Sorry, Wrong Answer Rod L. Evans Ph.D..2010-06-01 Where were Venetian blinds invented? What color is the black box on a commercial airplane? Where did India ink originate?\* Most of us know more than we think we know. We also think we know more than we actually do-because some of what we think we know simply ain't so. We all harbor misconceptions that are accepted not only because they are popular but also because they make sense. It makes sense to believe, for example, that German chocolate originated in Germany rather than the truth: that German chocolate is so named because it was created by Sam German. It seems logical to believe that Mercury is the hottest planet because of its proximity to the sun, or that buttermilk contains butter, that Danish

pastry is from Denmark, and that the boat race America's Cup was named after the United States of America. In *Sorry, Wrong Answer*, Rod Evans takes readers on a tour of misleading trivia, debunking commonly held assumptions and sharing surprising right answers. \*Answers: Japan; Orange; China

**The Ideological Octopus** Justin Lewis.2013-06-19 Originally published in 1991, this introduction to studying the television audience discusses developments in semiology and cultural studies and their contribution to our understanding of the power of television. How, in the most precise and intricate sense, does television influence the way we think about the world? What ideological role does it play in contemporary culture? Does TV control us or do we control it? This insightful book assesses the progress in responding to these questions and offers some answers of its own. In the 1980s, with the emergence of semiology and cultural studies in particular, there were a number of significant theoretical developments in our understanding of television's power of which this book provides an overview while also incorporating traditional approaches. It suggests that television influences us ambiguously and unpredictably, depending upon who we are and how we think. Ambiguity does not blunt television's power, it simply diversifies it into a very modern kind of omnipotence. Employing two major qualitative audience studies, this impressive study illustrates its argument with findings that are both unexpected and disturbing.
