Celebrating 5 Years of Avian Physiology in Frontiers in Physiology Colin G. Scanes,Sandra G. Velleman.2022-09-27 The avian physiology section is now five years old. This special e-book is to commemorate this event. For this highlights issue celebrating the first five years of the Avian Physiology section, it was decided to focus on the top papers/reviews published. Table 1 lists the top fifteen papers/reviews based on either views or downloads as a pdf. There is some agreement between the two lists. What is compelling is that of the top papers, all except one encompasses research conducted in domesticated birds, predominantly with chickens with one focused on turkeys. It is perhaps not unexpected that research on chickens dominates the top papers because of the following: - Chickens are commercially important being the number one meat animal globally. - Chickens

are used as the model species for birds. Other possibilities that could be the case include the following: - There are more researchers working on chickens compared to other commercial or wild species. - There are other avenues to publish wild bird research. - Lack of funding for open access article processing charges. The exceptions to the chicken papers/reviews is a paper on a passerine bird, the migratory blackheaded bunting (*Emberiza melanocephala*) (Singh et al., 2018) and a review paper focused on turkey satellite cell proliferation and differentiation (Velleman and Song, 2017). Of the top papers/reviews, six were related to muscle physiology (Bottje et al., 2017; Greene et al., 2019; Lassiter et al., 2019; Lin et al., 2017; Piekarski et al., 2020; Velleman and Song, 2017). These papers address different aspects of the physiology of muscle functioning and development in chickens or turkeys, specifically the following: - Small RNAs from the transcribed from mitochondrial genome in muscle (Bottje et al., 2017) - Leptin induced autophagy of muscle cells (Piekarski et al., 2020) - Proliferation and differentiation of myoblasts: influence of syndecan-4 and glypican-1 (Velleman and Song, 2017) - Myostatin signaling and muscle growth (Lassiter et al., 2019) The role of growth factors and signal transduction pathways in myoblast proliferation (Lin et al., 2017) - Muscle pathology, specifically, woody breast myopathy (Greene et al., 2019) There are also among the top papers/reviews on multiple diverse other organs and systems namely the following: adipose tissue (Abdalla et al., 2018), bone (Adhikari et al., 2019), feathering (Chen et al., 2019), gastro-intestinal functioning/microbiome (Li et al., 2018; Kraimi et al., 2018; Rodrigues et al., 2020), immune functioning (Bi et al., 2018; Wei et al., 2018), kidneys (Li et al., 2018), liver (Flees et al., 2017; Singh et al., 2018), endogenous opioids (Scanes and Pierzchala-Koziec, 2018), photoperiodism (Hanlon et al., 2020), pituitary gland (Zhang et al., 2021) and reproduction (Eusemann et al., 2018; Li et al., 2018). The geographical distribution of the top

papers is interesting as summarized in Table 2. The United States of America and the People's Republic of China were the country of origin of most of the papers. In addition, there were papers/reviews from Europe (France, Germany and a collaborative paper between researchers in the USA and Poland) and India. Of the top papers/reviews from the USA, six come from a single department, namely, the Department of Poultry Science/Center of Excellence for Poultry Science, University of Arkansas (Bottje et al., 2017; Flees et al., 2017; Green et al., 2019; Lassiter et al., 2019; Piekarski et al., 2020; Rodrigues

Arthritis Reversed Mark V Wiley.2014-02-21 Dr. Mark Wiley has spent decades researching and mastering natural wellness practices around the world. He's taken those techniques and pioneered a powerful, integrated mind/body approach to arthritis relief and prevention. Simply put, mainstream medicine fails to eradicate our everyday pains, illnesses and diseases. It fails because it is passive and reactionary and thus it is unable to prevent you from experiencing chronic health conditions. The important thing is to see and know that the solution to your daily suffering is grounded in a five-part process called, the Arthritis

Relief Action Plan: Part 1: Educate yourself about the real causes and solutions of arthritis Part 2: Reduce the current level of symptoms you are experiencing Part 3: Halt or significantly reduce the worsening of your condition Part 4: Prevent the symptoms from flaring to improve your quality of life Part 5: Regenerate healthy tissue to reverse the damage done In the pages of *Arthritis Reversed*, Dr. Wiley shows you how to determine the underlying-and sometimes hidden-causes of your arthritic symptoms. These are actually obvious root causes and contributors that are only hidden because you have not (yet) been taught to look for and identify them. Dr. Wiley shows you how to do this and then how to use that knowledge to reduce your pain and halt or slow the progression of the condition, typically within 30 to 90 days.

Patient Assessment in Clinical Pharmacy Sherif Hanafy Mahmoud.2019-03-28 This comprehensive, first-of-its kind title is an indispensable resource for pharmacists looking to learn or improve crucial patient assessment skills relevant to all pharmacy practice settings. Pharmacists' role as health care practitioners is evolving as they are taking a more active part in primary patient care -- helping patients manage their medications and diseases, providing patient education, and, in some jurisdictions, prescribing and adapting medications. To perform their day-to-day duties, pharmacists are best-served using a framework called the patient care process. This framework involves three steps: patient assessment; care plan development and implementation; and monitoring and follow up. Organized in four parts, this practical book begins with introductory chapters regarding the basics of patient assessment and the patient care process. Part II includes a detailed assessment of common symptoms encountered by pharmacists. Part III discusses assessment of patients with various chronic illnesses. Part IV addresses select specialized topics and assessment considerations. An invaluable contribution to the literature, *Patient Assessment in Clinical Pharmacy: A Comprehensive Guide* will be of great benefit to pharmacists, regardless of their practice setting, and to pharmacy students as well.
