccio Olivia Holmes,Dana Stewart.2018-06-12 *Reconsidering Boccaccio* highlights the great Florentine writer Giovanni Boccaccio's remarkable achievements in the fourteenth century as a cultural mediator; his exceptional social, geographic, and intellectual range; and the influence of his legacy on numerous cultural networks. Grounded in Boccaccio's own writings, *Reconsidering Boccaccio* brings a variety of methodologies and critical approaches to the works of one of the 'three crowns' of Italian literature. Containing essays by scholars not only of Italian literature, but also history, law, classics, and Middle Eastern literature, this collection is part of a vital movement to open up a dialogue among researchers in various areas of study that touch on the works of Boccaccio. The volume highlights the necessity of a technical and historical framework when approaching Boccaccio studies, while also shedding new light on the lives of women and their role in the reception of Boccaccio's works.

Leishmaniasis David Claborn.2014-03-19 Of all the parasitic diseases, leishmaniasis is one of the most diverse, with a variety of manifestations, from relatively minor cutaneous lesions to deadly visceral infections. It is also widespread, causing human disease in the Americas, Asia, Europe and Africa. The environments in which this disease occurs range from desert to tropical jungle to urban habitats. Not surprisingly, the literature on this disease is written in a variety of languages including Portuguese, Arabic, English and French among others. This book provides a synopsis in English of much of the recent research on leishmaniasis, with a focus on the epidemiology, diagnosis and treatment of the disease as described by researchers around the world, but with a focus on the research from Brazil and the Middle East.

A Sand County Almanac Aldo Leopold.2020-03-25 Few books have had a greater impact than A Sand County Almanac, which many credit with launching a revolution in land management. Written as a series of sketches based principally upon the flora and fauna in a rural part of Wisconsin, the book, originally published by Oxford in 1949, gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; a final section addresses the philosophical issues involved in wildlife conservation. Beloved for its description and evocation of the natural world, Leopold's book, which has sold well over 2 million copies, remains a foundational text in environmental science and a national treasure.
